It is being contemplated to establish
an electric tramway between Atami and
Odawara, Japan.

Electricity is to be used in the manufac-
ture of bleaching powders, the amperage
to be equal to affording sufficient heat to
decompose common salt from which chlor-
ine is obtained. Starch of the lower
qualities can be bleached by electricity.

According to the Annales Techniques, a
gigantic microscope is being constructed
in Munich for the Chicago Exposition. It
has a magnifying power of 11,000 diame-
ters, but this can be increased to 16,000
by means of an electric light, the image in
this case being thrown on a screen.

A scientist who has investigated the
matter states that the men who are em-
ployed in the Paris sewers are as healthy
as the average person, and no other 800
men in that city are so free from zymo-
tic diseases.

The exhibit of fine woods made at the
World's Fair by West Virginia in the

splendid specimens, finely polished and

special characteristics and qualities of all
growths and varieties to the best ad-

HAVE YOU HEADACHE?

Headache, which is usually a symptom
of stomach trouble, constipation or liver
complaint can be entirely cured by B. B. B.
(Burdock Blood Bitters) because this medi-
cine acts upon and regulates the stomach,
liver, bowels and blood.

Scientists say that if the bed of the
Pacific could be seen it would disclose to
view several mountains, with truncated
tops scattered over it. These mountains
would be perfectly bare at their bases, and
all around their tops they would be cover-
ed with beautiful vegetation of coral
polyp.

The blue grotto, on the Island of Ca-
pri, in the Bay of Naples, is absolutely
unrivaled for the vivid splendor of its
colours. Owing to the peculiar nature of
the refraction of the sunlight on its wat-
ers, wall, roof and sea are tinged a beauti-
ful ultramarine, which shades into a deep
violet in the furthest recesses of the
cavern.

The first despatches by the electric tele-
graph in France were sent May 18, 1845,
from Paris to Rouen. On the 31st of De-
cember, 1851, the submarine cable from
Calais to Dover was inaugurated. The
number of despatches sent in 1851 was
9,014. In 1864 the rate between differ-
ent points in Paris was lowered from one
franc to 50 centimes, with the wonderful
result of an increase of despatches from
577 to 11,250 in one month. The last sta-
tistics of the French bureau for one year
gives 26,084,742 inland and 5,318,265 in-
ternational telegrams.

The Children's Enemy.

Scrofula often shows itself in early life
and is characterized by swellings, absces-
ses, hip diseases, etc. Consumption is
scrofula of the lungs. In this class of
disease Scott's Emulsion is unquestionably
the most reliable medicine.

According to an old legend the baby's
dimples mark the spots where angels'
fingers touched the child in bearing it
from heaven to earth, but unromantic
doctors have a different explanation.
They say that dimples probably result
from defective development of a muscle.
When the muscle is called into use the
defective portion fails to respond and a
hollow is left, into which the flesh and
skin of the cheek, for example, fall, and
thus the dimple is formed.
