Both speakers have visited the devastated portions of Belgium and Northern France, and pictured the scenes they had witnessed, while Dr. Hillis quoted portions of affidavits secured by Allied agents in proof of his assertions that the crimes were the direct outcome of Germany's prearranged plan for making war.

"This something was Germany money employed within the Allied countries. There was a Bolo Pasha fund for corruption of the press, the von Buelow fund for promoting crimes and sedition. The last-named fund, in my opinion, was by far the most important. It was employed to promote the glot, carefully prepared for months, which broke out in both the army zone and the rear formations in May and June of this year. This plot nearly trained the results hoped for by the German Government."

BRANTFORD'S GOOD SHOWING
Brantford, Oct. 15.—Upwards of half of the men who have been examined by the local medical board at the examining depot in the armories as coming in the first class under the military service act, have passed as fit for any service. In all 1,033 men have been examined in three weeks' time, and of this number 518 have been placed in Class "A." Although the percentage of rejected men appeared heavy during the first week of the examination, in all only 211 men have been placed in Class "E." This is thought to be a good showing considering the large number of men who have already gone overseas.

Russian Troops and Batteries On Oesel Island In Grave Danger As Germans Gain Ground To South and East—Great Teuton Armada. Employed In Landing of Troops-Kerensky Rallies Nation To Drive Off Invaders.

Petrograd, Oct. 15.—The German forces which were landed on Oesel Island, at the head of the Gulf of Riga, are pushing forward to the east and south, placing in a difficult position the Russian forces and batteries in the district of Arensburg, at the southern end of the island, and especially those on the Cerel Peninsula. Military critics predict actions in the Gulf of Riga, followed by duplication of the invasion to the mainland on the coast of Esthonia, rather than an attempt toward the Gulf of Finland, which is protected by mine fields, which the Germans would have to sweep under the menace of the Russian fleet.

A third group of German warships, consisting of cruisers and torpedoboats, approached the southwest coast of Oesel Island and bombarded unimportant parts of the coast. German submarines were observed at various times and places in the Baltic.

ARENSBURG OCCUPIED.

The northern group of German warships, the statement adds, dispatched a torpedoboat squadron between the islands of Oesel and Dago, which pressed back the Russian patrols. Russian naval forces reinforced the patrol and accepted battle, whereupon the German ships retired. Fighting for Oesel Island, the war office announces, continued all day yesterday.

## THE WAR SITUATION

The weather, however, is a decidedly important element in this consideration, the continuation of hard storms not eniv keeps the ground in a state well-nigh prohibitive of co-ordinated infantry advances, but interferes seriously with the vital aerial observation work. The situ-ation on the Russian northern front continues critical, with the Germans overrunning the Island of Oesel and rapidly pursuing their program of gain Ing complete control of the Gulf of Riga. Russian military observers expect speedy extension of the German operations to the mainland, probably on the Esthonian coast, whence a movement towards Pet-rograd might be pushed. .
