Town and County News

REMEMBER THE Open Temple meeting to-night in the Good Templars' Hall.

We are promised higher temperature and diminishing winds by the Washington Weather Bureau.

WESLEYAN CHURCH.—Special services have been held in the Wesleyan Church during the past few weeks, and have been quite successful. Forty-three persons were received on trial on Monday night, and it is likely that the number will be considerably increased. The meetings have been largely attended, and a marked seriousness has pervaded the entire congregation, which seems to increase as the work goes on.

CURLING.—A friendly game was played between two picked rinks from Fergus and two from Guelph on Monday afternoon at the Guelph rink. Fergus was beaten by ten points. The ice was in good condition. Score as follows:—GUELPH.

SERMONS were preached in the Wesleyan Methodist Church, Elora, on Sabbath last, by Rev. Dr. Fowler, of Fergus, and Rev. William Hayhurst, of Glenora. On Monday evening a tea meeting was held. There were about 300 persons present. After tea the chairman, Mr. Joseph Carder, said the debt on the church was \$1,000; towards this the trustees had on hand about \$200, leaving \$800 to be raised yet. He had a scheme to raise it by subscription as follows:—\$ to subscribe \$50 each, 8 \$25 each, 15 \$10 each, and 10 \$5 each. The choir sang several pieces under the leadership of Mr. Wm. Price. The proceeds came to \$51.50. Mr. Carder has received subscriptions enough to wipe off the debt on the church.

SCHOOL BOARD.

The usual fortnightly meeting of the School Board was held on Monday night. Mr. Newton in the chair. Present also: Messrs. Kennedy, Harvey, Knowles, Inglis, Murtion, Bell, Raymond, Stevenson.

An account for glazing from Mr. Stannard was received and referred to the Finance committee.

The report of the School Management Committee was read by Mr. Stevenson. It recommended that the resignation of Miss McTaggart be accepted, and that a successor be advertised for; that Mr. Cullen's action in dismissing a pupil be sustained, but that the boy be re-admitted on promise of future good behavior; that Mr. Brunner's resignation be not accepted, as it will be difficult to find a successor, and it would be unjust to the 117 parents who had purchased French and German books to deprive their children of a teacher of languages; that the seats in Mr. Simpson's school be adjusted; that the Head-master have charge of advanced pupils at the High School, and that Mr. Simpson, as assistant teacher of the High School, should teach in the South Ward school-house the less advanced pupils of the High School and those formerly taught by Mr. Cooley; that an assistant be provided for Mr. Simpson at a salary of \$400, and that his department be under the supervision of the Head-master of the High School; that Mr. Brunner continue to devote his entire time to the pupils in the several schools who are studying French and German.

Considerable discussion ensued upon the report, and there was some brisk argument between Messrs. Stevenson and Harvey in reference to the proposed changes in the High School, the former approving and the latter condemning them. Disatisfaction was expressed with the routine at the High School, and Mr. Inglis expressed a decided opinion that the school would be much better without a Government grant, because the method of teaching could be greatly simplified if it were not hampered with Government restrictions.

On motion of Messrs. Harvey and Kennedy, put as an amendment, the report was adopted with the exception of that portion relating to the High School changes, which was left over until the Inspector's report was received.

Mr. Knowles stated that Mr. Bridges, one of the caretakers, had been taken suddenly ill, and that the committee had therefore to procure temporary assistance.

The Secretary stated that two of the pupils passed for entrance to the High School by the provisional Board of Examiners had been disallowed by the examiners at Toronto, thus reducing the number of passed pupils from eleven to nine.

The Board adjourned.

The Claimant Not Roger.

His Brother Confesses.

The Duke and Duchess.

Going Round The World

Sioux in War Paint.

London, March 9.—The Count de Chambord has had a slight attack of apoplexy. The Telegraph publishes a despatch from Berlin, stating that the condition of Emperor William's health is such as to cause disquietude.

'Snow is falling to-day in the southern part of England.

A despatch received at the War Office from Gen. Wolsley, says no means were left untried to effect a peaceable solution of the campaign. The king's salute was not touched till the last hour, and the troops left Coomassie without an article of plunder. Of the thirty-four officers first sent out from England to organize the expedition, four are killed, three died of fever and seven are wounded.

The rains have commenced, and the marshes are swollen, thereby impeding the homeward march of the troops.

Dr. Kenely, counsel for the Tichborne claimant, has published a card protesting against the language of the press and the conduct of the Court towards his client. He protests particularly against what he styles the one-sided use of power of committal for contempt, which he declares is unconstitutional, and a revival of Star Chamber proceedings. In conclusion, Dr. Kenely says the prosecution has succeeded in destroying the claimant, and now seeks to ruin his counsel. Charles Orton has made a confession, which is published in the London Globe, that the claimant is his brother.

London, March 10.—The Government will not proclaim next Thursday—the day appointed for the entry of the Duke and Duchess of Edinburgh into the city—a holiday, but elaborate preparations are making to decorate the route of the procession. Extensive pavilions, richly ornamented, are to be erected on Regent Street. Eight thousand soldiers and eight hundred sailors and marines have been detailed to line the streets through which their Royal Highnesses are to pass.

A jute spinning mill at Dundee was destroyed by fire last night. The glare of the conflagration alarmed the whole city, and a crowd of twenty thousand people surrounded the burning edifice. The loss is estimated at \$100,000, and seven hundred hands are thrown out of employment.

Prince Frederick Charles of Prussia will make a tour around the world next summer. He goes eastward through Russia, Siberia and Japan, lands at South America, traverses the United States and returns to Berlin by way of London.

Vienna, March 10.—The Hungarian Ministry has resigned and the Emperor has accepted its resignation.

Berlin, March 9.—The arrest of the Bishop of Treves last week caused much excitement among the Catholic population. It was followed to-day by the forcible closing of the seminary attached to the Bishop's see, in accordance with the decrees of the Courts. A riot ensued, which threatened to become serious, and the troops had to be called to the assistance of the authorities.

New York, March 9.—Disturbing rumors come from Omaha to-night of Sioux in war paint being within twenty miles of Fort Laramie on Saturday night, and runners from hostile camps endeavoring to trade for ammunition at the agency near Fort Sully. Hon. F. H. Smith, Bishop Hare, and Rev. Mr. Herman leave Fort Laramie to-morrow for Red Cloud and White Stone agency.

CLEVELAND.—A Mr. McQuarley very neatly saved his watch from street thieves in London the Less on Friday night. He was stopped by three thieves, but theygot nothing for their trouble. He had no money; and on approaching the men, he coolly slipped his watch and chain down the inside of his pants (it) his stocking, and by this means saved it.

SAD CASE.—A lovely little boy, between 3 and 4 years of age, son of Mr. A. D. McLean, of Osprey, was accidentally poisoned on the 22nd ult. The child drank some liquid dye, without being aware of the deadly nature of the draught. Medical aid was procured, but the poor child soon sank into unconsciousness from which he never roused.

MORE CANADIAN BEEF FOR GREAT BRITAIN.—The Ottawa Free Press is told that another butcher has sent home to Belfast a second consignment of beef, encouraged by the success the first one sent met with. It seems that Canadian meat is well appreciated in that country, where home-fed stuff is at present selling at very high prices.

STEALING excavators' tools is amongst the meanest and most unprofitable of thefts. Yet some rascals in Toronto recently broke open a shed and appropriated the picks, shovels, etc., belonging to a number of men who were engaged in sewerage on Great St. George's-st.

THE Ottawa Free Press understands that all Sessional Clerks and Messengers have been notified by circular not to come to Ottawa with the expectation of resuming their duties until they are notified that their services are required. A very considerable "slaughter of the innocents" is evidently in contemplation.

MR. WALTER HALL, an old gentleman, who lived on the 14th con. of Calross, died suddenly on Sunday evening.

Interesting Letter from Manitoba.

The following interesting letter was lately received by Mr. Wm. Taylor, of this town, from Mr. James Glover, who left Guelph last summer for Manitoba. It contains much information, gathered from Mr. Glover's short residence in the Province, and the result of careful observation:—

Winnipeg, Manitoba, Jan. 25, 1874.

DEAR SIR,—I dare say you will be thinking by this time that as I have not written to you before now I must be frozen into an icicle. I am very happy in being able to inform you such is not the case, and so far I have neither seen nor felt anything to make me afraid that such is likely to occur. The winter set in about the 23rd of October, a month earlier than usual, (so say both old and new settlers.) During the month of November there were some sharp days. December was very mild and pleasant, and in this month there have been a few sharp mornings, with the thermometer down to about 30° and 32° below zero. I think I see you shrug your shoulders, but don't, as I am sure in saying that you have felt it colder in Guelph with the thermometer 2° or 3° below zero. At least I think I have, and had it not been for those dumb tests of the temperature hanging on the wall, I would not have thought it so cold as they indicated, and am beginning to think they would tell lies if they could speak. The snow-fall here is very light. The sun shines out bright and warm nearly every day, which makes it much more pleasant than in Ontario, where the snow fall is so great, and the atmosphere so thick that the sun's rays scarcely pierce through to cheer and warm people. In Guelph you very seldom see a frame house put up in winter. In Winnipeg they are going up all the time, not in such numbers as during summer, but they are going up. The prairie chicken, the crow, the hawk, the woodpecker, and some other small birds stay here all winter. These are facts sufficient to prove that the winter is pleasant without say more about it on my part to persuade you that it is so. At the same time I must say that so far as the winter has gone I do think it more pleasant than any I have seen in Ontario.

With regard to the country I cannot say a great deal from personal observation. One I have only been out in one direction—south-west 70 miles. There were seven other with me. We found plenty of good land, plenty of timber, (oak), good hay meadows, with the hay standing nearly five feet high. Some of us thought the Township was, and would be, out of the way of railway communication for many years, and did not make any selections. Others thought it the very place for them, and have taken up several lots. I have not taken up any yet, but intend doing so if spared till spring. One old Scotchman who has been here for fifty years said that they were very ready to complain if they had only fifteen bushels of wheat from the one sown, and that he once saw a yield of fifty bushels from one of seed.

Still, all who come here are not satisfied. One old Scotchman who has been here for fifty years said that they were very ready to complain if they had only fifteen bushels of wheat from the one sown, and that he once saw a yield of fifty bushels from one of seed.

All who come here are not satisfied. One old Scotchman who has been here for fifty years said that they were very ready to complain if they had only fifteen bushels of wheat from the one sown, and that he once saw a yield of fifty bushels from one of seed.

Provisions of all kinds are very high at present, and will be till after the opening of navigation, when the Yankee traders will come down the Red River from Minnesota with provisions and merchandise of almost every description, and then down come prices. At present flour sells at \$4.50 per 98 lbs.; beef, 14c. to 18c. per lb.; butter, 30c. to 37c. per lb.; pork, 18c. to 20c. per lb.; eggs, 30c. to 35c. per doz.; Labrador herrings, 50c. per doz.; coal oil, 80c. per gal.; brooms, 50c. each; rails, two hoops, 50c. each; apples, 40c. each; pears, 50c. each; soap, 60c. per bar, and not large at that; and if two persons meet and want a "wee drap o' the cratur" they must pay a quarter dollar. No 5c. drinks here. House rents are very high, but it is not because houses are scarce. There are a great many empty houses in Winnipeg. A great many people here have very lofty expectations, and think that Winnipeg is to become the centre of creation, and that in three or four years it will outstrip Chicago.

During summer and fall wages were good. Carpenters, rough and smooth, got \$2.75 to \$3 per day; masons and bricklayers about the same; and laborers, \$2 per day, and plenty of work. At present things are a little flat, but there are stirring times expected next summer with railway and public works, &c. Mr. Livingstone, from Elora, has started in the mill and distillery business here, and Mr. Ross, from Elora, is going to build a very large distillery within sight of my window, and has a little flat, but there are stirring times expected next summer with railway and public works, &c.
