

The MASON Reducing Valve

For Steam,
Water or Air.

Is designed to reduce and maintain an even pressure regardless of changes in the initial pressure.

It will automatically reduce boiler pressure for steam heating coils, dry rooms, paper making machinery, slashers, dye kettles, and all places where it is desirable to use a lower pressure than that of the boiler. Any low pressure desired may be obtained by simply turning a key.

They are Reliable and Accurate.

A Standard Device for 20 years
