REV. ALEX. GILRAY,
College Street Presbyterian Church, writes:
Dear Sirs,—

It is with much satisfaction that I learn that you have decided to establish a branch office in Toronto, believing as I do, that the more widely your Acetio Acid remedy is made known, the greater will be the gratitude accorded to you for the relief experienced by many sufferers in Canada. We have used your Acid for over eighteen years, and are now prepared to state that it is worthy of a place in every family. We have found it thoroughly safe and effective and have commended it to many,—for which we have been thanked. We wish you success in your new quarters, as we feel sure your success will bring relief here as it has already done to large numbers in the old land and other countries. Much will depend on the patient and persevering use of the Acid as set forth in your little book.

The exports of briquettes from Belgium
in the first eleven months of last year amount-
ed to 437,281 tons, as compared with 313,833
tons in the corresponding period of 1892, and
328,566 tons in the corresponding period of
1891. France was the largest foreign con-
sumer of Belgian briquettes, having imported
207,887 tons in the first eleven months of
last year, as compared with 161,006 tons in
the corresponding period of 1892, and 173,268

It begins to look now as if we would be
able pretty soon to "ring up" Europe over
the 'phone. The question of ocean telephony
is being earnestly studied, and for a month
experiments have been carried on. The re-
sults that have been obtained are the talk of
the scientific world. Keen attention to the
subject has been caused by the invention of a
new electric wire, and, according to some
eminent authorities, it may revolutionize the
present system of long-distance talking.—

Thousands of photographs of lightning have
been secured during the last few years, but
until last month there was no known record,
made in this way, of the globular form of
lightning. Such a one is said to have been
obtained by Dr. Kemphill, of Kingstown,
England, on November 9, during a terrible
storm. This negative exhibits both the ordi-
nary sinuous flashes, and, on the surface of the
sea, a number of fireballs, joined together by
horizontal lines of light, and resembling "the
course of a ball of wool played with by a
kitten."

MR. M. ROBERTSON (Revell & Co.'s
Bookstore, Yonge street, Toronto), says:—
"My mother owes her life to the timely use of
Acetocura."

It is not always the direct shock of the
lightning stroke that does the greatest damage.
The discharge acts powerfully by induction on
all conductors in its vicinity, producing thou-
sands of momentary but intense currents,
which when they leap across minute intervals
give rise to sparks which may start fires, or
explode gunpowder. One of these induction
currents, in leaping from one metallic thread
to another in a table-cover, set the table on
fire, and in another instance the transmitter of
a telephone was destroyed in the same way by
the fusion of part of the wire in the coil.

An observation made by Messrs. Richards
and Rogers, of Harvard University, is of
interest to chemists, as it may necessitate the
redetermination of the atomic weights of some
of the best-known metals. They find that the
oxides of copper, zinc, nickel, and magnesium,
when prepared from the nitrates, always con-
tain a large amount of occluded or absorbed
gas, chiefly nitrogen, which in the case of
magnesia exceeds a cubic inch to the gramme.
This affects the values hitherto accepted as
correct, so much that they can now only be
regarded as approximations.

M. Hammerly, a well-known business man
of Hillsboro, Va., sends this testimony to
the merits of Ayer's Sarsaparilla: "Several
years ago, I hurt my leg, the injury leaving
a sore which led to erysipelas. My sufferings
were extreme, my leg, from the knee to the
ankle, being a solid sore, which began to ex-
tend to other parts of the body. After trying
various remedies, I began taking Ayer's
Sarsaparilla, and, before I had finished the
first bottle, I experienced great relief; the
second bottle effected a complete cure."

"The unemployed," says the Philadelphia
Press, "are always subject to exaggeration at
a time like this. For the entire country Brad-
street's places the number at 800,000, Mr.
Edward Atkinson at not over 1,150,000, and
Mr. W. M. Grosvenor at 1,200,000." [Our
investigation was made some time ago, and by
an error was at least 75,000 too large. It
would be interesting to know the bases of the
other aggregates mentioned.—Ed. Bradstreet's.]

According to Bonfort's Wine and Spirit
Circular Italy is the greatest wine-producing
country in the world, "her annual production
amounting on an average to 675,000,000 gal-
lons." France and Spain come next, each with
about 616,000,000 gallons. The combined pro-
duction of Austria and Hungary each year is
some 215,600,000 gallons; that of Portugal
132,000,000; Russia, 73,700,000; Greece, 57,-
200,000; Roumania, 52,800,000; Germany,

The largest continuous distinct forest dis-
trict in West Prussia is known as the
Tucheler Haide, and extends over an area of
thirty-five square miles. It is subject to great
and sudden changes of temperature. Snow
has fallen as late as May 19, and night frosts
have occurred as late as the 1st and 3d of June.
Prehistoric remains are found belonging to the
later stone and to the bronze ages. The in-
habitants are occupied almost entirely with
forestry and agriculture. Polish is still the
prevalent language, though German is now
generally understood.—Popular Science Month-

The American Building at the Antwerp
Exposition, both in site and construction, will,
it is said, be one of the most favored in the
Belgian enclosure. This building and its
annex will contain 26,500 square feet of space.
In addition to this 60,000 square feet has been
allotted to the American section in the Indus-

A remarkable story of a ride upon an
avalanche comes from Atlanta, in the Saw-
tooth Mountains. Charles Goetz was hunting
in the mountains near Atlanta when the snow
started under his feet. He was unable to
extricate himself from the moving mass, and
in a few moments he was being carried along
upon the breast of a roaring avalanche. The
slide rushed down into a rocky, precipitous
canon, but Goetz went through alive. He
was found eleven hours afterwards by a rescu-
ing party, and, though terribly bruised, he is
in a fair way to recovery.
