# SEMI-WEEKLY BRITISH COLONIST.

Saturday, September 11, 1869

Lord and Lady Byron.

where the events really happened. Mrs. Stowe faithfully kept the secret.

Lady Byron died, and since her death

publications have been made, particu-

larly the recent book by Countess

Guiccioli (Byron's Italian mistress), in

which the whole blame of Byron's reck-

less and wicked life is laid to his wife's

charge. It was to her narrow selfish-

ness and icy coldness, the mishaps of

the great poet were due, and while the

popular mind has lavished its tenderest

sympathy on Byrcu, it has only had

caustic criticism for his wife. Mrs.

Stowe, after Lady Byron's death, ex-

pected that the truth would be told in

England, but as it has not, and as

fresh provocation has been given by the

book of Byron's former mistress, and

its extensive circulation in the United

public the disclosures made to her by

Lady Byron, whom Mrs. Stowe not

only believes to have been a lady of

one of the most sincerely devoted

Christian and charitable woman in

England-one in whom long suffering

had developed traits of angelic holi-

Lady Byron, according to Mrs. Stowe

-and this part of the story we shall

pass over briefly-impersonated consci-

ence to Lord Byron. Soon after mar-

riage she became acquainted with the

States, she deems it her duty to make logt influence, and in her last sickness and

Fiscal Reform.

It will be reconnected as a commission to revise the Tariff of Customs, with a view to adapting it to the commercial wants and necessi-ties of the Colony. The report of the name one of her friends, and war and the two ladies. Subsequently, ties of the Colony. The report of the naws made the confidant by Lady Byron of all the circumstances attend, and was made the time to this commu-been our privilege to perses the report, yet we have reason to believe that it is of a character everyway creditable to the gentemen composing the Commis-sion and befitting the importance of the sion and befitting the impor It will be recollected that some

view to relieving as far as possible that of class of goods likely to become important articles of export, so as to confer upon the commerce of the place the add vantages of a free port, in so far as that can be done without a free po.t. That the adoption of such a tariff would have a tendency to ease off the existing commercial pressure and operate more or less in the right direction cannot well be doubted ; but we must confess that the period which has elapsed since the appointment of the Commission has greatly tended to strengthen and confirm the impression that whatever amelioration may be attained in this way it is to a complete removal of those restrictions which have driven commerce away that we must look as the only effective. means for its restoration. In this opinion we venture to think that we are in harmony with the commercial mind of the Colony. Indeed there is evidence of this to be found in the fact that in their report the Tariff extraordinary talent and genius, but Commissioners recommend a return to the free port system, as a more effective remedy for the commercial depression that existe than can be found in any modification of the Customs Tariff. Representing as they do the commercial opinions and interests of the place, the recommendation of the Commissioners upon this subject will be entitled to the greatest consideration at the hands of the Executive. Nor is that claim for con- terrible secret that afterwards shaped eideration lessened by the circumstance of both their lives. Byron had become two members of the Commission balonging to the father of a child by an incestuous the Mainland portion of the Colony. With liason with his sister. It was his conthe broader question of Free Port, as viewed sciousness that his wife had discovered in the light of Confederation, we do not pro- the crime that drove him so near to pose to deal in the present article; but it madness, and inspired in his mind a will be as well for the public mind to be hatred of her. The sister was an in- nato. The wounded man placed his prepared for decided action in reference to a subject upon which appears to hinge the we would seek in vain for a restoration of a Free Port; but it should be borne in mind that if we are a Crown Colony, and comparatively insignificant in so far as revenue and population are concerned, we are nevertheless self-supporting, and ought to have the privilege of managing our own affairs. The Imperial Government cannot with any show of reason or justice tell us that we need expect no paternal assistance and at the same time deny us the right to adopt such a fiscal policy as will best enable us to pay our way, provided that policy has nothing in it repugnant to constitutional principles. can hardly be urged, therefore, that if the Colonists be minded to adopt a Free Port, the Imperial authorities will say may; for there is nothing in the system that is new or in any-way inconsistent with or repugnant to Imperial policy, or Colonial practice. For our own part, we regard Confederation as the certain destiny of this Oolony: moreover, we believe its attainment upon fair and equitable terms to be the desire of the great bulk of the Colonists. Whether Confederation is to be a permanent condition, or a mere stepping-stone to Annexation we will not now stop to enquire : that must greatly depend upon the course adopted by the parent Government. But we fail to discover in a policy which would restore the Free Port to Victoria anything incompatible with our existence either in our present condition as a British Colony, or in our prospective condition as a Province of the Dominion. If therefore, the people are conwince that it would be to their interest to have a Free Port, there is no power on earth hearsed the story of his own life. Manthat has the right to say they shall not have fred is a gloomy misanthrope, dwelling with it! Furthermore we feel convinced that if impatient remore on the memory of an inthe people go about it with unanimity and pertinacity success is certain. The regular quarterly communication o the District Grand Lodge, E. R., of British his own heart and judged himself severely, Mrs. Stowe declares is apparent from his Columbia, was held last evening.

dition with him, in preserving the secret of Coughs, Colds, Rheumatism, Diarrhea, his fault. She had him in her power and Dysentery, and Fever.

From the Pittsburg Commercial. Soon after the publication of 'Uncle Tom's Cabin' had made Mrs. Harriet December Stown the literary songetion of Beecher Stowe the literary sensation of the day, that lady visited England, and was made much of by the aristocracy and literary classes. Lady Byron be-with him before the public. When Byron be-with a bore diseases, and is indispentile to Engrants, Travellers, and Families, a few doses being senset is self in some publication or other, which drew her and her private relations with him before the public.

not, know that it cures their neighbors and intends, and all know that what it does once it does always, —that it never fulls through any fault or neglectof its composition." We have thousands upon thou-sands of certificates of their remarkable cures of the following complaints, but such cures are known in every neighborhood, and we need not publish them. Adapted to all ages and conditions in all climates; containing neither calomel or any deleterious drug, they may be taken with safety by anybody. Their sugar coating preserves them ever fresh and makes them pleasant to take, while being purely vegetable no harm can arise from their use in any quantity. —They operate by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action — remove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and by correcting, wherever they exist, such derange-ments as are the first origin of disease. —Minute directions are given in the wrapper on the box, for the following complaints, which these

For **Dropsy** and **Dropstcal Swellings** they should be taken in large and frequent doses to pro-duce the effect of a drastic purge. For **Suppression** a large dose should be taken as it produces the desired effect by sympathy. As a Dinner Pill, take one or two Pills to pro-mote digestion and relieve the stomach. An occasional dose stimulates the stomach and bowels into healthy action, restores the appetite, and invigorates the system. Hence it is often ad-vantageous where no serious derangement exists. One who feels tolerably well, often finds that a dose of these Pills makes him feel decidedly better, from their cleansing and renovating effect on the diges-tive apparatus. DR. I. C. AYER & CO., Practical Chemists.

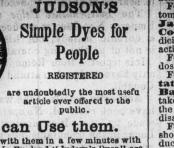

DR. J. C. AYER & CO., Practical Chemists LOWELL. MASS., U. S. A.

disorders, which were ag-gravated by the scroft-lous contamination until they were painfully afflicting, have been radically cured in such great numbers in almost every sec-tion of the country, that the public scarcely need to be informed of its virtues or uses. Scroftlous poison is one of the most destructive enemies of our race. Often, this unseen and unfelt tenant of the organism undermines the constitution, and invites the attack of enfeebling or fatal diseases, without excitting a suspicion of its presence. Again, it seems to breed infection throughout the body, and hen, on some favorable occasion, rapidly develop into one or other of its hideous forms, either on the surface or among the vitals. In the latter, tuber-cles may be suddenly deposited in the lungs or heart, or tumors formed in the liver, or it is hows its presence by eruptions on the skin, or foul ulcercles may be suddenly deposited in the lungs or heart, or tumors formed in the liver, or it is shows its presence by eruptions on the skin, or foul ulcer-ations on some part of the body. Hence the occa-sional use of a bottle of this Sareaparilla is ad-visable, even when no active symptoms of disease appear. Persons afflicted with the following com-plaints generally find immediate relief, and, at length, cure, by the use of this SARSAPARIL-LA: St. Anthony's Fire, Rose or Erysipelas, Tetter, Salt Rheum, Scald Head, Ringworm, Sore Eyes, Sore Ears, and other eruptions or visible forms of Scrofulous disease. Also in the more concealed forms, as Dyspepsia, Dropsy, Heart Disease, Fits, Epilepsy, Neuralgia, and the various Ulcerous aftections of the muscu-lar and nervous systems. Syphilis or Venercal and Mercurial Diseases are cured by it, though a long time is required for subduing these obstinate maladies by any medicine. But long continued use of this medicine will cure the complaint. Leucorrhæa or Whites, Uterine Ulcerations, and Female Diseases, are com-monly soon relieved and ultimately cured by its purifying and invigorating effect. Minute Direc-tions for each case are found in our Almana, sup-plied gratis. Rheumatism and Gout, when caused by accumulations of extraneous matters in the blood, yield quickly to it, as also Liver Complaints, Torpidity, Congestion or Infam-mation of the Liver, and Jaumice, when arising, as they often do, from the rankling poisons in the blood. This SARSAPARILLA is a great re-storer for the strength and vigor of the system. blood. This SARSAPARILLA is a great re-storer for the strength and vigor of the system. Those who are Languid and Listless, Despon-dent, Sleepless, and troubled with Nervous Ap-prehensions or Fears, or any of the affections symptomatic of Weakness, will find immediate relief and convincing evidence of its restorative power upon trial.

mate of the house. Lady Byron, according to Mrs. Stowe, did not leave her husband, but was driven from home future destiny of the Colony. It is a grave that he might give himself up to the question whether it would not be wise to ap- guilty infatuation that was consuming proach the subject of a Free Port without dir- him. When she went to his room to bid ect reference to Confederation ; that is to say, him a last farewell, she found Byron that the people, acting as a separate Colony, and the partner of his sins sitting to should adopt that system now, and leave it to gether. She said : "Byron, I come to subsequent negotiation to confirm it to us say good bye,' offering at the same time under Confederation. It may be said that her hand. He put his hands behind as a separate and insignificant Crown Colony him and retreated to the mantle piece, that stood there, with a sarcastic smile, said : 'When shall we three meet again ?' Lady Byron answered, 'In Heaven, I trus',' and these were her last words to him on earth. To get at the depth of Lord Byron's depravity and deceit, after reading this it is only necessary to read the 'Fare Thee Well' he subsequently addressed to Lady Byron through the printer-

"Fare thee well, and if forever, Still forever fare thee well, Even though unforgiving, never 'Gainst thee shall my heart rebei."

Before their separanion, Lord Byron attempted to make his wife the accoms plice in his crime and by destroying her faith in christianity and confusing her sense of right and wrong, to bring her into the ranks of those convenient wointo the ranks of those convenient wor-men who regard the marriage tie as only a friendly license on both sides. All his powerful intellect was brought to bear to produce the result. He advo-cated the good humored marriage of the continent, with its mutual infidelities, and gave her to understand that only in this way could they have a peaceful and notwithstanding the late hours of the latter friendly life. She answered him simply and their 200 additional members. Seventeen friendly life. She answered him, simply, Peers have died since the beginning of the 'I am too truly your friend to do this.' Mrs. Stowe also narrates the brutality of and only child. Her invariable excuse for these paroxisms of unmanly brutality was Taunton and Wynford. The viscountcy of that he was insane.
