BABY'S OWN TABLETS

No medicine receives such great praise from thankful mothers as do by the Uttoxeter theatrical troupe, Baby's Own Tablets. Once a mother has used them for her little ones she will use nothing else. The Tablets are a mild but thorough laxative. They regulate the bowels and stomach: drive out constipation and indigestion; cure colds and simple fevers; promote healthful sleep and make sions music was furnished by the teething easy. Concerning them Mrs. Omer LeBleu, Maddington Falls, Que., writes :-- "I am well satisfied with Baby's Own Tablets and will always use them for my little ones." The Tablets are sold by medicine dealers or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

WOMAN PLEADED FOR CANDOR

Matron Announcing Nearness of Birth day Found Truth Not So Attrac tive After She Got It.

A woman with a birthday in sight spoke earnestly to three men who were her friends, writes Ella Randall Pearce, in life.

"Tomorrow will be another birth-day for me," she said. "I know the freshness of my youth has departed; but I should like to know just how old I appear in the eyes of the world. Tell me, my dear friends, if you were looking on me for the first time what would be your impressions?"

Said the first man glibly: "I have known you for several years, and you appear the same as when I first saw you. Your beauty is undimmed; your charm is undiminished. If I did not know otherwise, I should say tomor row would be your twentieth birthday." Said the second man more slowly:

"I, too, have known you for several years, but it seems to me you have been favored by time. Your beauty has ripened and deepened until now you, who were once a lovely bud, are a lovelier rose in bloom. I should count tomorrow as the beginning of your twenty-fifth year."

"And you," queried the woman of the third man, who had been regarding her with clear-eyed frankness. "Between friends there should al-

ways be truth," he replied gravely. "I acknowledge your beauty and your charm and both have been wonderfully preserved in semblance of youth. But you ask for candor and you shall have it. Looking at you closely, I should not expect you to see thirtyafter tomorrow.'

The woman faced the three men who were her friends, and her eyes were gleaming while her cheeks' pink turned crimson. She pointed an accusing finger. "You have lied," she said tremulous

ly, "and you also. But I will forgive you both because you lied to please me. But you"-she whirled toward the last speaker--- "you are a barbarous egotist. You have wounded me in or-der to maintain your own reputation for veracity. Truth, indeed! Your honesty offends me. We are no longer friends. Go-and quickly !"

"Whew!" exclaimed the third mass as he strode through the outer daring ness. "I wonder what would have happened to me if I had really told her the trath?"

New Boomerang Bullet. The discussion of the war is heard everywhere. Even negro janitors find time while shoveling on the coal te talk about it, says a New York news letter. Two of them were discussing the wonderful inventions brought about by the war. "The man Edison is some boy," said one of the negroes. "How's that?" inquired the other. "Why he's done gone and invented a magnetize bullet dat can't miss a German, if it

calls some invention." exclaimed the

Ground Moles Are Big Eaters. A Scotchwoman has just announces the results of an interesting series of observations on the common mole. The most striking point to the layman in the inordinate appetite of this ting creature. A mole will eat its own weight in earthworms in 24 hours. An ordinary man eating in the same retio would require 150 pounds of food a day. If the human race were constituted like the moles, comments and exchange. Mr. Hoover's task would be hopeless from the outset. One of the moles which was a subject for study weighed four ounces and devoured 120 ounces of food in a single month.

Electric Ship Has Future. The electric ship is no longer # dream but a reality and I should not be surprised to find, within a few years of the close of the war, every new vessel of any size driven, steered, stopped, reversed of turned, merely by the pressing of a series of buttons on the bridge, says a writer in the Electrical Times, London. The application of this principle will enable ships to be run with the highest efficiency at an even speed, permit marine englneers more liberty of design and yield proportionately greater cargo space than the present cumberous form at machinery allows,
