BUICK THIRD MEMBER.

Buick cars drive through a third member, not the springs. The springs only support the body and assure easy riding. A Buick rear spring accidentally broken, causes misalign the axle and prevent driving the car. The Buick axle remains in fixed position. Consequently the adjustment of Buick four 1 wheel brakes is not affected by the deflection of the springs.

Only two other American cars have this excellent type of rear axle, one costs around Four Thousand Dollars, the other is the highest priced car built in America.

Our Own

WHY OH WHY?

Not a Cross Word Puzzle, neither is it an April Fool Question.

What we want to know is—Why do some of the Housekeepers in St. John's buy high priced imported cake when they can get a very good Raisin or Ginger Cake weighing 1/4 lb. each for the small sum of 5c.

Practically all the grocery stores in St. John's are supplied daily by us with these cakes. We would suggest that you give them a trial and be convinced of their most excellent quality.

"Popular Business Manager

Narrowly Escaped Drowning."

Yesterday's Telegram reported a near drowning accident to a popular visiting-business manager.

Only a few days before, this Company issued him our best Pilot Accident Contract in a substantial amount, and he certainly very little expected to be so close to a possible tragedy.

But—Who knows, WHEN or WHERE or HOW? When the cost of accident insurance is trifling, who wants to be without it? \$7,500 Principal Sum, and \$25.00 Weekly Benefit, only \$25.00 yearly.
