Oaklawn Farm

JOHN F. GUNN, Greenridge, Man., offers for sale two young shorthorn bulls and some heifers.

FARM BOOKS.

What books would you recommend for the young man homesteading as a nucleus of a farm library?

Sask. G. L. H. Ans.—Swine by G. E. Day; The Farmstead (Rural Science Series) by Roberts; Fertility of the Land, Roberts; Veterinary Elements, Hopkins. The above can all be secured from this office at prices varying from \$1.00 to \$1.50 each, add 10 cents for postage.

GARGET.

Cow six years old calved away from stable, came back next day; found calf dead. Do not believe the calf sucked the cow; when I went to milk her I found one of the front teats blocked; at least the milk inside bag is clogged and a little milk comes and then stops. Have been bathing with hot water but make no impression.

Sask. A. E. C. Ans.—Give cow dose of purgative medicine; epsom salts one pound, common salt quarter of a pound, blackstrap a cupful, powdered ginger two ounces, added to one quart of warm water. Give at one dose, drench slowly and let head down on the first attempt at coughing by the cow. Follow with one ounce daily in the feed of saltpetre for a week. Apply the following to the udder with plenty of friction after bathing: Fl. Extract of Belladonna half an ounce; tincture aconite, four ounces; tincture of opium, three ounces; raw linseed oil to make one quart.

PREMATURE BIRTH IN SOWS.

Have four young sows that were bred between December 23 and 27; two aborted on April 1; one batch was all dead, and some of the others were alive, they have no milk. They are very quiet and running around, can get in and out when they want to and are not too fat.

Man. B. M. S. Ans.—One cannot be certain as to the cause of the trouble in these cases, in the feed the cause may probable be found. In all such cases of premature birth, nature has not provided the usual sustenance, consequently the absence of milk was only to be expected. Bred at the time you mention, farrowing time normally should have been about April 14 to 18.

ANALYSIS OF BLUESTONE BY THE GOVERNMENT.

I believe I have seen in some of the farm papers that the government analyst at Ottawa examines and report-upon samples of bluestone, etc.; sent to him for analysis, free of charge. One party sent from near this place, but was told from Ottawa that it would cost him five dollars to get the sample reported on. Can you tell me if this is correct? If so it seems as if the government were playing into the hands of those who adulterate this important article. Also kindly say if the following is a good sample of bluestone: Water of crystallization, 38.15 per cent; sulphur trioxide, 30.87 per cent; copper-oxide, 31.08 per cent.

Sask. ANTI-SMUT. Ans.—The Dominion Government analyst at the Central experimental farms, Ottawa, examines well water, free of charge; but the Inland Revenue people have also analysed samples of bluestone and formaline, and in order to have the work done accurately, have had samples collected by department officials in various places in Canada; the results have been published in this paper. There is a slight mistake of one tenth of one per cent. in the figuring, probably a typographical error.
