BEFORE RAILWAY COMMITTEE.

Canadian Northern Must Put in a Derailing Apparatus.

Ottawa, Jan. 6.—There was a large attendance at the meeting of the Railway Committee of the Privy Council to-day.

The Grand Trunk, the Canadian Pacific and the Canadian Northern officials were present.

The greater part of the forenoon sitting was taken up with a discussion raised by Mr. Lash, for the Canadian Northern, against the use of derailing apparatus.

He held that the derailing apparatus was wrong in principle. It made an accident certain when there might otherwise be no accident at all.

Mr. Lash's Opinion.

The discussion rose on an order for the adoption of this apparatus at Port William and Port Arthur. Mr. Lash also objected to his company being saddled with all the costs merely because his road was the junior road, seeing that the increase of traffic was entirely the cause for the increased production. For improvement at crossings of this kind he would have a fixed amount as the minimum cost and cost apportioned on the basis of the use made of it. A wheeled basis would be the proper thing. It was not fair, he said, that a railway with one train a day should pay for all the cost of improved crossings when the other road had a hundred trains crossing per day.

Mr. Lash's Opinion.

Mr. Blair asked if there was any one else present who would support the view of Mr. Lash, but there was no response.

Mr. Creelman appeared for the C.P.R. and supported the order as already made.

Mr. Blair asked Mr. Creelman to argue the question of apportioning the cost, as the other part of the order would stand.

The committee decided that the apparatus should be put in at the cost of the Canadian Northern, as when the crossing was first granted it was on the grounds that the company should pay all the cost.

The crossing must be put in by the first day of June next.

Mr. Blair asked Mr. Creelman to argue the question of apportioning the cost, as the other part of the order would stand.

FATAL VAPOR BATH.

Mrs. David Patterson, Aged 83, of Chesley, Passes Away.

Chesley, Jan. 6.—A highly respected lady, 82 years of age, named Mrs. David Patterson of this place, died yesterday from the effects of a severe cold. She received while taking a vapor bath, she died. Her condition appeared to be rapidly improving up to a few hours before she died, when she took a sudden turn for the worse. She leaves a husband and one son and two daughters to mourn her loss.

SHAH WAS AFRAID.

Hence He Transferred One of His Provincial Governors.

Berlin, Jan. 6.—A despatch to The Cologne Gazette from St. Petersburg, says Prince Ritz Daulich, Governor of Toberan, capital of Persia, has been transferred to the Governorship of Arak, as the Shah feared a revolution under Prince's leadership. The latter is said to be under British influence. Other officials at Toberan, suspects a husband and one son and two daughters to mourn her loss.

JOHN R. COSTIGAN DEAD.

Son of Hon. John Costigan Dropped Dead Monday.

Winnipeg, Man., Jan. 6.—John R. Costigan, one of the best known lawyers in the west, dropped dead at his home last night. Death came without warning. Costigan was a son of Hon. John Costigan. He came to Alberta about 15 years ago, and since then has been practicing his profession at Calgary and Macleod.

Discrimination of Railways.

Washington, Jan. 6.—Representatives of the Pittsburg Glass Company testified before the Interstate Commerce Commission to-day in substantiation of the charges that the railroads are discriminating against American manufacturers in their import and domestic freight tariffs.

FOR EIGHT LONG YEARS

Postman Johnson Had Catarrh—Used Catarrh Remedies, Snuffs, Washes and Sarsaparillas, But Got Only Temporary Relief.

Then One Happy Day He Tried the Life-Giving Powley's Liquefied Ozone—Seven Bottles Made Him a Well Man.

Now He Eats Well and Sleeps Well and Pronounces Ozone the Most Perfect Blood Purifier Sold.

That the only way to cure Catarrh is to get right at the seat of the trouble and reach it through the blood is proven by the experience of Postman M. F. Johnson, 385 Rivard street, Montreal. For eight or nine years he suffered from Catarrh of the head and stomach, but half a bottle of Powley's Liquefied Ozone improved his condition and seven bottles effected a permanent cure.

Mr. Johnson's statement of his case:

Montreal, Feb. 8, 1902.

The Ozone Co., Toronto, Ont.

Gentlemen:

I have been suffering for eight or nine years from Catarrh in the head and stomach, and have used all the catarrh remedies, snuffs, washes and sarsaparillas, but have only temporary relief. I saw your advertisement in The Montreal Herald and procured a bottle of Ozone, and before it was half used I found it was doing me good and going to cure me, which it has done after using seven bottles. The pain in my head has all disappeared and the hawking and spitting in the morning is no more. I get good sleep now since taking Ozone and can eat my breakfast, something I could not do before using Ozone.

I honestly believe that Ozone is one of the best blood-purifying remedies on the market to-day, and anyone following the directions and instructions in your book will surely be cured of any ailment of the body.

I remain, truly yours,

(Signed) M. F. JOHNSON.

385 Rivard St., Montreal, P.Q.

Mr. Johnson is Not the Only One.

The following are a few of the many persons who have been cured of Catarrh by the use of Powley's Liquefied Ozone:

Ernest H. Cross, 321 Hypocrite St., Montreal.

James L. Schott, 27 Voyer St., Montreal.

W. H. Gould, 217 Hamilton Road, London, Ont.

James A. Patterson, 20 Main St., St. John, N.B.

J. A. Mooney, 2143 St. Catherine St., Montreal.

Fred Fortier, Maisonneuve, Montreal.

J. J. Fournier, St. Constant in Prairie, Que.

J. S. Goyer, 476 Laval Ave., Montreal.

Mrs. D'Antoni, 127 Bessier St., Montreal.

Walter D. Kew, 23 Maplewood Ave., Toronto.

If it is convenient for you to interview any of these persons call and have a talk with them. It is not possible to write them. You will find there is no uncertain sound in their praises of the merits of Ozone.

Ozone is sold everywhere at 50 cents and \$1.00 per bottle. Our book on Catarrh for the asking. Address The Ozone Co., Limited, Toronto, Ont.

LEAD MINERS OF THE WEST WANT AMPLER PROTECTION

Representatives of Fifty-Three Properties in the Kootenay District Go on Record for a Reciprocity of Tariffs With the United States.

Sandwich, B.C., Jan. 6.—At a meeting of the silver lead mine owners of East and West Kootenay, held at Sandwich, B.C., at which fifty-three mining properties were represented, the following resolution was presented by J. L. Parker of the North Stars Mine, and seconded by A. C. Gard of the Payne Mining Company, and carried unanimously:

1. Whereas the silver lead industry of British Columbia, notwithstanding the unusual prominence of the ore, the proved continuity of the veins and the favorable natural conditions of mining in the province, is and for some time has been, in a declining condition, which if not ameliorated will end in total stagnation. And

2. Whereas the silver lead mining industry of the United States, and particularly those in the adjoining State of Idaho, are, and for years have been, enjoying great prosperity, due to a protective tariff, conserving the home market. And

3. Whereas the silver lead mining industry has been for some years of national importance, and unless allowed to decline, will speedily attain to a much greater degree of importance, benefiting by its increased expenditures the trade and advancement of both Eastern and Western Canada. And

4. Whereas our domestic market for the manufactured products of lead is chiefly supplied from products of ores mined in Mexico and Europe, where the labor cost of production is much lower than in this country, a condition of affairs permitted by the wholly inadequate protection afforded by the existing tariff, while the prices of white lead, lead pipe, sheet lead and shot in the Dominion of Canada are approximately equal to the prices charged for the same commodity in the United States, all to the detriment of producers, consumers and transporters of lead in this country. And

5. Whereas under the existing tariff, little or no protection is afforded to the Canadian producer of lead, and adequate protection is afforded to all other industries of equal importance known to us. And

6. Whereas these conditions result in the exportation of a preponderance of our crude ore and bullion, the former to American smelters, and the latter to the markets of the world, there to enter in competition with the products of cheap European and Mexican labor, and the surplus product of the protected lead industry of the United States.

Therefore the silver lead miners of the East and West Kootenay in convention assembled do hereby recommend and respectfully urge the enactment of a tariff act which will afford ample protection to the producers, manufacturers and transporters of lead, thereby creating and fostering a new and expansive home industry calculated to benefit all classes by the stimulation of national trade and commerce.

Equal to U.S. Duty.

Having in view the interests of the producers, manufacturers and consumers of lead we would recommend a duty equal to that imposed by the United States, viz., on lead in ores 1-1/2 cents per pound, on lead in bullion bars and old lead, 2-1/2 cents per pound; on lead in pipe, shot, etc., 2-1/2 cents per pound; on lead in sheet, etc., 2-1/2 cents per pound.

It is further recommended that the duty as provided in the Dingley Tariff Act of July 28, 1897, be maintained, and that the duty on lead in ores be increased to 1-1/2 cents per pound.

It is further recommended that the duty on lead in bullion bars and old lead be increased to 2-1/2 cents per pound.

It is further recommended that the duty on lead in pipe, shot, etc., be increased to 2-1/2 cents per pound.

It is further recommended that the duty on lead in sheet, etc., be increased to 2-1/2 cents per pound.

It is further recommended that the duty on lead in ores be increased to 1-1/2 cents per pound.

It is further recommended that the duty on lead in bullion bars and old lead be increased to 2-1/2 cents per pound.

It is further recommended that the duty on lead in pipe, shot, etc., be increased to 2-1/2 cents per pound.

It is further recommended that the duty on lead in sheet, etc., be increased to 2-1/2 cents per pound.

It is further recommended that the duty on lead in ores be increased to 1-1/2 cents per pound.

It is further recommended that the duty on lead in bullion bars and old lead be increased to 2-1/2 cents per pound.

It is further recommended that the duty on lead in
