A WANT SUPPLIED.

Having noticed lately the eagerness of purchasers of Ready-Made

Clothing to get a better article than that which is imported from Mon-

triel, I have decided this coming year

To Fill the Bill.

I am now showing a line of Custom Made Clothing at Ready Made

Prices.

Ask to see the Fifteen Dollar Custom Made Overcoats.

A few suits of Montreal clothing that I have on hand I will close out

BELOW COST. I would also call your attention to the fact that I

am closing out my stock of Gents' Furnishings, consisting of—White

and Regatta Shirts, Neckwear, Suspenders, Collars, Cuffs, Caps, Silk

Handkerchiefs, etc., consequently

OCCIDENTAL ODDITIES.

A Graphic Description of a Trip
across the Continent in Winter.

By a Frederictonian.

Continued from last issue.

Winnipeg has a population of 30,000 people, and is a remarkably fine and live city. Situated at the junction of the Red and Assiniboine rivers, it commands trade of the North and West and is certainly destined to grow very large. The C. P. R. has here its chief workshops between Montreal and Van- couver, and the train yard contains 20 miles of sidings. The city is perfectly level like Fredericton. The main street is 3 miles long and very broad and beautiful. There are electric cable cars and electric light, a fine hospital, a creditable city hall, great flour- ing and grain elevators and a common an- droid population. Many railways cross- over. The Hudson Bay railway, from Win- nipeg to that great sea, is already complete. We as should leave 40 miles Northwest. Everybody who comes here is delighted with the place and the people, and we ourselves did not know it with many regrets. On the train west of Winnipeg I met introduced to Mr. James A. Smart, Commissioner for Mani- toba to the World Fair at Chicago. He in- formed me that the provincial exhibit will be very large and varied, but will of course principally consist of grain and their man- ufactured products. The government has fenced the space allotted to them in the World Fair buildings entirely inadequate for their wants and the arrangements for clas- sification very undesirable. Premier Greenway building a separate palace, 240 feet long by 40 feet wide, four stories in height, at a cost of 30,000 dollars. The top upper stories will let to an American company for the purpose of running an hotel to be called the Manitoba Hotel and restaurant. The government has building a separate palace, 240 feet long by 40 feet wide, four stories in height, at a cost of 30,000 dollars. AGRICULTURE.

Notes and Suggestions of Prac-
tical Utility

FOR THE FARM, FIELD, GARDEN AND
DAIRY.

Cleanings of Interest for Our Country
Readers.

Waste is a sin; avoid it.
Don't waste the soil at all costs.

A milk tester simply gives facts.
Tight houses save fuel in winter.

The man who drinks pays the house.
Farm twice as well on half the soil.

Every shiver shakes out a little fat.
Fall plowing destroys many insects.

The man who drinks pays the house.
Farm twice as well on half the soil.

Let us have more crop from less acres.
Slaughter house refuse makes poor pork.

All things find their equilibrium at last.
Feed the colt skimmilk the first winter.

Not all improved breeds are improvements.
Lack of care destroys machinery faster than

use.
Have no old hogs around unless for breed-

ing.
The creeping baby should have the warm

floor.
Every farm should have a workshop and

tools.
Cornmeal is often adulterated with gluten

meal.
Boys, avoid tobacco as a subtle enemy of

health.
The crank is necessary in the turn of

events.
Roots of grass need protection by a thin

mulch.
Give your fowls good protection and low

roosts.
Water in excess purges and cleanses the

system.
The most productive soil is naturally on

the top.
The hoe is generally easier found out than

the why.
A good deal of energy is lost in the equal

of a pig.
Plants are good, but do not let them darken

the room.
It takes more than a milk tester to make a

good cow.
An axe used as an absorbent erpel the

ammonia.
Why were not farmer's institutes thought

of before.
An air pump is best to retain warmth or

expel cold.
Better an abandoned farm than an abandon-

ed better.
Don't be too "stuck up" if you want good

neighbors.
Give the farm credit for what it furnishes

the family.
The horizon of education is rapidly

expanding.
Horses stabled with other stock do not

thrive well.
Perfect digestion is impossible without in-

fermentation.
It is said that severe pruning of apple trees

hastens decay.
Feeding the soil means feeding the plants

that grow on it.
If all the world's share there would be no

over-production.
It is not economical to feed any one kind of

food exclusively.
Have you a barn lantern well provided

against accidents?
It is said that cheese made from the milk

of the cow is better than that made from the milk of the goat.

The higher the price of coal the faster we

make millions.
Half the world lives on the interest of what

the other half owes.
Animals when crowded do no better than

periods in the same condition.
Woman's work is never done. Man's is

often left undone.
Clapboards and tared paper are cheaper

than food for warmth.
A bird in the hand is sometimes worth a

whole flock in the bush.
All things come to him who waits. They

are included in the end.
Keep busy at the best thing you can find

to do and forget your ills.
Animals often become coarser because they

have not sufficient water.
There is really no market quotation for fresh

eggs. They are above it.
No one food contains all the elements re-

quired for the best results.
Only hogs of the same age and size should

eat from the same trough.
In England, 25 bushels of wheat to the acre

is called disastrously poor.
The man who will put his head fence on the

highway will do other things.
Animals when crowded do no better than

periods in the same condition.
Trash the thrasher who does not keep his

thrasher clean from weed seeds.
Did they have any dirtier stables in the

days of Hercules than we have now?
Draughting a acre of land, Prof. Roberts says

is equal to moving it 100 miles south.
When animals are exposed, the wind blows

away loads of feed in the form of heat.
Handsome is that handsome does, is an

adage that applies to cows as well as folk.
There is more in getting the soil ready for

the seed than in the after culture of the corn.
The fellows who work need to learn how

the fellows who do not work live and get rich.

MRS. GEO. FARRELL,
Rheumatism

RHEUMATISM

AND
EFFECTS OF LA GRIFFE

BANISHED!

Mrs. Geo. Farrell, of Elm, Kings Co.,
N. S., 69 years old, had been troubled with

RHEUMATISM for 20 years. In win-
ter of '91 was taken very sick, with LA

GRIPPE, and became much reduced.
No Appetite, bad Cough, Pain all over

the body, producing swelling of feet and
legs. Neighbors thought she must die.

Six Bottles, one course—
Skoda's Discovery

Skoda's Little Tablets,
Completely Cured her, and she says it

has added 20 years to her life. Is it
strange she should consider it a

WONDERFUL MEDICINE?
SKODA DISCOVERY CO., WOLFFVILLE, N. S.

The effects of a true life is better bequest
to the world than accumulated riches.

The more you plow thistles the more they
thrive. Every joint sows a new plant.

When you get in warm quarters at the
village, don't forget your horse hitched to a

post.
Dipping options is gambling, but the dealer

circles go through the mails all the
same.

Who would have supposed in 1792 that
Columbus would kick up such a bobby in

1892?
The amount of butter that can be made from

a cow's milk can be found without buying a
tester.

It is natural for children to play in the dirt.
Dress them accordingly and give clean dirt to

play in.
The anti-debureurs will never progress fast

enough to set the world on fire. They lack
in virility.

The nation's average is thirteen bushels of
wheat per acre. Fity the man whose crop is

below that.
Keep the lower part of your salivary

straightway of the grain. Put the curve in
the upper end.

Don't expect the wool growers to teach you
the secrets of the wool business. That is not

their business.
The sheepsman seems to think the tale of a

dead dog worth a good deal more than the
tale of several live ones.

A row of well cleaned kerosene oil barrels,
placed in the cellar and connected with pipes,

makes a very good cistern.
Animals thrive on less food in the summer

because little or none is required to keep up
the temperature of the body.

The Rural New Yorker says: He who in
his stable uses lots of plaster will find his

farming able to move a little faster.
A man cannot sharpen his wit on a grind-

stone, but it is a wiles man who does not
keep his cutting tools sharp on one.

Don't crowd too much rough feed into your
animals. It makes them stuffy and uncom-

fortable instead of increasing their weight.
The usual way of using up the by-product

of the dairy is to feed them to the pigs. Pig
feeding can be made very profitable under

these circumstances, but we believe that
poultry keeping can be made more so.

There is little danger of glutting the winter market
with eggs of the first quality as there is with

first-class butter, and there is just as much
profit in selling a dozen of eggs as there is in

selling a pound of butter. Those who have
private customers for their milk and butter

have a market for their milk and butter.
Poultry keeping will not interfere at all

with regular farm work and skin and butter-
milk can be regularly fed to the hens and

chickens when it is not required for the calves.
It will be readily acknowledged that if, with

the same farm force and no additional hard
labor, we can considerably increase the in-

come from the farm it should be done. We
do not mean to be understood as advising
