**PROSPECTUS**

**THE LITERARY GARLAND,**  
A Monthly Magazine,

TO BE DEVOTED TO LITERATURE AND SCIENCE

WHILE so many publications of a political character find a marvellous support in public opinion and generosity, it surely will not be deemed presumptuous to hope that one of a purely literary nature may find a corresponding degree of favor and encouragement: inasmuch as it would, to form a species of relaxation from the toils of political speculation, and so forth, it is a feeling desire, some of the hours which might otherwise be bestowed upon business.

In this hope, it is proposed, by an Amateur in Literary Horticulture, to devote a few leisure hours to the cultivation of the nearly unworked ground of Canadian Literature, leaving not that a real and permanent will tend to yield an abundant return for the labour expended in reclaiming it. He does not scruple to confess, that the flowers with which the literary garden will, for a time, be decked, will be principally culled and borrowed from the patentes of more productive climes; but, as such only will be selected as can be selected as readily acclimated, in our sterile soil, but that they will flourish as fully as in their native soil, while, by transplanting native herbs the germ of honorable emulation, they may assist in fostering into strength a growth of native flowers as rich and luxuriant as the most beautiful of their foreign rivals.

With this view, it is proposed to issue, monthly, a Magazine corresponding to the above title, containing the usual variety of poetry and prose, of tales and sketches, historical and fictional, with occasionally a mechanical or philosophical treatise, which, by blending instruction with amusement, will render the Magazine a fit companion for the study as well as the draw-room, for the latter of which, however, it is of course more particularly designed. The work will be printed on good paper, with beautiful new type, and in a style as it is possible to attain. The price is fixed at Three Dollars a year to city subscribers—postage being, as matter of course, added to those who favour us with orders from the country. The first number will be issued as soon as a sufficient number of subscribers have been obtained to guarantee a reimbursement of the funds expended in the mechanical part of the undertaking.

No payments will be expected before the appearance of the ninth number, between which period and the publication of the twelfth, it is cordially anticipated that all subscriptions will be cheerfully paid.

Should the hope of the publisher of the success of the undertaking be realized, it is intended to enlarge and beautify the work with Music, Engravings, &c., so as to render it unsurpassed by any American publication.

The Magazine will be printed and published by the undersigned, at Montreal, by whom all letters and orders, postage paid, will be attended to with gratitude and punctuality.

JOHN LOVELL.

Montreal, 18th June, 1838.

**MORISON'S UNIVERSAL MEDICINE.**

**NOTICE.**

THE subscribers, general Agents for Morison's Pills, have appointed WILLIAM WHITTYRE, Sub-Agent for the Upper Town, No. 27, St. John Street.

**LEGGE & Co.**

That the public may be able to form some idea of Morison's Pills for Great Consumption, the following calculation was made by Mr. WISS, Clerk to the Stamp Office, Bankers House, in a period of six years, (part only of the time that Morison's Pills have been before the public) the number of stamps delivered for that medicine amounted to five million, nine hundred, and one thousand.

The object in placing the foregoing before the public is to deduce therefrom the following powerful argument in favour of Mr. Morison's system, and to which the public attention is directed, namely, that it was only by trying an innocuous purgative medicine to such an extent that the truth of the Hygeian system could possibly have been established. It is clear that all the medical men in England, or the world, put together, have not tried a system of vegetable purgation to the extent and in manner prescribed by the Hygeia. How, therefore, can they (much as individually) know any thing about the extent of its properties.
