#### DEPARTMENT OF SUPPLY AND SERVICES—INVENTORY LEVELS

##### Question No. 2,020—Mr. Reynolds:

What are the established guidelines for minimum safe inventory levels within the Department of Supply and Services' warehouses?

**Hon. Jean-Pierre Goyer (Minister of Supply and Services):** The point at which action is taken to increase inventory levels is based on anticipated usage over the time it will take the supplier to deliver the materiel to the department's warehouses. Due to variations in both the anticipated usage and delivery time, a safety stock is required in addition to the above to ensure that the majority of customer demands can be filled. In so far as DSS is concerned, a safety stock level of 28 days of anticipated sales based on historical usage data is maintained for each stocked item in the inventory.
