Avery Farm Tractors

"There's a size Avery Tractor for every size Farm"

We are now in a position to offer our customers the famous AVERY line of Tractors, as demonstrated at Guelph, 1915, and at Whitby, 1916. AVERY Tractors are built to run on either gasoline or kerosene.

The AVERY 5-10 is the smallest tractor made. It will draw two 12-inch plows at a depth of 6 inches in ordinary stubble ground, or a 6-foot double disc harrow over plowed ground, or a 4-section, spike-tooth harrow over plowed ground. It will pull a grain drill, binder, drag or two loaded farm wagons. It will drive a 10-inch or 13-inch Lister Ensilage Cutter and Blower, a Lister Ideal Thresher, or a Lister 9 $\frac{3}{4}$ -inch Grinder.

The AVERY 8-16 stands in a class by itself. It will pull three 14-inch plows or four disc plows, drive a large silo filler or thresher. It is unequalled for general field, belt, hauling and road work.

Start Tractor Farming

Bigger Crops

Less Expense

Easier Work

Tractor farming pays. You can practice the best methods of farming with a tractor. Plow deep and do all your work at the right time to get the best results.

Plowing with an AVERY 5-10

Write to Dept. G for catalogues of Avery Tractors, Lister Engines, Milkers, Silos, Ensilage Cutters, Grain Grinders, Threshers, Electric Light Plants, Canuck Engines, Sprayers, Melotte Separators.
