

CHARGES GERMAN ARMS 800,000 MEN

Blind Veteran Barred From Home By U.S. Finds City Haven

TURNED BACK AT BORDER ON WAY TO HIS SISTER

Isaac McIlhenney Is Suddenly Stricken by Blindness in a Strange Land.

FINDS "Y" REAL HOME

Worked in West, Came to London To Be Near Friends.

Stricken with almost total blindness among strangers more than 3,000 miles from home, and separated by an insurmountable barrier from relatives who are anxious to care for him, is the fate which an unkind destiny has visited upon Isaac McIlhenney, a young Irishman from Donegal, who is now being sheltered by the Y. M. C. A. in this city.

McIlhenney is a veteran of the world war. He enlisted during the early hostilities in a battalion recruited in his native county, and accompanied it to the front-line trenches until the armistice was signed, receiving only two leaves of absence during the whole of that time.

On July 1, 1918, his battalion suffered severely, and in the engagement McIlhenney received a shattering wound, reaching from immediately below the right eye to the corner of his mouth. In March, 1919, he was discharged and returned to his home in Ireland.

Came to Canada. By this time the world was seething with discord, and because, with his mother and father dead, he no longer had home ties, McIlhenney decided to seek his fortune in a new and more promising land. Eighteen months ago he arrived in Canada and secured a position on a farm in the west.

A few months ago, when he seemed to be on the high road to success, his life changed in a mysterious way to fail. It grew gradually worse, until a few weeks ago in alarm he went to a physician. In left eye he was told that unless he received expert treatment immediately it would not be long before he would be totally blind.

Wrote to Sister. When he could barely see, he wrote to his brother and sister, who reside in Philadelphia, and explained his dire condition. He begged them to come to his aid and invited him to come to their home.

After sending to them the few hundred dollars which he had managed to accumulate, he reached the border. At the frontier, however, he was refused admission by the American immigration authorities. In despair, he retraced his steps to London, and because of the comparative proximity to his home, he decided to stay here for the time being, so that he might be within a short distance of his relatives.

Still Waiting. That was several weeks ago. Since that time Mr. Liddle has been in communication several times with Washington in a desperate attempt to get him to remain here for the time being, but he has been unable to obtain the necessary papers to allow him to enter the country.

Italy's Delegate

Distinguished Statesman Who Will Be Representative to the Washington Conference.

COUNT SFORZA.

ROME, Sept. 26.—It has been definitely announced in official circles here that Premier Nitti and Count Sforza will represent the Italian Government at the coming disarmament conference to be held in Washington, commencing on Armistice Day, November 11.

On July 1, 1918, his battalion suffered severely, and in the engagement McIlhenney received a shattering wound, reaching from immediately below the right eye to the corner of his mouth. In March, 1919, he was discharged and returned to his home in Ireland.

FALLING STARS ARE EXPLAINED BY ASTRONOMER

Dr. Dearness, Principal of the Local Normal School, Explains Phenomena.

FRAGMENTS OF PLANETS

Declares Increase in Number Has No Connection With Eclipse of Sun.

Many Londoners have commented upon the number of falling stars observed in the skies last night. Toronto astronomer undertakes to associate the phenomena in some way with a total eclipse of the sun, which occurs next Saturday. Principal Dearness of the Normal School states that the falling stars have no connection with the eclipse. There are numerous so-called meteors in the sky, but at some seasons and in some years they appear to increase.

Lost in Space. One theory is that they are likely to be more numerous when the earth is passing through the path of a comet. What are called falling stars are, of course, not really stars. They are fragments of matter lost in space, and when the earth speeds around in its orbit, with great protecting folds of air around it, these fragments of matter, some of which quite possibly have been lost by the sun, are suddenly brought to the surface of the earth by the friction of the moving atmosphere, in which they are caught.

The friction heats them to a white brilliance, and usually they shoot across the sky, leaving a trail of light. They are not really stars, but are fragments of matter lost in space, and when the earth speeds around in its orbit, with great protecting folds of air around it, these fragments of matter, some of which quite possibly have been lost by the sun, are suddenly brought to the surface of the earth by the friction of the moving atmosphere, in which they are caught.

Some of these meteors are the size of huge boulders. Their outer surface appears to be covered with a volatile element which, when they come into contact with the earth's atmosphere, they are consumed and again lost in space, or they come within too close a drawing point of the earth's center of gravity, and are suddenly shot down to the ground, where they are sometimes found as meteorites.

Rejected Suitor Shoots Sweetheart, Attempts To Kill Himself.

HAVANA, Sept. 26.—Esthera, daughter of a British merchant, now in Jamaica, was shot four times yesterday, and lies in a critical condition in a hospital here.

Aldo Gambia, an Italian sculptor, whose home is in New York, is charged by the police and the young woman's mother with having shot Miss Wadsworth when she refused to marry him. Gambia is suffering from a gunshot wound through the head. According to the police and Mrs. Wadsworth, the sculptor went to the home of the Wadsworths yesterday morning, and when Miss Wadsworth declined to marry him, he drew an automatic revolver and attempted to commit suicide.

Gambia came here some time ago to compete in the contest for a model for a statue of the Cuban patriot, Gen. Maximo Gomez.

ATTEMPT MADE TO MURDER PILSUDSKI

Three Shots Are Fired at the President of the Polish Republic.

Lemberg, Sept. 26.—Gen. Joseph Pilsudski, president of the Polish republic, narrowly escaped death by assassination here last night. He was entering an automobile in city hall square on his way to a theatre after attending a banquet in his honor when three shots were fired at him. Gen. Pilsudski was not injured, but Count Grabowski, who was accompanying him, was wounded in the leg.

The president directed his chauffeur to drive to a hospital. After being assured that the count's wound was not serious, he insisted on going to the theatre. He was enthusiastically cheered by the audience when he entered.

The would-be assassin attempted suicide, but was arrested before he could end his own life.

WESTERN UNIVERSITY REOPENS ON OCT. 4TH

Largely Increased Arts and Medical Faculties Are Ready For Resumption of Studies Next Week.

When the doors of Western University are thrown open for the fall term, next week, there will be 104 members of the faculty of the above institution on duty. Lectures will be commenced at the College of Arts on Tuesday next, with 39 officers of instruction prepared to do their utmost in training the youth of the province.

The College of Medicine, which has been added to the Faculty of Arts, will open for lectures in the new building on Ottawa street on Wednesday next.

Many New Members. In addition to the above two colleges there is a faculty of ten members at Assumption College, Sandwich, under Very Rev. J. T. Muckle, college president, and two instructors at Ursuline Ladies' College, which institutions are affiliated with Western. Ten new members have been added to the Faculty of Arts during the vacation period following appointments made, while four new faces will be seen on the medical faculty by a similar process.

Some professors at Western are members of both the Faculty of Arts and Medicine. Officers of instruction at Western University are as follows: Medical School: H. H. Bullard, A. B., Ph.D., M.D., professor and chief of the department of pathology; J. W. Crane, M.B., professor and chief of the department of pharmacology; R. C. Deane, M.A., Ph.D., professor of physics; R. Ferguson, B.A., M.D., professor and chief of the department of obstetrics and gynecology; H. W. Hill, M.B., M.D., D.P.H., professor of public health; John A. Macgregor, M.D., professor and chief of the department of medicine; Charles C. Macklin, M.B., professor of histology and embryology; Paul S. McKibben, B.S., Ph.D. (dean), professor and chief of the department of anatomy; George McNeill, M.D., F.A.C.S., professor of radiology; F. R. Miller, M.A., M.B., M.D., professor and chief of the department of physiology; A. D. Robertson, B.A., professor of biology; A. J. Slack, Ph.D., M.D., professor of chemistry; Septimus Thompson, M.D., F.A.C.S., professor of laryngology and otolaryngology; W. J. Hill, M.D., professor of pediatrics; Hadley Williams, M.D., F.R.C.S., F.A.C.S., professor and chief of the department of surgery; J. R. N. Childs, M.D., associate professor of medicine; G. C. Hale, M.D., M.A., associate professor of medicine; N. C. Hart, M.A., associate professor of botany; Emerson L. Hodgkins, M.B., F.A.C.S., associate professor of surgery; William J. Robinson, M.B., associate professor of psychiatry; E. G. ...

LABOR PARTY WOULD NOT INDORSE FARMER

Moncton, N.B., Sept. 26.—The Independent Labor Party, which met here to receive the report of the committee of the U. F. Labor convention, which nominated A. E. Triggs as candidate in Westmorland on Monday, refused to adopt the committee's report and declined to indorse the farmer candidate. In a heated discussion it was claimed that the 40-50 basis allowed the farmers was unfair to the Labor party, and a resolution was passed that a new United Farmer-Labor convention was called, and the choice of a candidate made on a 50-50 basis.

BRITISH MAILS

The next mail for Great Britain and Europe will close at the local postoffice at 10 p.m. on Monday, September 26, to be forwarded via S. S. America, sailing from New York on Wednesday, September 28.

This mail will consist of letters and registered matter only.

"HOLED OUT IN ONE." Montreal, Sept. 26.—During the current season fifty-one players have "holed out in one" in various Canadian golf courses, and of this number, three are women. This is the statement of Ralph Reville of Brantford, who keeps a record of these unique performances. Of the three ladies who made a hole in one, two are of Vancouver and one of Ottawa.

GOOD HARVESTING WEATHER. Calgary, Sept. 26.—Weather during the past week has been exceptionally good for harvesting and threshing, which is practically all completed now in the province. The yields in many cases are somewhat heavier than first anticipated.

MURRELLS MAY BE INDICTED THOUGH ABSENT

Grand Jury Likely To Accept Identification as Grounds For Action.

ATTEMPTED MURDER CASE

Muncey Indian To Face Trial For Attack On Police Officers.

BULLETIN. When court opened this afternoon the grand jury went out in the cases of Sidney E. Murrell, William G. Murrell, and Henry Jack Williams, alias William Henry Vaughan. It is predicted that the grand jury will be brought in, Hon. Mr. Justice Logie instructed the jurors that if several persons went out for a common purpose that all were guilty of any crime that might be committed.

Although Sidney and William Murrell, who have been charged with the murder of Russell Campbell during an attempted bank robbery at Melbourne on April 11, kept away from the law since their escape from jail on September 2, they will in all probability be indicted for murder by the supreme court grand jury at the court house this afternoon.

Henry Jack Williams, another of the bandit gang, who is still in jail, will also have his case brought before the jury, it is thought, and then all three trials will be postponed until the next session of the court in the spring.

All Men Identified. If the Murrells brothers are captured before the next session they will either be jailed until that court sits or a special court for their trial will be ordered. All three gangsters were identified at the preliminary hearing, and this, it is said, will be sufficient to cause the case to be laid before the grand jury.

No mention, it is thought, will be made of the fourth man who has been missing since the day the murder was alleged to have been committed. Although he was wanted by the grand jury, he was not present.

DRUGS ARE STOLEN FROM ARMY STORES

Ottawa, Sept. 26.—A quantity of cocaine and heroin, a derivative of morphine, strychnine and a little liquor, was stolen from the military medical quarters here by some persons apparently addicted to the drugs, and having full knowledge of the layout of the building. The theft was discovered by the night watchman.

Entrance to the building was apparently made by the use of a latch key skeleton key, as the building had been closed at 1 o'clock on Saturday.

The drugs were stored in a cabinet on the second floor, and the thief was apparently aware of its location, as he left no marks of a hurried search.

Only a portion of the drugs stored in the cabinet were removed. The theft of the drugs is believed to have been a blind to cover up the loss of the drugs.

\$300,000 FIRE PARTLY DESTROYS VILLAGE

Haton, Sask., Sept. 26.—Loss of over \$300,000 was caused here yesterday by a disastrous fire which wiped out half the village. The fire started in a pool of kerosene, and by 10 o'clock nothing was left standing of the business section. Nobody was injured.

Sees Man Leap Into Niagara

N. Y. C. Engineer Witnesses Fatal Jump From Steel Arch Bridge.

Niagara Falls, N. Y., Sept. 26.—Authorities are investigating a report made today that a man jumped from the lower steel arch bridge into the Whirlpool Rapids yesterday morning. John J. Burns, of this city, a New York Central engineer, said he saw the man jump and later saw him appear in the rapids 200 feet below, as he was borne by the whirlpool. A short time before Burns claims he saw the man jump, John Paspasaj of Lackawanna, tried to enter Canada, but was turned back by the Canadian immigration officials. Paspasaj never reported at the United States end of the bridge after being rejected in Canada, United States immigration officials say.

Burns describes the man he saw leap into the river as about 30 years of age, slightly built, and wearing dark colored clothes. He climbed the bridge rail carefully and leaped far out.

Going To Rome

Young London Priest Sails From New York Saturday for Holy City.

Lackawanna, N. Y., Sept. 26.—The police here are trying to locate John Paspasaj in connection with a report from Niagara Falls that a young man was seen to jump the lower steel arch bridge into the river.

Paspasaj had been trying for a week to cross the Canadian line to visit his mother, who lives in Hamilton, Ont., and appeared to be much depressed because he had been turned back by immigration authorities at Bridgeburg and Niagara Falls.

Local Man Has Narrow Escape

Shot Fired by Boys Penetrated Mica and Cracked Windshield.

Ralph Benanatt, a local businessman, had a narrow escape from serious injury and possibly death, when driving along the second concession, London Township, Saturday afternoon.

While proceeding along the road, he overtook eight boys, each carrying a rifle. As he passed them, one of the boys cried out: "Give us a ride, mister." Unable to accommodate the lot of them, he kept on and, after going about 25 yards, heard a whining sound close to his ear, and saw the top left-hand corner of his wind shield crack.

Stopping his car and jumping out, he discovered a hole in the mica at the back of his car where a bullet, fired from one of the rifles had penetrated. He immediately ran after the youths, but they scattered in all directions, and he was unable to overtake any of them. Later with the aid of a constable, he captured two of the lads, on Mount Pleasant avenue, but they both declared that they were merely out walking when they met the other bunch and just went with them as company. Both of the lads claimed no knowledge of the identity of the other lads or of their places of abode.

An investigation is being carried out by the county constable, and arrests are expected shortly.

INDIAN LADS USE TOWN RESERVOIR FOR BATHS

North Sydney, N.S., Sept. 26.—Because the police report that budding warriors of the Micmac tribe have been using the place for a bathhouse, the town council has ordered the reservoir to be fenced off, and a "no swimming" sign posted around the town reservoir.

Father Flannery is a London boy. He was born here, educated in the separate schools of the city, matriculated from the local college, and then went to Sandwich College for four years. During his last term there he was on the teaching staff as professor of mathematics and languages.

He returned to London and studied for a time at the University of London.

May Be Necessary To Continue Keeping Up of Control Commissions.

ARRANGING FOR 800,000 Conditions of Versailles Pact Calls For Force of But 100,000 Men.

London, Sept. 26.—The German Government is charged with still deliberately evading the peace treaty as regards the size of the German army in a special article, which is the feature of today's issue of the London Times. Instead of observing the limitations under the treaty of the army to 100,000, Germany, according to the article, which the newspaper says is based on "unimpeachable information," is attempting to make provision to clothe, house and equip 800,000 men.

The Times says the matter is urgently important, as the withdrawal of the inter-armed control commissions has been mooted, and also because limitation of armaments is the foremost item in the approaching Washington conference agenda.

The Times contends that it will be necessary to maintain and vigorously support the control commissions for some time, possibly two or three years, until the new military system in Germany is established on a non-aggressive and democratic basis.

DISCUSS PLANS OF ECONOMIC BLOCKADE

League Assembly Considers Best Methods of Applying It As Weapon.

Geneva, Sept. 26.—Methods of applying the economic weapon of the League of Nations against a country which violates the provisions of the covenant of the league came before the assembly of the league this morning, when the blockade committee submitted its report.

The committee found it was impossible for the league to decide before the assembly in detail the various steps of an economic, commercial and financial nature that should be taken in each case. It proposed that the council of the league make recommendations to the member states to be taken in joint action when necessary should arise.

Interruption of diplomatic relations would first be limited to the withdrawal of the heads of diplomatic missions. The committee held, however, that the economic relations might be maintained, if prolonged application of economic pressure was necessary, it should progressively be made more stringent.

In the resolutions that were proposed, provision was made that if a country might for a certain period be released from the obligation of blockading another country if the conditions were such as would involve especial danger to those states.

An important question facing the assembly at the beginning of this debate was how to get action on the proposals of the committee under the rule requiring unanimity, this rule not yet having been adopted. Lord Robert Cecil, representing the Union of South Africa, recently made a motion that the rule be suspended, but it was referred to the constitutional committee. An effort will be made to obtain a vote on this motion before leaving Geneva on the resolutions regarding the blockade.

THE WEATHER

Following are the highest and lowest temperatures recorded in London during the 24 hours previous to 8 o'clock last night: Highest, 67; lowest, 45.

The official temperatures for the 12 hours previous to 8 a.m. today were: Highest, 56; lowest, 41.

BAROMETRIC STANDING. Sunday—8 a.m., 29.96; 8 p.m., 29.25. Today—8 a.m., 29.43.

TOMORROW—WARMER. Toronto, Sept. 26—8 a.m. Forecasts. Today—Moderate winds; fine. Tuesday—Moderate to fresh south-west winds, with stationary or a little higher temperature. Temperatures. The highest and lowest temperatures during the 24 hours previous to 8 a.m. today were: High, 58; Low, 48; Fair. Victoria, 58; 49; Cloudy. Calgary, 80; 44; Fair. Winnipeg, 65; 29; Fair. Port Arthur, 69; 25; Clear. Toronto, 69; 43; Clear. Kingston, 65; 50; Clear. Ottawa, 64; 44; Clear. Montreal, 64; 48; Fair. Quebec, 58; 45; Cloudy. Father Point, 64; 44; Cloudy.
