Figure the Cost for yourself

ON'T be misled by the careless statement "Home preserving does not pay". Figure it out for yourself. Allowing six ounces of sugar to a can of peaches and adding the price of fruit and fuel you have less than half the cost of commercial canned peaches anywhere near the quality of your homemade product. With metals scarce and transportation problems becoming more and more acute the housewife who preserves her own peaches and other fruits is accomplishing a valuable personal economy and at the same time performing a patriotic duty.
