CONTRACTOR'S HOIST

This Hoist is designed for use with our vertical engines and is intended for general contractor's use where a double platform elevator is employed, one platform descending as the other ascends. It is equipped with winch head on one side which can be used for elevating beams or other material that cannot be taken up on regular elevator. The drum sheave over which the elevator cable runs is placed on the other side of the hoist. This sheave and the winch head are interchangeable so that they can be placed on either side desired. Can be operated by steam, gasoline or electric power.

Climax Road Machine Co.
46 Merrick Street, Hamilton, Canada.
