

PEACE WAVE ROLLS ACROSS ATLANTIC

A Great Spring Tide, Says Augustine Birrell—Great Meeting at Whitefield's, London, Eng.—Soothing the War Fever—Resolution Unanimously Adopted.

MR. AUGUSTINE BIRRELL, the principal speaker at a largely-attended meeting held at Whitefield's, London, on Saturday, April 21, in support of the movement for an arbitration treaty between England and the United States, said that the cause of peace among the nations was a great spring tide.

The proceedings were of an international and non-party character. Lord Coleridge, who presided, referred to the Hague tribunal, and asked that it should not extend the area of its jurisdiction to the disputes which should be referred to it. Mr. Birrell, who was received with applause, moved the following resolution:

"That this meeting resolves in the united action of the churches in support of the proposal for a treaty of arbitration between the two peoples, and that it expresses its hearty approval of the cause of international peace, and its belief that the arbitration treaty is the only way of preventing the outbreak of the proposed treaty."

Great Britain and America, he said, were seeking to exist on the side of peace all the generous emotions, every impulse of humanity, every dream of religion, every hope, every dream of peace, every hope of knowledge, and every hope of peace, every dream of peace, every hope of knowledge, and every hope of peace.

First Shot of Civil War Fired Fifty Years Ago

The Fateful Gun Fired at Fort Sumter Kindled the Spark—Story of the Incident at Charleston—Bastille of the Federal Union.

ON the 12th of April—another month of wars and battles—in the year 1861, the first shot of the civil war was fired at Fort Sumter, Charleston, South Carolina. The shot was fired by the Confederate forces, and it kindled the spark which led to the outbreak of the civil war.

A silent tribute may be paid to the memory of the incident which is remembered by the fact that the first shot was fired at Fort Sumter, Charleston, South Carolina. The shot was fired by the Confederate forces, and it kindled the spark which led to the outbreak of the civil war.

With the presence of mind, Captain Anderson, who was in command of the fort, turned back a small boat, and he was the first to see the Confederate forces. The shot was fired by the Confederate forces, and it kindled the spark which led to the outbreak of the civil war.

Charleston in a Fury. Charleston was in a fury next morning when the news reached the harbor, and the most intense work in the city was done. The shot was fired by the Confederate forces, and it kindled the spark which led to the outbreak of the civil war.

character that the terms of no treaty could keep us from each other's throats. Kill each other we must! (Laughter.) Well, if we must we will, but surely the chancellor must admit that there can be nothing but good in trying, as long as possible, to prevent our doing anything of the sort by raising up, as I have already pointed out, a barricade strong enough and high enough to prevent us from doing anything of the kind."

LOBO BOY AT GIBRALTAR WRITES OF HIS STEAMER TRIP

Lobo Boys Who Have Done Well in New York—A Study of the Passengers on the Crete—Vivid Description of the Azores.

On Board Steamship Crete. Gibraltar, April 8. To the Editor of The Advertiser: THE suggestion of one of your readers, I am taking a personal letter to you, and I am glad to hear that the growth of the modern city has necessitated frequent and numerous recruits from the country for her needs of trade, her social life, her learning, her industry, and her professional activity. It is rather interesting to a Canadian, for such I was born, and hope that to be in London, to recollect the great number of successful country men, who are doing the lives of the great American cities, and who are doing the lives of the great American cities.

Lobo Boys Do Well. My home was in the township of Lobo, in an affluent neighborhood in the city of New York. There are three men from that community doing authoritative work. Robert Ferguson is the auditor of the United States Railroad; John Showell is professor of political history in Columbia University; W. E. L. Edwards is a school committee of the United States.

More Luxurious Than Babylonian Kings—Costs Nearly Half a Million Daily to Feed the Street. Wall street, one could walk in there and "Charlie" would be there. The cost of the street is nearly half a million dollars a day. The cost of the street is nearly half a million dollars a day.

More Luxurious Than Babylonian Kings—Costs Nearly Half a Million Daily to Feed the Street.

ANCIENT Babylon was famous for her riches and her extravagance. Broadway, New York, claims her share of the wealth of the world. The cost of the street is nearly half a million dollars a day.

On the evening of the 11th of the month, as usual, but at three o'clock in the morning was awakened by a gun, and he was in the zone of threatening trouble a few days before Lincoln succeeded Buchanan in the White House.

The Fort an Inferno. We get a glimpse from an eye-witness of what the scene was like at afternoon—first shot had been fired at 4:30 a.m.

Charleston in a Fury. Charleston was in a fury next morning when the news reached the harbor, and the most intense work in the city was done. The shot was fired by the Confederate forces, and it kindled the spark which led to the outbreak of the civil war.

IN THE STREET OR IN THE CHURCH

A Discussion of Why People Don't Go to Church—Interesting Symposium in Great Britain—Artisans and the Churches—The Labor Problem.

"There is hardly any more vital problem of religion at the present day than to get the man in the street out of the street into the church."

SAID Bishop Welldon in a lecture in Manchester Cathedral, which has just been printed in book form under the title of "The Religious Aspects of Disestablishment and Disendowment."

Non-Church Going. Those two quotations contain in essence the religious problems of the day. Why do men and women in such large numbers leave the church on one side? Why do not the churches concentrate on their work rather than on their rivalries?

Sir Hiram Maxim at 70 Making Flying Machines

Inventor of the Maxim Gun Talks With Grim Irony of His Career—How He Came to Invent the First Automatic Gun—His Present Interest.

SIR HIRAM MAXIM, who has types of machine, and the type which he has made is the most perfect of the firm of Vickers, Sons and Maxim, of Sheffield, England, does not intend, in spite of his seventy-one years, to abandon his life-work of invention.

"I am going to have my last flutter with my old hobby—flying machines," he told a London Daily News representative, and he proceeded to explain the importance of the new machine, which will be ready for trials, he hopes, in two months.
