

usually complete observations on the spring migration of birds in the district were made and recorded, also anomalies, rareties and irregularities in the air forms of the vicinity considered. Further progress was made in the revision of the published air-faunal list of the Ottawa district, with a view of augmenting and correcting it to date. As a none too common occurrence in the bird world of the vicinity may be mentioned the unusual migration of the Goshawk (*Accipiter atricapillus*) noted last October and November.

THE LIBRARY.

In accordance with the report of the Library Committee adopted at the last annual meeting, the bound volumes and the exchanges were transferred from the Normal School to the Carnegie Library. All exchanges received during the past year are now stored in the Normal School. Many of these are of a technical nature, but the Club receives a number of publications which are of a more popular character, including:

1. The Nature Study Review.
2. The Journal of Geography.
3. The Auk.
4. The Canadian Entomologist.
5. The Wilson Bulletin.
6. The Ohio Naturalist.
7. Le Naturaliste Canadien.

Under present conditions no use is made of these by the members.

In addition to its periodical exchanges, the Club has received numerous government reports from Washington and Ottawa, and the following bound volumes have been placed on the shelves:

1. Anatomical Nomenclature, Dr. Barker, Prof. of Medicine, Johns Hopkins University.
2. A Loose-Leaf System of Laboratory Notes, Theo. Scheffer, Kansas State Agricultural College.
3. Annual Report of the Smithsonian Institute.
4. Report of the Wellcome Research Laboratories at the Gordon Memorial College, Khartoum.

A Summer School of Science under the direction of Mr. J. H. Putman, gave a three weeks' course for teachers in July. Several members of the Club delivered lectures at the Normal School and aided in the field work. Mr. Putman gave a course in Botany, Mr. Attwood one in Mineralogy, and Mr. Sullivan took charge of the field work. Dr. Fletcher gave two lectures on Birds, and two on Insects. The leaders of the Club also contribute very largely to the lecture programmes of various societies in the city.
