'E's as scientific a man as stands in the ring to day, an' there ain't nobody can whip 'im that I knows hof. There's this much about his strength; he uses it just th' same as his science, and combines the two together, so that a man would 'ave to 'ave th' science of Billy Edwards and th' strength of half a doze men to meet him. The first seven rounds were neither scientific nor severe on the combatants, but the eighth showed that both men were plucky and hard hitters. In this round Kirwan was knocke ompletely off the platform, when he was picked up by some of his admirers and thrown on the stage again. Bittle was dragged out of his corner, and making a rush at his or nally knocking him into a chair, a senseles mass of humanity. While in this helpless condition Bittle attempted to strike his opponent, but was prevented by the spectators. A general row ensued, which was queiled with fficulty by several policemen, who were

orced to use their clubs freely. The public baths of Vienna, the Austrian capital, are said to be the finest in the world. The building is situated in the heart of the city, and encloses a basin 570 feet in length by 156 in width, and varying in depth to 12 feet. The enormous quantity of water cor tained in this basin is renewed thirty times a day. The basin is divided into five baths our with an average depth of 4 feet 6. fth and largest was the first erected (in 1875), costing \$30,000 alone, and is deeper than the others. The whole establishment has accommodations for 1.500 persons, and open fr m May 1 to October 31, from we in the morning until dusk. There is also a bath restricted to ladies, open from nine in the morning until one, and it is interesting to know that the Vienna ladies are exception ally good swimmers. On the establishment a large staff is retained, together with a sur-geon. The building altogether is a noble sample of architecture, while in the interior extending the entire structure are spacious tiers of gaileries. Throughout there are

several promenades, and on a level with the

water is a wide expanse of flooring capable of accommodating hundreds of bathers.

Items of Interest from the United

Kingdom, Mr. Parnell is actively promoting a com-

pany to further migration from the congested districts of Ireland. A pension of four thousand pounds has een granted to the ex-Speaker of the Imperial House of Commons and his heir. The Orangemen of Dublin have been sumnoned to oppose a Nationalist meeting anounced to be held at Londonderry on St. Patrick's day,

Mr. Henry Irving will, it is stated, be re-

quested to contest a constituency in the Liberal interest at the next general election n the Old Country. The first declaration of the Irish National League in opposition to Henry George's land scheme was made at a meeting in Cork on Sunday. The scheme was declared imprac-

veiled on Saturday morning in Westminster Abbey, in the presence of a distinguished as-semblage, among whom were two daughters members of all chades of politics the Govern-mens will introduce in the House of Com-mons a motion to amend the purchase clauses

Bradlaugh has sent a letter to Sir Stafford Northcote charging him with having violated the law in having had him excluded from the House of Commons. The act, Bradlaugh says, was mean and spiteful, and unworthy of an English gentleman.

Mr. Marriott, the Liberal member for Brighton, who so strongly denounced the Government's Egyptian policy during the debate on Sir Stafford Northcote's motion of censure, and resigned his seat to test his con stituents' opinions, has been re-elected by largely increased majority.

Mr. Thomas Sexton, M. P. for Sligo county, publishes letters from former Orangemen, whose names and addresses are given, show ing that the Orange organization is a secre ciety, revealing the mysteries of the cere mony of initiation, and explaining that the bjects of the society are purely anti-papist. Lord Leitrim's Murderers.

An Irishman named Nellis has surrendered to the Greenock police. He says he knows the murderers of Lord Leitrim. Nellis, the informer, states that the mur-derers of the Earl of Leitrim were Patrick McLaughlin, a travelling Fenian head centre Thomas Hunt, and Michael McGinn. He says he hear i McLaughlin confess that h shot Lord Leitrim. The murder was planned in London. The last he heard of McLaughin's movements was that he went to Duk

In proposing the bill for the extension of the franchise Mr. Gladstone said that to in-troduce separate franchise bills for England, troduce separate transmise bills for England, Ireland, and Scotland, with the prospect of carrying the English and Scotch bills and leaving the Irish bill to take its chances, would be altogether impracticable. The arguments in favour of a uniform bill were un-answerable. Nothing could induce him to abandon such a bill. A redistribution of the parliamentary constituencies must follow the reform of the franchise, but if the two questions were embodied in the same bill it would prove fatal to both. He entreated his supporters not to endanger the success of the bill

y proposing additions.
Mr. Gibson (Conservative) said the bill had been introduced for the sole purpose of diverting the attention of the country from affairs abroad. The Conservatives would o pose it vigorously. An extended franchise without redistribution would give the Nationalists ninety seats in Parliament and place stupendous power in their hands. The Parnellites and the Scotch members appear well pleased with the bill. The Eng ish Liberals are disposed to object to an extension of the franchise without a redistribu

afety of Suakim. Mr. Gladstone replied to strictures of Si Wilfrid Lawson. He justified the policy which the Government had been pursu and asserted that it was necessary to suakim for the present in order to keep down the slave trade. Sir Stafford Northcote said the lack of co-

herency in the Government's Egyptian policy caused the misfortunes in the Soudan. The Marquis of Hartington, Secretary of State for War, said the British would retire from Suakim as soon as it was compatible with the safety of that town. The motion for adjournment was rejecte by 105 to 103.

The Under-Colonial-Secretary stated that the Government recognized the Transvaal title to the South African Republic. (Cheers

by Liberals, and groans by Conservatives.) DYNAMITERS AT WORK.

A Number of Americans Plotting in Paris, The police in Paris are convinced that the advanced Irish party have made Paris their headquarters in Europe for the preparation of their dynamite schemes. Inspector Moser, acting under instructions from the British Home Secretary, is watching the movements of suspected Irshmen. The police have traced the arrival of five transfers, or men belonging to the active section of the dynamiters, who have been told off for the next attempts. One of them is from Buffalo N.Y., one from Paterson, N.J., one from Brooklyn, N.Y., and two from Texas. They are believed to be pupils of Mezeroff. The other Irishmen under watch are Cornelius Cullinore, Eugene Davis, and Casey.

THE DYNAMITE FACTORY. It is believed the dynamite is made at Montrouge. The supposed manufacturer is registered as an authorized chemical student, the measure under which the authorization necessary is confined to making dynamite. The instructor is believed to be a man named Brady, under the alias of 'King.' The Brotherhood meet in the Rue Corneille, Rue Saint Honoré, and Avenue Victor Hugo. THE NATIONALIST COLONY

Macafferty said the weak were justified in using terrorism against the strong. He sympathized, with the revolutionary propagandism in Europe because Ireland was benefited thereby, but

nationalism he contended was not necessary

nationalism he contended was not necessary, even amongst the most extreme, linked with Nibilism or anarchy.

A score of agents and French police have been engaged tracking the movements of certain suspicious persons. The suspects were traced from Havre to Paris, then to Brussels, and were lost sight of beyond Brussels. There is no evidence that dynamite supplies have been received through France. The London police have received information that explosive materials and infernal machines have been sent from America machines have been sent from America through Hamburg. The names and residences of the five "suspects" watched by the French officers are:—Michael Maurice, 640 Fulton street, Buffalo, N.Y.; Patrick Dillon, 171 Oliver street, Paterson, N.J.; John Liston and Richard Liston, Denison City, Texas, and Thomas Ryan, 127 Twenty-fifth street, Brooklyn, N.Y. The London police have received inform ation of a plot to blow up the new Law Courts with dynamita. It is reported that they have made many arrests and seized large quantities of dynamite, but great reticence is observed by the authorities on the subject. It is stated the Government have decided on sending a courteous despatch to the Government of the United States relative to the continuance and

assistance of dynamite schemes by American Two Irish-Americans who arrived from Southampton February 12th have been traced to the Waverley hotel, Portland street. They arrived February 20th, and left on the 25th. A portion of the value containing an internal machine found at Paddington station infernal machine found at laddington station has been discovered in the room. The authorities offer a research of £1,000 for

the detection of the authors of the recent dynamite outrages. The plies are confident they will capture the Irish-Americans who are suspected of being the perpetrators. Four railway companies offer an additional reward of one thousand pounds for their detection. The landlord of the Waverley hotel has identified the value seized at Charing Orose atation as one which a man took away from the hotel.

the hotel.

It is now almost certain that the dynamite outrages were the work of four men who arrived from America Fabruary 20th. Peter Jones, alias Burke, and Thos. Prominent Fenians of Paterson, N.J., say the object of the recent explosion in London was to kill the Prince of Wales. They had ntormation that the Prince was to leave Charing Cross or Victoria station at the time the explosion was arranged, and they pre pared for him at both stations. They say this is nothing to what will happen in a short time, and intimate that the Queen had better h-sitate about starting on a Continental tour. Dillon, one of the alleged suspects, is not in Paterson. W. H. Rodgers, maker of experi-mental machines in Brooklyn, states that everal months ago he made for a stranger nachine which ran by clock work. It would throw the hammer of three iron nipples made to hold percussion caps.

United States Farm Animals. WASHINGTON, Feb. 27.—The report of J. R. Dodge, statistican of the Agricultural Department, upon the numbers and values of farm animals in the Unifed States and the waces of farm labourers answers that the whole number of farm animals has increased since Parkeyser. 1882 since February, 1883, by about four million. The largest increase was in the number of sheep, and the increase in cattle is principally in the States west of the Mississippi. There has been an increase in the value of horses and leattle, but a decrease in the value of sheep and swine. The report shows that the value of farms and the wage of agricultural labour are greatest in those States where the industries are most diversified. The average price of farm labour for the whole United States shows \$18.58 a nonth, an increase of nearly forty per cent.

The session of the British Columbia Legislature, which closed on the 18th ult., was an important one. Among the subjects chiefly dealt with was the Chinese question. Three Acts were passed respecting this rapidly increasing section of the population, namely, one "to regulate the Chinese population of British Columnia," one "to prevent the immigration of Chinese," and one "to prevent Chinese from acquiring Crown lands." The session lasted seventy-seven days, and during that time thirty-two Acts were passed.
