CURRENT TRADE CONDITIONS. ONTARIO.

The situation in Ontario as regards white pine cannot truly be said to be improving. The trade which should reasonably be expected at this season of the year is materializing only in a small de gree, while the number of eager purchasers of lumber are few. A large portion of the stock which is now being shipped was contracted for last fall or during the early winter. The orders now being placed are for small lots, indicating a decided apathy on the part of purchasers to secure stocks beyond those for immediate wants. Nevertheless, it must not be considered that no favorable prospects exist for spring trade, as inquiries are being received which, it is believed, will develop into actual business at a later date. Allowance must also be made for the unseasonable weather which prevailed during the past week, by which communication with the commercial centres was shut off for several days. The report from the Ottawa valley states that limited orders are being placed for the United States market. The hardwood trade shows a slight improvement over that of pine, there being a greater local demand from consuming industries, as well as some call from the American market. In each line some inquiry is noted. Lumbermen are gradually closing operations in the woods, and many of the camps have already broken up. Anxiety now exists as to when the drive will commence, which, it is generally believed, will be at an early date.

QUEBEC AND NEW BRUNSWICK.

The markets for New Brunswick lumber continue in good shape. The shipments to the United States have increased slightly within the past week, while an average quantity of lumber has gone forward to the English market. The prospect for getting the logs out is improving, and reports from various sections are quite encouraging. Advices from Quebec state that the demand for square timber for England is improving, and promises a largely increased business during the present year. Quebec houses are said to be feeling the influence of the improvement. Some sales are also reported of cedar, shingles and sleepers.

BRITISH COLUMBIA AND MANITOBA.

The demand for export lumber continues to be of a satisfactory character, and shipments are going forward regularly. The Central Lumber Combine has gone into operation, by which the price of lumber has been advanced \$1 per thousand feet.
