FRIDAY, MAY 26, 1922

A heading in a Toronto paper is "What Do Women Want?" That's easy. The unmarried ones want husbands and the married ones want money and bargain sales.

Members of the House of Commons require two days to observe the memory of the late good Queen Vic, but ordinary voters must be content with one.

Calgary Albertan—Is the day close at hand when moving picture films will be broadcasted by wireless, enabling families to have the best movies right in their homes, on a sheet pinned to the wall?

Mary Pickford has started to accumulate a library. Well, she won't have to turn the book agents away because she is short of the price to buy any expensive work she desires, like many of us are obliged to do.

The open season for gasoline price advances has begun. The way the American oil companies are putting up prices, two or three advances in a couple of weeks, suggests a combined effort to ref in the hay during daylight saving. The oil companies in Canada are getting the fever also.

The Drury Government is out for the coin. Liquor export warehouses will be asked to pay a tax of \$15,000 each year into the coffers of the Province, and a flat five per cent. on all part-mutuel wagers at race tracks will have to be turned over daily to the Province. Furthermore, legislation will probably earmark an increase in the fee for motor car licenses next year.

Fifty persons were arrested and fined when a raid was made on a cooking main in Montreal recently but the detective who caused the arrest had to do some crowing to gain admittance. In the good old days one could carry his rooster to the back lot under his arm and the neighbors could gather around without interference.

Kitchener, Welland and some other towns are squabbling about standard and daylight saving time. This question, one would think, could be easily settled to the satisfaction of all by adopting standard as the time to go to work and daylight time for the hour of quitting work. This would be a fair compromise and should be acceptable to all parties. Fifty-fifty, so to speak.

It was stated in the House of Commons Monday that the dining cars on the government railways were run at a loss of \$117,394.22 during 1921. Judging by the charge made for sufficient food to take the edge off one's appetite one is inclined to think that the figures must mean a surplus not a deficit. By the way where did they get that odd twenty-two cents? Anything so small as that could not be found in a dining car with a magnifying glass.
