damage at present, but believe no lives 'have been lost. Cannot communicate with Martinique. (Signed), Llewellyn.

Stream of Fire. Kingston, St. Vincent, Saturday, Sept. 6.-The sights in the Windward district of this island, resulting from the eruption of the Soufriere volcano on Sente ber 3rd, are very interesting. The Rabacea river now is a stream of fire, a quarter of a mile or more wide. The greater part of Rabacca is wrapped in fire, and the mimic eruptions are everywhere. The river bed is continuously throwing up columns and dense clouds of steam, mud, and pebbles. The land has spread further seaward, and is changing considerably the appearance of the district. This was possibly caused by the ejecta that flowed down the slopes, filling the sea about the coast.

by blinding lightning and terrible peals of thunder, and a moaning sound from the agitated crater.

To Study Mount Pelee.

Paris, Sept. S .- The Temps to-day publishes an interview with Professor Laproix, on his new mission to Martinique. He says he will start, accompanied by several artillery officers. After a survey of the ground he will establish a number of posts of observation, supplied with proper instruments, in the neighborhood of Mount Pelee volcano. These posts will be united by telephone with Fort de France in order to give timely notice of threatening signs and enable the authorities to take precautions. When this is done, Prof. Lacroix will make a thorough examination of the entire zone threatened by the volcano. He is unable to estimate the length of time

this work will take. DESPERADOES KILLED.
