

CASE 10-20  
KEROSENE TRACTOR

## To Increase Crops Use A Case Tractor

During these critical times in our national life, we need more food. Crop production should be increased to the maximum. With the supply of farm labor greatly decreased, the only possible course left is the tractor. With constantly increasing prices of gasoline and then only a very limited supply, the wise farmer will purchase a Case 10-20 Kerosene Tractor.

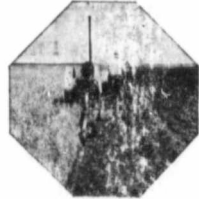

Case 10-20 Discing

Case 10-20 Harvesting

Case 10-20 Filling Silo

Case 10-20 Plowing

The motor of the 10-20 is a four cylinder vertical valve-in-head Case motor cast en-bloc, 4x6", 900 R. P. M. It successfully and efficiently operates on kerosene. Three wheel type with two drivers, a bull wheel 22" wide and a 10" auxiliary clutched in driver. Weights only 5080 lbs. All wheels travel on unplowed ground when plowing. Will not pack the ground. Rated at 10 horsepower on drawbar, tested and actually delivers 14.7 horsepower. Pulls 3 bottom 14" plows without side draft. Drives 20x36" Case thresher

fully equipped.

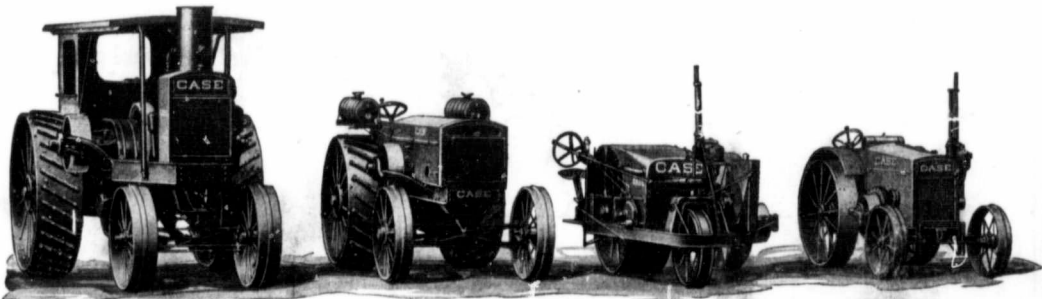

Also adapted for discing, silo filling, harvesting, feed grinding, hay baling, lime pulverizing, wood sawing and many other jobs. A practical all'round tractor for the average farm.

Besides the 10-20, we offer three other sizes of Case kerosene tractors, namely, a 9-18, 12-25 and 20-40. We furnish detailed literature free upon request. Learn all about Case tractors before you buy.
