

PART II (Objectives)

- (A) Explain how the proposed activity supports Canadian efforts to identify, promote or establish joint research and technology development project(s) between Canada and Europe.

- (B) Indicate: how the project could lead to scientific or technological progress of industrial or economic benefit to Canada; or how the project could have commercial applications.

- (C) Indicate whether the proposal relates to an area of interest in Canadian science and technology policy or in one of the existing bilateral co-operative programs between Canada and the following European partners: European Community, Germany, France and Norway. Connection with EUREKA or other European multinational programs should also be indicated.

- (D) Indicate whether your project is part of the research program of your organisation.
