

SOME SUIT FACTS

The man who doesn't care what his suit costs him will have it made by a Custom Tailor, unless he is in a hurry.

The man who does care what it costs but does not care what he gets, won't get his suit here, that's certain.

The man who both cares what it costs and cares what he gets,—that's the man we delight in.

Miss E. Miller, daughter of Mr. Willoughby Miller of Greenbush, met with a serious mishap on Friday last. She was endeavoring to stimulate a slowly burning fire by adding to it coal oil out of a large can, when the oil ignited, exploded the can, and set fire to the young lady's clothing. She rushed into the yard and her screams brought members of the family, by whom the fire was speedily extinguished, but before she was badly burned about the body and one hand and arm. Her condition is still serious, though she is resting quietly.

Rheumatism The most stubborn of diseases has at last been conquered. Cured at Last Tuck's Rheumatic Bone Oil after numerous most trying experiments has proved that Rheumatism is curable. Its method of procedure is simple like all important discoveries. It attacks the disease from the points of least resistance, and succeeds where others fail. It is a powerful penetrating oil that goes straight to the bone, the seat of the trouble, and after a few applications the agony of pain ceases, the stiffened joints are made supple and the inflammation is relieved. Here is what a sufferer says of it:—

I had rheumatism so bad that I was crippled with it. For several months I doctored and tried everything but my joints only got larger and stiffer and all the time I was suffering dreadfully. For a good deal of those seven months my husband had to lift me in and out of bed and I had to go on crutches. I was advised to try Tuck's Rheumatic Bone Oil and it did me good from the start. It seemed to penetrate right to where the pain was and eased it. Before I had used a bottle my joints relaxed and three bottles cured me completely. I have not used any now for over a year.

The Renewal of a Strain

Vacation is over. Again the school bell rings at morning and at noon, again with tens of thousands the hardest kind of work has begun, the renewal of which is a mental and physical strain to all except the most rugged. The little girl that a few days ago had roses in her cheeks, and the little boy whose lips were then so red you would have insisted that they had been "kissed by strawberries," have already lost something of the appearance of health. Now is the time when many children should be given a tonic, which may avert much serious trouble, and we know of no other so highly to be recommended as Hood's Sarsaparilla, which strengthens the nerves, perfects digestion and assimilation, and aids mental development by building up the whole system.

TRIAL BOTTLE FREE.**REJECT TAINTED MILK**

A. H. WILSON, DAIRY INSTRUCTOR, ATHENS, ONT.

There is a clean bright way along which dairymen should work. Unfortunately, in the past a few unclean persons have passed over it and much old machinery has been used. However, this old machinery is being replaced by new and clean equipments. The governments and dairy schools have done much to remedy matters.

The worst things instructors have to contend with is the taking in of tainted milk. This is a heinous practice and very injurious to the industry. Many cheesemakers take in cans of milk from the patron of the neighboring factory after it has been rejected by the other maker—and justly rejected. It is utterly impossible for fancy cheese to be made from such milk. The same maker knows that he shouldn't accept the milk and would refuse it from one of his own patrons.

The teachings of such experts as have charge of the dairy schools should be followed and then no tainted milk would be taken at any factory. Those who have taken a course in one of Ontario's dairy schools may have made mistakes in manufacturing, but when this is the case it is because they have not carried out strictly the instructions as given at one of these schools. To put it more forcibly, every poor cheese made in Ontario is due to the makers not following the methods taught in dairy schools.

Every factoryman should follow the teaching of experts and take in no milk that has been rejected at a neighboring factory, whose maker knows tainted milk just as well or better than he does. Only from the best and purest milk in clean factory can a fancy, neatly bandaged cheese be looked for. Pure milk and clean factory are the prime requisites of good cheesemaking.
