A STATEMENT FROM A WELL KNOWN BERLIN MERCHANT.

How His Daughter was Restored From the Terrors of St. Vitus' Dance-Her Case One of the Worst Ever Known Has Fully Recovered Her Health.

(From the Berlin News.) The readers of the News bave been made familiar with the virtue of Dr.

William's Pink Pills for Pale People

through the articles appearing from time to time in these columns, and while the druggists say that many in this vicinity have received undoubted benefit from their timely use, it is only recently that we have heard of a cure Berlin of such importance as to take rank among the most remarkable yet published. There is hardly a man woman in the town of Berlin, or the county of Waterloo, who does not know Mr. Martin Simpson, issuer of marriage licenses and general mer-chant, King street. Anything said by Mr. Simpson will be implicitly relied upon. A day or two ago we had a talk with him in reference to his fourteen year old daughter Helen, who had for two years been a great sufferer from Vitus' dance. He tells us that it was the worst case he ever saw. She did not sleep for whole nights and was an intense sufferer. She was totally helpless, and could neither eat nor drink unless administered to her by her parents. The best medical attendance was had, but all to no avail. She kept getting worse and worse, and finally, when in the paroxysms, com-menced to froth at the mouth, and her parents believed she was going out of her mind. Though unable to walk for about eight months, she would in her spells have fits, making her jump high above her couch. While in this condition, the worst case ever seen in this place, Mr. Simpson, as a last resort, purchased some Pink Pills and gave them to his suffering and afflicted daughter. He assures us that in thirty hours she found some relief. In a week the "dance" was entirely stopped and she was able to sleep, and was rapidly reguining her former strength. Some months after the use of the Pink Pills was discontinued she again had touches of disease, but a few doses of the pills stopped it, and for the last eight months has been en-tirely free from the terrible malady from which no one who knew the cir-cumstances expected she would recover, and her parents, as may be expected, are warm in their praises of the wonderful remedy which worked such great results. These facts are known to all who are acquainted

with the family, and further comments wholly annecessary.

When such strong tributes as these can be had to the wonderful merits of Pink Pills, it is little wonder that they are the favorite remedy with all classes. They are an unfailing specific for locomotor ataxia, partial paralysis St. Vitus' dance, sciatica, neuralgia, rheumatism, nervous headache, the after effects of la grippe, palpitation of the heart, nervous prostration, all diseases depending upon vitiated humors in the blood, such as scrofula, chronic erysipelas, etc. They are also a speci-fic for troubles peculiar to females, suppressions, irregularities, and all forms of weakness. In men they effect a radical cure in all cases arising

After the repast the toasts of Her Majesty the Qeuen and the Dominion and Provincial governments were enthusiastically drunk, and the toast of the Department of Agriculture was then proposed, coupled with the name of Col. Blair, who in a masterly and lucid address briskling with facts and information held the attention of those present for some time. He referred to the good work done by the dominion government and the local government of New Brunswick in advancing the farming interests of the country and hoped it would continue.
The province of Nova Scotia was falling into line and legislation had just een perfected that would admit of the farmers of that province receiving rore encouragement and aid than they had hitherto done. He referred to the magnificent farmers' convention at Fredericton a short time ago, at which three hundred and fifty farmers from all parts of the province assembled, and felt cheered and encouraged by what he saw there. His practical utterances on the cultivation of the various soils, uses of manures and fertilizers, ensilage for cattle, raising of roots, and experiments on the farm at Nappan were listened to with the clesest attention. Afterwards the Col. had a number of questions asked him on many points, all of which he answered to the satisfaction of his en-

The Dark Blue Boys Easily Defeat Cambridge by Three Lengths.

London, March 30 .- The usual immense crowds of people of all classes and conditions thronged the banks of the Thames this morning to witness the fifty-second race between the crews of Cambridge and Oxford. The race was rowed over the championship course from Putney to Mortlake, four

and a half miles. As in former years the start was made from a boat moored just above Putney bridge, and the race was finished at the ship hotel at Mortlake. The boat houses were gaily decorated with flags of all descriptions, but club colors predominated. Cam-bridge launched their boat first and were followed almost immediately by Oxford. Both crews were heartily

Cheered.

The weather was cold and raw with squalls of drizzling rain. There was also a changeable southwest wind, which put the water in a pretty bad condition.

Every bit of available space along the river was packed with people, who cheered their respective favorites. The river was alive with eyery conceivable kind of craft, but arrangements for keeping the course clear were perfect and no boat was permitted to obstruct the way to the goal at Mortlake.

The starting signal was given at 4.08

Oxford was drawing ahead rapidly, and at Bishop's Creek was leading by half a length. Favored by the shelter afforded by the Surrey shore, which the Oxf. rds selected after winning the toss, their boat was rapidly increasing its lead over the Cambridge shell and they were rowing easily.

At Craven Cottage Oxford was ength ahead. Cambridge was spurting, but could not gain against Oxford's long, sweeping stroke. At Hammersmith bridge, Oxford was still ength ahead. Cambridge made another spurt with

the same result as before. At Thorcycroft's rough wa'er bothered both crews, and Cambridge had a shade the best of it, Oxford being barely a length ahead at this point. This was more than two-thirds of the distance, but the Cambridge par-

tisans had not given up hope. From this point, however, Cambridge fell be-hind, and at Barnes Bridge Oxford was three lengths ahead. From Barnes Bridge to the ship Oxford practically thaintained that lead, and won easily by about three lengths.

CONFEDERATION TERMS.

Arrival of the Newfoundland Delegates at Halifax.

To Confer With the Dominion Government Regarding the Terms on Which "The Ancient Colony" May Become a Province of Canada.

(Saturday's Halifax Herald.) The Newfoundland confederation deegation arrived by the steamer Grand Lake at 8 o'clock last evening. The delegates are: Hon. Robert Bond, Hon. G. H. Emerson, Hon. E. P. Morris, and Hon. W. H. Herwood.

"Up to the present time there has been no movement whatever towards annexation in Newfoundland. The placards that were posted not long ago were put up by no one knows who. They were not the outcome of any known organization, and even the office where they were printed is a secret. There is no annexation party in Newfoundland. At the same time there is a great regard for the people of the United States, who have been on friendly terms with us. They have been prompt in expressions of sympathy when we were in trouble. Their sympathy has taken tangible more than once, notably on the occa-sion of the great fire and during the present commercial crash with its con-sequent suffering. I have been one of the representatives of St. John's for ten years, and I know the people sufficiently well to be able to say that mere troubles or difficulties woold not influence them in this matter. They would never support for mere personal reasons confederation, or any other constitutional change, which they did not believe to be for the best interests of the country as a

"The government now in power, on the other hand, seeing that the question of confederation is likely soon to ecome an issue on its own merits or, as opposed to some other political scheme, think it is due to the people of Newfoundland that the terms on which confederation could be accomplished should be learned and laid be fore the country. Then the people can intelligently consider the subject. We are going to Ottawa for the purpose of discussing with the Canadian gov-ernment the terms on which union, nutually advantageous to both countries, may be brought about. No proposals have yet been made on either side, and we begin de novo. Nothing has passed between our government and that of the dominion beyond the correspondence necessary to arrange for the conference that is to take place

at Ottawa." "Are you recovering after the com-

mercial crash?"
"Matters are straightening out a little. The seal fishery shows excellent prospects. The Aurora was in before we left with 40,000 on board, and she reported other steamers with goood loads. The price of seal oil is higher by \$30 a tun this season than last, the rise accounted for because of scarcity last year, and that new uses have been found for the product This will help to improve times. Between 5,000 and 10,000 men are engaged in the sealing industry. This number has been rarely exceeded, and certainly not since the introduction of sealing steamers. In reference to the commercial crash, it is a fact that the temporary embarrassment of the government was due to it, though it was in no way induced or brought about by the government."

'We leave for Ottawa by the C. P. R. train on Monday morning. A stop will probably be made in Montreal, so that we shall not likely reach the capital till Thursday. We hope to be back in Newfoundland in less than a month from the time we left."

Hon. Robert Bond is a son of a former merchant of Newfoundland and wealthy. He was speaker of the Newfoundland assembly at one time and was afterward leader of the opposition opposed to the government of Sir Robert Thorburn, and later was colonial secretary in the government of Sir Wm. The kind words spoken of Dr. Agnew's Catarrhal Powder by that famous Episcopalian, the Rev. John Langtry, M. A., D. C. L., have already been recorded in these columns. He does not stand alone in the view expressed of this famous medicine. The Rev. W. R. Williams, Mr. Langtry's associate in church work, has also made use of the medicine, and quite willingly tells the benefit it has been to him for cold in the head, and as a means of giving relief in the case of catarrh. It is worthy of remark here that not alone have these two clergymen endorsed this medicine, but it has also received the endorsement of the

Bishop of Toronto. One short pull of the breath through the blower, supplied with each bottle of Dr. Agnew's Catarrhal Powder, diffuses this powder over the surface of the nasal passages. Painless and delightful to use, it relieves in ten minutes, and permanently cures catarrh, hay fever, colds, headache, sore throat, tonsilitis, and deafness. Sixty

cents. Sample, with blower, sent free for 2 three-cent stamps.

S. G. DETCHON, 44 Church st., Toronto. NO TIME TO LOSE.

Little Dot—I haven't seen it, but I guess maybe you'd better look in the nursery. The boys is getting up a dime museum, and I heard Johnny tell Ethel she might be the Circassian girl.—Good News.
