GET THE BEST

During these trying times when so many light Fire Companies are going out of business would it not be well to consider your own interests and place your Fire Insurance in a Reliable Office.

We have the oldest and strongest Fire Companies on the continent companies that are generous in their settlements, prompt in their payments, and their policies are free from technicalities.

We will call and inspect your dwelling if you will drop us a card

ASTLE & COSMAN

Queen Street
Woodstock, N. B.

Items of General News.

O. B. Buzzell has sold the Snell House in Houlton and after many years catering to the travelling public has retired from the business. He will deal in real estate.

Prof. H. C. Carel of the University of Minnesota announces the discovery of a germicide, eight times more powerful than carbolic acid, that is harmless to the human system yet is sudden death to all forms of germ life. Typhoid, cholera, and all other bacilli quickly succumb to the new chemical and hopes of a revolution in the medical world are maintained.

For the murder of his wife in London last February, Dr. H. H. Crippen will be hanged on November 8.

That the G. T. R. will build a direct route from Levis to Moncton, for a part of the way through the state of Maine, is a newspaper story flatly discredited by chief engineers of the new road.

The Federal Parliament opens Nov. 17.

Some time ago G. S. Mayes of St. John entered suit against the Federal government for more than \$60,000, amount alleged to be due on a dredging contract. The court allowed him \$9000 nearly two thirds of which amount was undisputed. Conservative newspapers claim in this a political victory, while the position taken by the liberals is that no man in private business or otherwise would accept as full settlement less than one-sixth of the amount he claimed. Certainly no man but a deep-dyed grafter would seek to obtain an amount six times greater than was his due.

A steamer sailed from St. John last week bound for Cuba with 15000 barrels of New Brunswick potatoes.

Dr. A. O. Earle, one of the most prominent lawyers in St. John is dead.

On Sunday night the tramp steamer Regulus, founded off St. John's, Nfld., and the entire crew of 23 men were lost.

In an overcoat recently sent from Vancouver to the Campbellton fire sufferers were notes of hand aggregating \$4,000 value.

At Montreal there is much excitement over the murder of Cecile Michaud, a girl of 13 years. She and another girl of sixteen had been abducted to a roadhouse and the child was not seen again until her remains were found in a vacant lot.

C. P. R. Brakeman Killed.

Galen Love, of St. Stephen, a C. P. R. brakeman, was instantly killed at Beechwood, two miles above bath, at 10.30 Friday evening. With another brakeman named Seely, he was setting off cars at the siding. For some unaccountable reason he tried to get between the cars and was caught between the draw bars and instantly killed. The coroner was summoned and with his permission the remains were taken to Woodstock to the undertaking rooms of A. C. Day, where they were placed in a casket and forwarded to St. Stephen. Great regret is expressed on account of the accident. There are a number of new men on the road and Supt. King has issued orders to exercise special precaution in setting on and taking off cars.

This was Love's second run out from McAdam.

Mr. Love was 25 years old, unmarried, and son of Hugh Love. He was a member of the Thistle Athletic Association, St. Stephen,

and one of the best all round athletes, clean and fair, and a great favorite with his associates. The funeral took place on Monday afternoon.

The Biggest Elevators in the World

It is really astonishing to read about the way the wheat crop of Western Canada is poured each fall through the elevators of the Twin Cities on Lake Superior—Fort William and Port Arthur. Last year 43,000,000 bushels, out of a crop of 125,000,000 bushels, went through the big terminal elevators in eighty days. The real significance of this is made clear by T. M. Ralston in the course of a remarkable article in October Busy Man's, entitled "Pouring Grain through the Big Funnel." He points out that during the past year eighty-nine million bushels were handled by the Twin City elevators, that it required eighty-nine thousand cars to hold this quantity and that this involved the despatching from Winnipeg of thirteen thousand trains of seventy cars each. The manner of handling the grain is described in interesting fashion and a description of the mammoth elevators—the largest in the world—is given.

Sign Your Name.

It is astonishing that after newspapers have said so much about refusing anonymous contributions there should still be those who persist in sending matter for publication without the name of the sender. Editors as a rule treat all unsigned letters as prima facie evidence of fraud. Correspondence on any timely topic is courted and news items from all sections are eagerly sought—but nothing will be published unless the editor knows the name of the writer.

The St. John Valley Survey.

Chief Engineer Maxwell of the St. John Valley Survey, who is at the Queen Hotel states that the field work of the survey has been completed and all camps broken. A staff of about six men will be busily employed compiling the estimate of the cost of construction of the work, and this will take some weeks. It is expected that the report of the survey and estimate of cost of construction will be presented to the Provincial government by the end of the year.

Windsor

Daniel Thompson has been a recent visitor to this place.

Mr. and Mrs. Dow Boyer, Bristol, spent Sunday at H. L. Dickinson's.
