

FRESH!

IN some particulars it doesn't do to be **too fresh**, but with **Cod Liver Oil**, whether in the pure oil or the emulsion, you cannot have it too fresh.

Fish products when a little stale, develop poisonous compounds, and in that respect are much worse than stale meats.

Why many delicate stomachs reject Cod Liver Oil is often because of not being able to get the fresh oil.

We have made arrangements to get our oil direct from the fisheries and we make a practice of never filling old bottles, — we will exchange with you if you wish. On opening a barrel, we draw it off in bottles and seal securely, so that it is not exposed to the air. Until you have tried it you would never believe the **difference it makes in the taste**.

We have found the best results from

Parke's Emulsion of Cod Liver Oil

WITH

..WILD CHERRY..

AND

HYPOPHOSPHITES.

We have special machinery, run by electric power, for making this Emulsion, as the enormous trade that we have in it has made it necessary.
