

ute, and other grain accordingly, without waste. There were several other machines introduced here last year, but all those who saw the Climax at work declared that hereafter they would employ no other. I might add a great deal more but I deem it unnecessary, as all confess that the Climax Double Cylinder Threshing Machine beats the world.

Yours truly,

P. E. WARD.

BAYFIELD, Co. HURON, Sept. 19, 1872.

MESSRS GLASGOW, MACPHERSON & Co.

GENTLEMEN,—The Climax Machine purchased from you this season has given entire satisfaction. The Double Cylinder is a decided improvement. It separates the grain from the straw perfectly. It threshes long damp grain better than the single cylinder machines, and is not near so liable to choke. It will thresh peas faster and better than any other machine we ever saw. It runs easy on horses, and there is no trouble in keeping up speed. If threshers only knew the superiority of the Climax no other could be sold.

ROBT. RUSSELL.
JOHN WESTON.

Plympton, Feb. 20, 1872.

MESSRS. MACPHERSON, GLASGOW & Co., Fingal.

DEAR SIRs,—The Climax Threshing Machine I bought from you last fall works to perfection. It threshes fast, wastes no grain, and cleans it fit for market. The double speed on your horse-power is a great improvement. If threshers knew the benefit of these they would have no other.

Yours truly,

JAMES THOMPSON.

VIBRATOR THRESHING MACHINES.

LONDON TOWNSHIP, Feb. 7, 1872.

MESSRS. MACPHERSON, GLASGOW & Co., Fingal.

GENTS,—This is to certify that your Vibrator Threshing Machine performed the most satisfactory work for me of any machine I ever had on my farm.

Yours very truly,

WALTER BROWN.

WHO CAN BEAT THIS?

CLINTON, Dec. 8, 1871.

MESSRS. GLASGOW, MACPHERSON & Co., Clinton.

GENTLEMEN,—This is to certify that I have threshed with a Climax Threshing Machine, bought of Glasgow, Macpherson & Co., Clinton, 1,188 bushels of grain in eight hours. There were 900 bushels of oats and 288 bushels of barley. This
