Miramichi Advance. CHATHAM, - - - FEBRUARY 16, 1882.

'Advance" Scientific Miscellany. The rainfall of Cherrapunji, a small Indian station in southwestern Assam, is believed to exceed in quantity that of any other known place. Cherrapunji occupies the summit of one of the Khasia Hills, at an elevation of 4100 feet. The hills rise abruptly from low plains, and lie directly in the course of the southwest monsoon from the Bengal liament. It is to be feared that "Contribair currents sweep across the lowlands strong force against Mr. Girouard. and are deflected upward by the hills, the expansion of the currents on rising

is surprising, for, while the low plains have an average yearly fall of only about 100 inches of rain, the annual rainfall of Cherrapunji is 493 inches, or A. Girouard, a defence of his weakness, more than 41 feet. As a comparison, an apology for his faults, a miserere for it may be stated that the annual rainfall of the United States is from 12 to Lord might deliver him from defeat at 50 inches, being greatest near the sea- the next election.

emptying of a teapotful of boiling water into the Arctic Ocean would have in

raising the annual temperature in Greendiscovery of making use of leaves of the is struck "Contribuable"

wer crustaceans with a view of deciding whether or not those creatures are able to distinguish colors. As a result that while the crustaceans are fully alive to the difference between light and darkness, it is solely the quantity and not and Mr. Girouard becomes angry; "Con the quality which affects them, for they tribuable" conveniently follows suit. Mr. cluster in nearly equal numbers around Girouard loves "Contribuable" and
