Why We Live Longer.

"When Goodyear discovered the vulcanizing process of treating rubber he added immeasurably to the world's health. About fifty million pairs of rubber boots and shoes are made, sold and worn in the United States every year. When you reflect that the most fruitful cause of colds—and all the dangerous and fatal diseases that colds lead to—is a pair of wet feet, it is easy to see that this enormous use of rubber footwear must have a very marked influence on the general standard of health. When Goodyear discovered how to make rubbers, human longevity took a great bound forward."—Popular Science.
