

## Sawing Wood For Less Than One Cent a Cord

And in stove-wood lengths at that. Think of it! It's hardly believable. Thousands of users of Ellis Engine Wood Saw Outfits have found from experience that for strength, rigidity, durability and power they are superior to all others, regardless of price.

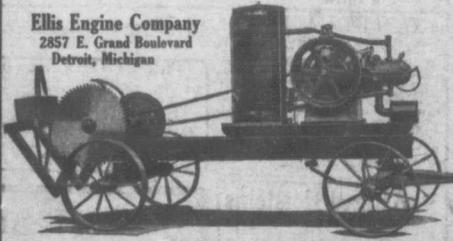

# ELLIS ENGINE

This Wood Saw Outfit can be had in either stationary or portable types, equipped with Ellis upright or horizontal engines.

Ellis Engines are strongest, simplest, most powerful engines made—only three working parts. No cranking, no excessive weight, no carbonizing, less vibration, easy to operate. 1 1/2 H. P. to 18 H. P.

Our booklet, "Engine Facts," descriptive of Ellis Engines and their many uses, sent free. Write for it.

## The "Bissell" has the capacity

Because of its capacity, time after time the "Bissell" Disk Harrow has done **DOUBLE THE WORK** in field competition against all competitors, under the same conditions.

The special shape of the "Bissell" plates causes them to enter the ground naturally and **TURN THE SOIL EASILY**. Steel scraper blades meet the plates clean of trash by the "Bissell" Disk.

Anti-friction balls (48) are used in the bearings, on every "Bissell" Disk.

The seat is placed back on the Harrow so that the weight of the driver when riding balances over the frame and **REMOVES NECK WEIGHT**. The hitch is well back, **MAKING LIGHT DRAUGHT**.

Search the Continent over and you will not find a Harrow with such cutting capacity, easy draught and correct proportions as the "Bissell." A postcard to Dept. R will bring you a free catalogue.

## PEERLESS PERFECTION

The Knot That Locks the Horse

The Fence That Always Keeps "Put"

Strong enough to keep your own live stock where they belong and your neighbor's out. The best way to build a horse, finishing it to keep to your advantage. The fence that "locks the horse," that "keeps put" is the

**Peerless Farm Fence**

Made of Open Mesh steel wire—heavily galvanized to such a thickness that it will not rust, kink or pull. The wires are long, elastic and springy and will not sag. Each wire has rubber shock or oval diamond shape. The joints are securely held with the Peerless Farm Fence. The fence is made of the strongest steel and stands well and it can be worked on the most difficult soil and under any conditions. We also build a full line of poultry pens, cranberry traps and gate. Agents wanted in every county. Write us for literature.
