

"Rapid-Easy" Grinders

are not built to cost us the **east money**, but to give our **customers the best satisfaction**. They do **more work** with same power than others; are built to stand **high speed**, and to, practically, **never wear out**. They do most work at **least cost of power**; do it **fast** and so **save wages**. You cannot afford to be without a **"Rapid-Easy"** or to use an **inferior machine**. The best is **none too good for you** in these days of strict economies.

"I was up to see Mr. Stockville's Grinder which he got a short time ago. He is pleased with it as it grinds **fast and easy**," G. S. SPOOKS, Cannington, Nov. 24th, 1904.

"I have had one of your No. 2, 10 inch plate, Grinders for several years. I use a **sway horse power**, generally with three teams, sometimes with four, and the horses are **mildly small**. The grinder is compact, simple and durable, **never gets out of order**, and is **light to drive**. I have a hopper over the grinder holding close on 25 bushels. With four teams, in **half an hour**, I easily grind the full of this of oats without turning a hair on the horses and **think I could do more**. It also grinds barley well. I grind it pretty fine. With three teams it does most satisfactory work." S. W. FODLATER, Lacombe, Alta., Oct. 30th, 1904.

"We have much pleasure in setting up for the No. 3 Rapid-Easy Grinder. We drive it on our new mill engine and grind 60 to 80 bushels per hour and grind it **fine**. We can recommend your machine to every intending purchaser."

H. HORTON and E. McCREADY, Landsdowne, Ont., Oct. 7th, 1904.

A Proof of Stability

Another proof of the stability of the cream separator business is found in the fact that the Empire Cream Separator Co. has found it advisable to incorporate a Canadian Company and will henceforth be known as "The Empire Cream Separator Company of Canada, Limited." The Empire has become within the last year and a half one of the best known separators on the Canadian market, and its largely increasing
