BANKERS: The Traders Bank of Canada.

GENERAL OBJECTS OF COMPANY

The Winnipeg-Cobalt Prospecting & Development Company, Limited, has been organized to open up and develop certain mining properties hereinafter described; and to explore and prospect for silver and other valuable minerals in the Cobalt region and other parts of the Province of Ontario; to stake out, purchase or otherwise acquire mining claims and properties; develop and dispose of the same for cash, or part cash and part stock: and to form subsidiary Companies to mine such properties, taking as payment stock in such subsidiary mining companies.

PROSPECTING.

It is not intended to confine the operations to any one particular district. New and rich discoveries are being made in widely separated localities. Important finds of silver have been made up the Montreal River and on the Temagami Forest Reserve, as well as copper, mispickel, gold and iron, and the Larder Lake Country has become famous for its gold lodes. A wide and promising field is open for this department of the Company's operations.

It is the intention to employ experienced Prospectors who will be sent to explore and stake out claims for the Company in any new mining fields which from time to time may be discovered.

DEVELOPMENT:

Competent mining Engineers and Managers will be employed to report upon the properties and superintend their development. Not every property will prove to be rich, but large profits will be made if but one in five or six turns out to be a good mine. Developing properties to the point where they can be sold as mines, gives opportunity to secure large profits on a moderate outlay.

SUBSIDIARY COMPANIES:

In the formation of subsidiary companies to work such properties as may, on development, be found suitable to mine, it is anticipated that the Company will reap rich rewards and make their largest profits while avoiding the risks attendant upon actual mining. A controlling interest will, of course, be retained by the "Winnipeg-Cobalt" in the stock of any subsidiary Company. Treasury stock of the subsidiary Company will be sold to provide funds to further develop and work the mine. The success of the mine will give value to the promotion stock, which will either be held by the "Winnipeg-Cobalt," or be distributed amongst its shareholders. Every shareholder in the "Winnipeg-Cobalt" is therefore a PROMOTER, and will reap Promoters' profits.

PROPERTY:

The Company now controls the following properties:—2 mining claims, 80 acres in the township of Teefy, on the Abitibi River, twenty-five miles west of Abitibi Lake, on which is a strong fissure vein of calcite, showing silver values, eight feet in width, and several well mineralized quartz veins near contacts of diabase and huronian rocks. 5 mining claims containing 200 acres in the Temagami Forest Reserve, about three miles from Temagami Station, on the Temiscaming and Northern Ontario Railroad. On these properties there are a number of quartz veins—one very strong fissure vein of blue quartz is sixteen feet in width, very heavily mineralized with iron sulphides, with indications of copper and mispickel. The ore contains surface values in gold, silver, and arsenic. All the claims are in Northern Ontario. A more extended description of these properties is appended to the Company's prospectus.

Financial

For the purpose of developing the foregoing mining properties, in prospecting and securing which considerable money has already been expended, and for the further undertakings of the Company, there are now offered for public subscription

100,000 Shares Fully Paid Up and Non-Assessable at Twenty-Five Cents Per Share

THE RIGHT IS RESERVED TO ADVANCE THE PRICE AT ANY TIME OR TO WITHDRAW STOCK FROM SALE WITHOUT NOTICE

This is an excellent opportunity to obtain a share in the great Mineral Riches of Cobalt District and Northern Ontario at Ground Floor price. The Directors are well-known substantial business men of Winnipeg and Selkirk. All are heavy stock-holders in the Company. It is intended to make the Company distinctively Western, directed by Western men, with Western energy and ability. Fortunes have been made in the Cobalt field by prospecting, developing and disposing of mining claims. The Temiskaming and Hudson Bay Mining Company's stock has advanced from 40c. to $186 00 per share, after having paid $92.00 per share in dividends on a par value of $1.00. The Winnipeg-Cobalt Prospecting and Development Company has an equally good chance to make large profits with judicious foresight and management. Will you join in their venture?

The low price of shares (25c.) places this investment within reach of all. $10.00 will buy forty shares; $15.00 sixty shares; $25.00 one hundred shares; $100.00 four hundred shares; $250.00 one thousand shares. It is by combining many small amounts that capital is obtained to carry on large enterprises. The low capitalization (only $500,000) is of great advantage as it insures a higher rate of dividends.

Write or call upon us for Prospectus and further information.

If desired, we can arrange for payment of stock on the instalment plan. Write us with your proposal.

APPLICATION FOR STOCK.
