

ENGLISH CADETS LEAD IN SHOOTING CONTEST

ONTARIO GOVT.'S AGRICULTURE EXHIBIT A STRIKING DISPLAY

Is Situated Beneath Dome of New Government Building and Represents Highest Achievements of 200 Farming Societies of the Province—Grain Samples, Standing Crops, Vegetables, Roots of All Kinds Are of Highest Quality Ever Shown in Canada.

Occupying almost the entire central section of the new government building at the Exhibition is the wonderful and varied exhibit of agricultural products of the Province of Ontario. This comprises exhibits from the department of agriculture, the Ontario Agricultural College at Guelph, the great lighting dome is set up a huge octagonal pyramid about forty feet in height and with a base of 35 feet diameter, about which are arranged striking displays of fruits, grain and vegetables. The whole is crowned with a great shaft of ripe wheat, eight feet in diameter. Glass globes displaying the quality of the various descriptions of grain are arranged upon the tiers of this pyramid together with alternating stalks and sheaves of grain. The sides of the pyramid are dressed with samples of fruits, roots, vegetables and flowers. All of these exhibits are entered as contestants in the prize competition and represent the highest achievements of 200 agricultural societies covering the entire province. The five highest awards in each local field competition were alone allowed to enter in this great competition at the fair.

Shown upon the pyramid there is also a quantity of vegetables entered by the Ontario Vegetable Growers' Association. Vegetables and roots of every description are here shown at their best. The arrangement of the pyramid was made under the supervision of J. Lockie Wilson, superintendent of agricultural and horticultural societies. The grain samples and in effect are of the highest quality ever shown in Canada and come from sections covering the province from end to end. The pyramids will meet the eye in all the great fair grounds, where one scarcely knows what to look at. The exhibit features of interest crowd upon the distracted gaze. But it is more than this, for while in shape it might be said to represent a cornucopia of the province, it does in very fact show forth the great abundance of the land from which the various exhibits are taken. No greater indication of the great and growing prosperity of this central province of a fruitful dominion could be shown. The prizes which will be awarded by the Vegetable Growers' Association and the grain is entered in the field crop competition. Numerous awards have been passed the stringent eliminating rules that the exhibit had to be accommodated upon two smaller pyramids which are decked with a similar display and add to the beauty of the whole.

Fine Show of Fruit.
Upon the depressed sections of an octagonal stand and reflected from mirrors artfully arranged in the centre and surrounded by a tasteful collection of palms and ferns is set out the fruit division of the department of agriculture. This big stand is 28 feet in diameter and the exhibit which displays of boxed fruit, apples, peaches and plums. Essex County occupies the adjacent stall and here is shown a display of seed corn for ensilage purposes. Essex has a reputation for this product and supplies much of Eastern Ontario with a splendid quality of seed corn. There are also peaches from this county of good size and color. An interesting feature of this booth is a sample of the tobacco grown in Essex with the living plants growing in jars. The whole is surmounted with a three-foot cob of corn carved in wood.

In looking over the exhibit one is struck with the great variety shown

in this agricultural display. Prone to regard Ontario as belonging to the north one wonders to see so luxurious a growth of products which one had hitherto considered as reaching their highest development only under more southern skies. When one has covered this exhibit one learns that there are few things agriculturally worth while which cannot be grown in some section of this fruitful province.

O. A. C. Has Fine Display.

Passing to the western end of the hall one comes to the exhibit of the Ontario Agricultural College at Guelph. Here again the several departments of this great school for the tillers of the soil have a great variety of subjects to exhibit, by way of the agricultural products themselves, the science which they seek to teach. The department of field husbandry has decorated the west wall with sheaves of grain arranged attractively in circles and with samples of grain in bottles. The varieties of grain which have given the highest yields at the college and are ascertained by co-operative experiment conducted over the province are the O. A. C. Number 72 oats, selection of the Siberian variety, and the O. A. C. Number 21 barley, a selection of the Mandeschur barley, and are represented here together with a great many other prominent varieties. In the centre of this exhibit the different dates of seeding grain are illustrated in glass tubes. Spring wheat followed by barley, oats and peas is the order in which they are shown. A display of the principal grasses and other fodder plants is also on view.

In the botanical section will be seen weeds and weed seeds as well as illustrations of the various forms of fungi growth. The department of entomology has an extensive display of injurious and beneficial insects for the amusement of the rural industry of the province. In the centre of the college exhibit is a striking bronze trophy representing a bronze horn of plenty, the proud possession of the college, having been won in open competition at the Chicago Stock Show in three successive years. The horticultural department shows many new tools now used in this branch of agriculture, together with some of the principal products of the vegetable and fruit. In the department of physics are shown the different makes of tile and comparative values of the various materials used by the farmers, and anyone calling at the booth will receive courteous and intelligent instruction in this most necessary branch of farm building.

The chemical department set out a display of stock foods and commercial fertilizers showing their comparative values, while in the bacteriological department are seen illustrations of the many diseases common to farm stock. The poultry department shows methods of preserving eggs and various foods for fowl with models of poultry houses and methods of egg-testing.

Northern and Western Ontario.
Four exhibits are shown illustrating the great potentialities and resources of Timiskaming, Algoma, Thunder Bay and Rainy River districts, and Manitoulin Island. Here is demonstrated beyond question that these sections have great agricultural possibilities, and have already gone far in fruitful cultivation. It is to be considered that the harvest in these northern sections is some weeks later than that in the more southerly parts of the province, therefore it has been impossible to give an adequate idea of the actual harvest results, and the exhibit shows at a splendid point of development. Peas, too, do remarkably well in the north, as they do in the south, and are shown comparatively free from pestilential

ONTARIO FARMERS WILL REVIEW PRIZE WINNING CATTLE TODAY

Today's Program Farmers' Day

8.00 a.m.—Gates open.
8.00 a.m.—Buildings open.
9.00 a.m.—Dog show opens.
10.00 a.m.—Butter making competition.
11.00 a.m.—12.00 a.m.—Besses o' th' Barn Band.
11.00 a.m.—12.30 p.m.—Scotts Guards' Band.
1.30 to 2.30 p.m.—Besses o' th' Barn Band.
2.00 p.m.—Motor boat races.
2.00 p.m.—Grand stand performance.
2.00 p.m.—Judging tandems and punters.
2.30 p.m.—Imperial cadet competitions—drill, England No. 1, British Columbia Australia.
Marching, Manitoba, England No. 1, Toronto Collegiate Institute.
3.00 p.m.—Japanese fireworks.
3.00 p.m.—Grand review of prize-winning cattle in some section of this fruitful province.
4.00 to 5.00 p.m.—Scotts Guards' Band.
7.00 p.m.—Grand stand performance.
8.00 to 10.00 p.m.—Besses o' th' Barn Band.
8.45 p.m.—Cadez tattoo.
9.00 p.m.—Living flag.
9.20 p.m.—Musical ride.
9.30 p.m.—Siege of Delhi.
9.45 p.m.—Eruption of Mount Vesuvius.
10.00 p.m.—Imperial fireworks.

tracts, the destructive pea weevil being practically unknown in these parts. All of these sections have wide and fruitful stretches of arable land, and in the stage of development which has now been reached, the farmer finds a close and easily accessible market where the fruits of his labor will bring him prices equal to those in the older section of the province.

Scattered thru these districts and reached by roads which are yearly being bettered by government aid are centres of population which create a sufficient demand to keep up the heart of the farmer, and the prices of his crops. In and about Saint Ste Marie, and in sections touched upon by the lumbering men and mines, it is a veritable heaven for the market gardener and vegetable grower. Stock-raising, both for the dairy and the slaughter, is found to be a lucrative branch of the industry.

All in all, it would be difficult to conceive of any exhibit which could more thoroughly and convincingly drive home to even the most casual observer that only opportunities and immediate prospects of the Province of Ontario can surpass its already marvelous achievements.

Exhibition Notices.

CIVIC IMPROVEMENT AS A BUSINESS PROPOSITION.

Large Corporation Believes in Helping Its Employees.

Exhibition visitors should make a point of seeing the illustrated lecture given by The National Cash Register Company, which traces the growth and development of the cash register, business and brings out many interesting facts in connection with its early history.

This company is spoken of as having one of the model manufacturing institutions of the world, and the methods pursued by it in reaching its present magnitude should be of interest to every business man and manufacturer in this city.

The company frankly states that the welfare work (by which it has become known the world over) was necessitated because the closest kind of co-operation between labor and capital was necessary. In this instance, in order to produce a perfect mechanism. Probably no other institution in the world has developed welfare work and made it pay both employer and employee as has been done by the N. C. R. Company.

Just how they were enabled to do this will be explained by beautiful slides and Kinetoscope motion pictures. Not only will the lecture be of special interest to business men, but also to women, because it deals with landscape gardening, civic improvement, boy gardens—subjects of vital interest to every woman.

The lecture is given hourly, free and

SPEED SHIPS IN EXHIBITION CONTESTS MADE FAST TIME

Heloise, Local 7,000 Hydroplane, Goes 36 Mi's an Hour and Easily Defeats American Boat, Reliance IV—Close and Exciting Finish to Ten-mile Motor Boat Race.

Twice yesterday did Heloise, W. H. Gooden's hydroplane, win over the American invader, Reliance IV. The 3,000 ft. hydroplane, the second in a series of three, the local aqua plane, took the lead in the 10-mile race, the Reliance boat made it in 1:30.4.5. Gooden's flyer had the best of it even on the start, getting away a half a length ahead. It made nearly 36 miles an hour. The world's record is 38.

In the 10-mile handicap for Class A boats, Heloise, W. H. Gooden's, was the fastest speed ship around these parts, and a few visitors, Heloise had the best of it, almost 10 minutes. It would be almost impossible to get a better comparison of the two boats. The handicapping was exceedingly accurate, and the thousands of spectators who came to see the race, the crowd of the sputtering engines as the million-horsepower engines leaped up the mile-long homestretch.

Came in Together.
The finish was beautifully close, but the most exciting was the pair of hydroplanes. Around the last buoy that Heloise won the race. With the Heloise tearing close after it the American boat, Reliance IV, was struggling to keep up. The Heloise was making without danger of capsizing.

But even the few seconds' advantage the Reliance secured was not enough. Heloise, W. H. Gooden's, was the fastest speed ship around these parts, and a few visitors, Heloise had the best of it, almost 10 minutes. It would be almost impossible to get a better comparison of the two boats. The handicapping was exceedingly accurate, and the thousands of spectators who came to see the race, the crowd of the sputtering engines as the million-horsepower engines leaped up the mile-long homestretch.

Finished Too Soon.

R. McLaughlin's Eleanor and F. H. Gooden's Ruth II, met hard luck in this 10-mile race. Eleanor came in the second two seconds too soon and Ruth flew home at 8:44.4. Just a little later and these boats would have won one, two.

The result was a disappointment to the motor boat men, but the spirit and the letter of the rules. The race was run in 12 seconds after the qualifying time. Altogether six boats romped past the stand within six seconds. Better handicapping could not be desired, and the crowd fully appreciated the work. One of the

everybody is invited to attend. Walk just a little south of the art building.

A Trip Over the Intercolonial Railway.
At the Canadian Government railway display in the federal government building one may in fancy take a trip over the Intercolonial Railway with a start to Prince Edward Island and Newfoundland thrown in. On the mammoth electrical map the train starts from Montreal and travels along the "Old Route" and its journeys to the Ancient Capital of Quebec, to the famous watering places along the lower St. Lawrence, to the busy industrial centers of Quebec and New Brunswick, to Campbellton and down thru New Brunswick to Moncton, the city of natural gas and industrial possibilities, to St. John, where millions of dollars are being spent equipping the port for the expanding export trade of Canada, and the great industrial center of Halifax, the eastern gateway of Canada, and thru beautiful Cape Breton to Sydney, with its vast coal fields and the great shipbuilding industry. One may also cross the Straits of Northumberland and visit "The Garden of the Gulf," the island of Prince Edward Island, the capital of the Maritime, and the "Ocean Limited," with their splendid equipment of modern vestibule coaches, and the journey in fancy is sure to develop a keen desire to take the trip in reality.

The Intercolonial display is a brilliant one in reality, to the people who travel by 1700 miles of railway, owned and operated by the Government of Canada, a road in fact, owned by the people, and operated for the people's benefit.

An inspection of the exhibit will convince one how many are the attractions presented to the people who travel by this route. The beautiful pictures give an idea of the beautiful scenery, and the mounted specimens of fish and game tell a eloquent story of the sporting possibilities. There is so much of interest that every one should pay it a visit and make a point of seeing the representatives in charge, who will cheerfully furnish all information.

PUREST PRESERVED FRUITS

This is the age in which absolute "purity" in foods is the chief demand of the careful housewife. The Acme Food Products Co. is the watchword of Wagstaffe, Limited, Hamilton, in the putting up of their preserved fruits, and thru that quality the firm has attained a continental reputation. Visitors to the Exhibition can see the proof of this in the splendid Wagstaffe, Limited, exhibit of preserved fruits in the manufacturing building. Absolutely pure from preservatives, the fruits are of the finest quality, and the artificial coloring. The Wagstaffe Preserved Fruits are extraordinarily delicious to the taste. All are prepared in the utmost cleanliness and put up in sterilized glass jars. See this handsome, most inviting display of pure preserved fruits and be convinced.

A Music-Lover's Plano.

The old-fashioned music teacher has an idea that any sort of piano would serve the purpose of a beginner, but the conception of the groundwork necessary for a good musician is in reality, to the people who travel by 1700 miles of railway, owned and operated by the Government of Canada, a road in fact, owned by the people, and operated for the people's benefit.

An inspection of the exhibit will convince one how many are the attractions presented to the people who travel by this route. The beautiful pictures give an idea of the beautiful scenery, and the mounted specimens of fish and game tell a eloquent story of the sporting possibilities. There is so much of interest that every one should pay it a visit and make a point of seeing the representatives in charge, who will cheerfully furnish all information.

The Wires All Carry The Same Message—'I Want WINDSOR TABLE SALT'

You have got to use some kind of salt on the table. You must use salt in your cooking and baking.

Are you using the best salt? WINDSOR TABLE SALT? It's the little thing that counts. It's Windsor Salt, that will help you to make dainty dishes—and favor food as it should be favored. WINDSOR SALT is pure and fine and good.

boats had completed six miles of the course before the race started. The winning boats were as follows: Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

Class B Results.
A little less exciting was the race between the Class B boats, which a couple of years ago would have been considered very fast, but seemed comparatively slow compared with the Class A going. The results were as follows: Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

An Added Race.
As an extra attraction the committee put on a 10-mile C. N. E. championship race for displacement boats, 40 feet and under. The four ships entered started at 1:30 p.m. in a line, partly in the race all but F. K. and Reliance IV. The race was a close one, and the four boats finished and the gaps gradually widened until the Gaddy came home ahead.

Results.
Gaddy III, 6:00; Eleanor, 6:00; Ruth II, 6:00; Reliance IV, 6:00; Heloise, 6:00; Eleanor, 6:00; Ruth II, 6:00; Reliance IV, 6:00.

Class A Results.
Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

Class B Results.
Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

Class C Results.
Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

Class D Results.
Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

Class E Results.
Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

Class F Results.
Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

Class G Results.
Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

Class H Results.
Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

Class I Results.
Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

Class J Results.
Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

Class K Results.
Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

Class L Results.
Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

Class M Results.
Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

Class N Results.
Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

Class O Results.
Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

Class P Results.
Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

Class Q Results.
Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

Class R Results.
Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

Class S Results.
Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

Class T Results.
Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

Class U Results.
Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

Class V Results.
Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

Class W Results.
Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

Class X Results.
Heloise, W. H. Gooden, 3:12.0; Eleanor, R. McLaughlin, 3:12.0; Ruth II, F. H. Gooden, 3:12.0; Reliance IV, 3:12.0; Heloise, 3:12.0; Eleanor, 3:12.0; Ruth II, 3:12.0; Reliance IV, 3:12.0.

CANADIAN HYDROPLANE DEFEATED CHALLENGER

Doherty Player Features Exhibition

One of the first player pianos to be shown at the Exhibition, and the player piano which has still remained the first in order of merit since others have followed it to the big fair, is that to be seen at the Doherty Piano Company's exhibit in the manufacturers' building. The great objection urged by musicians against the ordinary player piano is that it is a mechanical device incapable of expressing the individuality of the person who operates it. This does not apply to the Doherty player, for it is so delicately devised that the personal claim of the operator is carried with the beautiful music. Aside from this, the great improvement in the Doherty instrument also surpasses all others. Every part of the player has been treated with the best of care. This is one of the reasons for the popularity of the Doherty.

The instrument seems to possess a certain air of refinement. It may be termed such and such a device, but very noticeable. This player is adapted for use on any piano, but the extent of its workings does not stop there. Take a piano that does not ordinarily sound distinct and the Doherty will almost perform the impossible. That piano will turn out more harmony than it could with Casanova sitting on the stool. It is not going too far to state that the Doherty Piano Co. of Clinton, Ontario, have discovered the link that has been searched for during the past decade—the link connecting the individuality of the pianist with the music. No pains

have been spared to make the casing of the instrument both artistic and magnificent. The workings on the beautiful cases are shown up well by the delicate grain of the expensive wood. The exhibit of the company is arranged so that the instruments appear to take advantage. It will pay you to take a trip to their exhibit. Your visit to the Exhibition is not complete unless you see the Doherty player piano. After the fair, all enquiries should be made at the company's sample rooms, 140 Victoria street, one block from Eaton's.

Manufacturers' Annex.
(Portland Cement.)

After seeing the photograph of the handsome Grand avenue, visit of Milwaukee, the Toronto people who visited the booth of the Canada Cement Co., under the grand stand, yesterday became immediate converts to the proposal to have a cement Bloor street viaduct. The sign displayed over the picture reads: "Wouldn't the Bloor street viaduct look better if built of concrete than if built of perishable material?" In addition to this picture there are 100 colored illuminated photographs printed on glass, showing samples of buildings and roads and barns and almost every known kind of structure built of Portland cement, the product of the Canada Cement Co. Free books will be sent, explaining more fully the uses of cement, to anybody who leaves his address at the booth. The privilege has been widely used during the fair. Portland cement combines in one substance all the qualities which have made wood, brick and stone useful in building materials. It is light, fireproof, substantial, sanitary and leaves itself admirably to ornamental effect. Moreover, many a man who has sand and gravel of his own can do his own work with nothing more than a trowel. The ultimate cost of cement is less than that of any other building material, on account of its nondestructibility. Farmers are using it widely for their dairy barns on account of its cleanliness. The brilliantly-lighted exhibit of the Canada Cement Co. has been one of the features of the manufacturers' annex this year.

Business Demands a Clear Head, No Chance for Drinking Man.

Men are inclined to believe that it shows a sign of weakness on their part to take treatment for liquor drinking. It doesn't. On the contrary, the taking of treatment for liquor drinking is a sign of strength. It is to be thought of as one who continues to drink day after day, ruining his nervous system and wrecking his business because he is ashamed to be cured?

Business Demands a Clear Head, No Chance for Drinking Man.

No finger is the drinking man tolerated in business. As soon as it becomes known that a man is drinking investigation starts—the confidence of business acquaintances disappears. That is the beginning of the end. No man can succeed without the confidence of those with whom he does business. The Gatlin treatment offers perfect relief in three days—does away with all craving and desire for liquor, restores the nervous system, clears and strengthens the brain.

No Hypodermic Injections

With the Gatlin treatment there are no hypodermic injections, no poisonous drugs, no bad after-effects—it is SAFE, HARMLESS, POSITIVE. In three days the drinker is a man RENEWED, with no more craving or desire for liquor.

The Gatlin Institute treats all patients under a plain contract to cure in three days—to cure satisfactorily—or the fee paid will be refunded when treatment is completed.

The Gatlin home treatment is for those who cannot come to the institute for three days.

Books of particulars and full information to all who call or write. Telephone North 4538.

Illustrated Bible Certificate

TORONTO WORLD, SEPT. 4th, 1912.

ABRAHAM LINCOLN SAID: "NO LIBRARY IS COMPLETE WITHOUT TWO CERTAIN BOOKS—THE BIBLE AND SHAKESPEARE; HARDLY A QUOTATION USED IN LITERATURE THAT IS NOT TAKEN FROM ONE OF THESE WORKS."

The above Certificate with five others of consecutive dates

Entitles bearer to this \$5.00 Illustrated Bible

If presented at the office of this newspaper, together with the stated amount that covers the necessary EXPENSE of this great distribution—including

MAGNIFICENT (like illustration in announcements from day to day) is bound in full flexible limp leather, with overlapping covers and title stamped in gold, with numerous full-page plates in color from the world famous Tisot collection, together with six hundred superb pictures graphically illustrating and making plain the verse in the light of modern Biblical knowledge and research. The text conforms to the authorized edition, is self-pronouncing, with copious marginal references, maps and helps; printed on thin bible paper, flat opening at all pages; beautiful, readable type. Six Consecutive Free Certificates and the

The \$5 Illustrated Bible

is exactly the same as the \$5 book, except in the style of binding
