Shortage of Ties Holds up Work on New Railway Line

Inability to procure sufficient supplies of railroad ties, or sleepers, is hampering numerous railroads in Canada and the United States. An ordinary tie costs \$1 while extra quality are worth 25 to 30 cents more, and are difficult to get at that price. Lumbermen say that the shortage will exist several years. During the great war the number of ties cut fell greatly. Last year there was an excessive demand for ties and the supply was soon absorbed. The scarcity of ties has stopped construction of the proposed electric road across northern Maine from Presque Isle to the border of the province of Quebec, more than one hundred miles. This road, backed largely by A. R. Gould, the original contractor for the Valley road, is designed to provide a short route between Quebec, Montreal and St. John.

It is probable that work will not be undertaken on the proposed line until next year.

Animal Diseases Eradication Board

At a meeting held in Toronto on Thursday, May 27th, the final steps were taken in the organization of a body to be known as the "Animal Diseases Eradication Board". As its name implies, this Board has for its object the formulation and carrying out of plans for controlling diseases of live stock in Canada, it being the intention to pay particular attention at this time to tuberculosis of live stock, a disease which contributes to a greater extent than is generally recognized, to the spread of tuberculosis in human beings, besides causing an enormous economic waste of food products by reason of the necessity for condemning, as unfit for human food, carcasses or portions of carcasses, of tuberculous animals.

The Board is composed of twelve members, four from the live stock associations, four from the meat packers, and four from the Federal Department of Agriculture, and the headquarters of the Board will be at Ottawa. Co-operation with Provincial Governments, Railways, Banks, Press and public health bodies will be sought.

At the Toronto meeting, an Executive Committee of three members one from each of the interests represented, was appointed to consider and make recommendations to the full Board with reference to the details of a plan of campaign for controlling this disease most effectively, the board outlines of the plan having been agreed upon by the Board. These details will deal with the methods for obtaining the necessary funds for the work, the executive organization, the areas to be covered, the methods by which the work can best be carried on and the administration of any fund that may be established for the purpose.

The objects in view will involve hearty co-operation between the packers, the live stock men, the Federal and Provincial Departments of Agriculture and the solid backing of all interested in the disease from the human as well as the live stock standpoints.

The preliminary meetings have indicated that there are good reasons to believe this co-operation will be secured. The plans are necessarily tentative but a great deal of progress has already been made, and after the representatives and the groups have had an opportunity to consult the executives and membership of the various associations it is expected that a full plan will be developed and details announced.

FROM DAVY JONES

Inventor Is Confident He Can Wrest Riches.

Simon Lake Is Man Who Claims He Has Devised Perfect Salvaging Submarine—Will Seek Gold Long Under Water.

With the waters of the Atlantic ocean swarming over his head, Simon Lake, submarine inventor, expects to excavate the bottom of Long Island sound, off Port Morris, N. Y., and try to salvage \$5,000,000 gold bullion from the treasure chests of the H. M. S. Huzzar. The treasure has nestled on the bottom for 119 years.

If Lake desires, he says, he will be able to smoke a cigar, sing a song and twang a ukulele on the bottom of the ocean while the treasure is being recovered with a new salvaging submarine machine which he has just perfected.

The story of the Huzzar and its buried gold is as romantic as any sea yarn ever spun by Jules Verne or Robert Louis Stevenson. It begins at a date when pirates roved the Atlantic, and promises to end with a submarine climax.

Chapter 1 shows the British warship Huzzar, launched about the year 1700, to the pop of a wine bottle. From this point the story carries the wind-jammer through the adventurous times when Captain Kidd might be found at any time hiding behind the next wave, and narrates her exploits as a utility vessel in the British navy.

The last trip of the proud Huzzar was when she started to the American colonies in 1780, carrying a cargo of golden wealth in her hold. In making the waters of the harbor, at a time when Hell Gate was not adequately charted, she struck a rock and stove a hole in her bottom. She tried to make shore, but didn't, and sank off Port Morris. The treasure, which was to have paid off the soldiers of the crown, sank with her.

Thirty years ago a company was organized on Staten Island to attempt the salvage of the Huzzar gold. The most accomplished diver of the day spent much time in the water. He succeeded in bringing up a hard oak rib of the ship and a few coins of little value, and then was forced to give up his efforts. The experiment cost the salvage company \$20,000.

The oaken rib of the good ship Huzzar was worn-eaten, but it was saved diagonally, and just enough good wood was recovered to make two canes. One of these canes is now in the possession of C. F. Lester of Brooklyn.

Just when Simon Lake will begin operations to salvage the Huzzar gold has not been made public.

Don't Let Him Sneak Up on You

Old Potato Bug doesn't blow a horn to let you know he's coming. But when your potato plants are attacked by these green leavers, you'll find out they're in and he's got you by the roots.

MUNRO'S PURE PARIS GREEN

It is the good old killer that always does the job right. Spray early and as often as required, and your Potato plants will be impervious to attack. Munro's Pure Paris Green is made to conform to Government standard. It is a fine, fluffy, rich green powder, which mixes evenly in water. Ask for it by name at all stores where garden supplies are sold.

HOW YOU CAN TELL GENUINE ASPIRIN

Only Tablets with "Bayer Cross" are Aspirin—No others!

There is only one Aspirin, that marked with the "Bayer Cross"—all other tablets are only acid imitations.

Genuine "Bayer Tablets of Aspirin" have been prescribed by physicians for almost twenty years and proved safe by millions for Pain, Headache, Neuralgia, Cold, Rheumatism, Lumbago, Neuritis.

Handy boxes of 12 tablets—also larger "Bayer" packages, can be had at any drug store. Made in Canada.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacturers of Monocrotinide of Salicylic Acid.

While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company, Ltd., will be stamped with their general trade mark, the "Bayer Cross."

Millions of Miles of Desert.

The great Sahara desert covers the major part of northern Africa, consisting of 2,500,000 square miles—an arid region as large as the whole of Europe. From 100 feet below sea level it rises in one instance to 8,000 feet above, and some of its elevations are covered with snow for three months of the year. Most of it, however, is a dry, sandy waste, dotted here and there with an oasis where drink may be secured. The winds are all very hot and dry, while rain is almost unknown.

The ostrich, camel, jackal, horned viper and numerous lizards are the principal animals of the region. Several varieties of hardy birds are also found. Arabs, Moors, Jews and negroes jostle each other on the caravan routes and the fierce-looking Arabs who bring their produce to the Egyptian markets are probably robbers and cutthroats in their desert home.

It is impossible for travelers to get off the road, as the caravan routes are bordered with the bones of countless camels which have fallen by the wayside during the thousands of years these trails have been traveled.

Hotel's Famous "Royal Suite."

On the wall of the so-called "royal suite" in the old Revere house, Boston, Mass., hung a decorated shield bearing the names of distinguished guests: Jenny Lind, 1850; Daniel Webster, 1850; prince of Wales, 1860; Patti, 1860; Parepa, 1865; Christine Nilsson, 1870; Grand Duke Alexis, 1871; King Kalakaua, 1875 and Emperor Dom Pedro, 1876. But, even if the hotel had remained in operation, the present prince of Wales, coming to Boston, would hardly have gone there for his temporary dwelling place. For a good many years the old hotel has stood as a survival, in a part of the city where distinguished travelers were no longer among the common sights; and now it goes out of business. But, in its time, it was proud of that "royal suite."

Centuries-Old Images Found.

Investigations by the Mexican government to find out who built the great pyramids at San Juan Teotihuacan, 27 miles from Mexico City, have brought to light two great granite heads of the ancient Mexican god of the sun, Quetzalcoatl.

These heads are almost perfect specimens, bearing all the symbolic markings.

The long-disputed point as to who erected the pyramids is, as yet, unsolved. These huge mounds, one to the sun and the other to the moon, the former being 70 ft. by 72 ft. at the base and 216 feet high, are generally attributed to a tribe that preceded the Toltecs, probably dating from about the sixth century.
