

Dear Sir,

We beg to inform you that our facilities for the preparation of the necessary papers in connection with applications for Patents in Canada, United States and other countries, are at present even better than they have been in the past, and may be considered exceptional.

Our wide experience in connection with inventions in the electrical and mechanical lines, enables us to safeguard our clients' interests in the first place by securing the full measure of protection due to them.

It is very important for every patentee to be aware as to his exact position regarding proprietary rights, and in this connection our Mr. Fetherstonhaugh has always made it his aim to give to his clients the full benefit of his knowledge, as to what features of the invention may be claimed as novel and included in the protection granted by Letters-Patent.

All work entrusted to our firm receives the personal attention of our Mr. Fetherstonhaugh, both in the preparation and the prosecution, as it is only by constant supervision during the progress of an application that a good substantial Patent can be procured.

Yours faithfully,

E. J. FETHERSTONHAUGH & CO.
