THE DIVINE HEALER.

ILLNESSES OF THE WORLD FALL BEFORE HIS MIGHTY POWER.

MENTAL AND PHYSICAL HEALING

Rev. Dr. Talmage Preaches on One of Christ's Great World Works - The Misalon of Christ Put in an Uousual Light. -The Intimacy Between the Mind and the Body and Its Effect.

Washington, July 22 .- In this diswashington, July 22.—In this discourse Dr. Talmage (who is now traveling in Europe) puts in an unusual light the mission of Christ and shows how divine power will yet make the illnesses of the world fall back; text, Matthew xi, 5, "The blind receive their sight, and the lame walk, the lepers are cleansed and the deaf hear." and the deaf hear."
"Doctor," I said to a distinguished

bottor, I said to a distinguished surgeon, "do you not get worn out with constantly seeing so many wounds and broken bones and distortions of the human body?" "Oh, no," he answered; "all that is overcome by my joy in curing them." A sublimer and more merciful art never came down from heaven than that of surgery. Catastrophe and disease entered the earth so early that one of the first wants of the world was a doctor. Our crippled and agonized human race called for surgeon and family physician for many years be-fore they came. The first surgeons who answered this call were ministers of religion—namely, the Egyptian priests. And what a grand thing if all clergymen were also doctors, all D.D.'s were M.D.'s, for there are so many cases where body and soul need treatment at the same time, consolation and medicine, theology and therapeutics. As the first surgeons of the world were also ministers of religion, may these two professions always be in full sympathy! under what disadvantages the surgeons worked, from the fact

dissection of the human forbidden, first by the pa-then by the early Christ-es, being the brutes most man race, were dissected, an body might be unfold-siological and anatomical and the surgeons had to vas inside the temple by ne outside of it. If they surgical operation, they ited and driven out of s was Archagathus be-

sions of a sacred rite, surgery the predecessor and we see it again in ere Ahaziah, the ed on some cracked latthe palace, and it broke, of the palace, and it block, if from the upper to the or, and he was so hurt that to the village of Ekron for d Aesculapius, who wrought onders of surgery that he was and temples were built for orship at Pergamos; and Epid-and Podelirius introduced for relief of the world phlebotomy,

d Damocedes cured the dislocated f his queen, and Hippocrates put uccessful hand on fractures and introduced amputation, and Praxagoras removed obstructions, and Herophilus began dissections, and Erasisphilus began dissections, and Erasistratus removed tumors, and Celsus, the Roman surgeon, removed cataract from the eye and used the Spanish fly; and Heliodorus arrested disease of the throat, and Alexander of Tralles treated the eye, and Rhazas cauterized for the prevention of hydrophobia, and Percival Pott came to combat diseases of the spine, and in our own century we have had, among others, a Roux and a Larray among others, a stouck and a land in France, an Astley Cooper and an Abernethy in Great Britain and a Valentine Mott and Willard Parker and Samuel D. Gross in America and a galaxy of living surgeons as bril-

liant as their predecessors.

But notwithstanding all the surgical and medical skill of the world, with what tenacity the old diseases hang on to the human race, and most of them are thousands of years old, and in our Bibles we read of them — the carbuncles of Job and Hezekiah, the palpitation of the heart spoker of in Deuteronomy, the sunstroke, of a child carried from the

ds ... Shunem, crying, "My head, ead!" King Asa's disease of the feet, which was nothing but gout; defection of teeth, that called for dental surgery, the skill of which, almost equal to anything modern, is still seen in the filled molars of the unrolled Egyptian mumnies; the ophthalmia caused by the juice of the newly rine fig. leaving the people the newly ripe fig, leaving the people blind by the roadside; epilepsy, as in the case of the young man often fall-ing into the fire and oft into the waing into the life and of into the water; hypochondria, as of Nebuchadnezzar, who imagined himself an ox and going out to the fields to pasture; the withered hand, which in Bible times, as now, came from the destruction of the main artery or from paralysis of the chief nerve; nds of the man whom the thieves left for dead on the road to Jericho and whom the good Samaritan nursed, pouring in oil and wine wine to cleanse the wound and oil to soothe it. Thank God for what surgery has done for the alleviation

But the world wanted a surgery without pain. Drs. Parre and Hickman and Simpson and Warner and Jackson, with their amazing genius, came forward and with their anaesthetics benumbed the patient with narcotics and ethers as the ancients quieted him for awhile, but at the re-The world has never seen but one surgeon who could straighten the crooked limb, cure the blind eve or reconstruct the drum of a soundles ear or reduce a dropsy without pain at the time or any pain er, and that surgeon was Jesus rist, the mightiest, grandest. genst and most sympathetic surgeon world ever saw or ever will see, d he deserves the confidence and

love and worship and hosanna of all the low and hallcluiahs of all hear the name of Malchus, and Peter let his sword fly, aiming at the man's The New Russian-American A Miraculous Rescue at the name of Malchus, and Peter let his sword fly, aiming at the man's the name of Malchus, and Peter let his sword fly, aiming at the man's the name of Malchus, and Peter let his sword fly, aiming at the man's the name of Malchus, and Peter let his sword fly, aiming at the man's the name of Malchus, and Peter let his sword fly, aiming at the man's the name of Malchus, and Peter let his sword fly, aiming at the man's the name of Malchus, and Peter let his sword fly, aiming at the man's the name of Malchus, and Peter let his sword fly, aiming at the man's the name of Malchus, and Peter let his sword fly, aiming at the man's the name of Malchus, and Peter let his sword fly, aiming at the man's the name of Malchus, and Peter let his sword fly, aiming at the man's the name of Malchus, and Peter let his sword fly, aiming at the man's the name of Malchus, and Peter let his sword fly, aiming at the man's the name of Malchus, and Peter let his sword fly, aiming at the man's the name of Malchus, and Peter let his sword fly, aiming at the man's the name of Malchus, and Peter let his sword fly, aiming at the man's the name of Malchus, and Peter let his sword fly at the name of Malchus, and Peter let his sword fly at the name of Malchus, and Peter let his sword fly at the name of Malchus, and Peter let his sword fly at the name of Malchus, and Peter let his sword fly at the name of Malchus, and Peter let his sword fly at the name of Malchus, and Peter let his sword fly at the name of Malchus, and Peter let his sword fly at the name of Malchus, and Peter let his sword fly at the name of Malchus, and Peter let his sword fly at the name of Malchus, and Peter let his sword fly at the name of Malchus, and the name of Ma and the lame walk; the lepers are cleansed, and the deaf hear." I notice this surgeon had a fond-ness for chronic cases. Many a sur-geon, when he has had a patient brought to him, has said: "Why was not this attended to five years ago? You bring him to me after all power of recuperation is gone. You have waited until there is a complete conwaited until there is a complete contraction of the muscles, and false ligatures are formed, and ossification has taken place. It ought to have been attended to long ago." But Christ the Surgeon seemed to prefer inveterate cases. One was a hemornage of 12 years, and he stopped it.

hage of 12 years, and he stopped it.
Another was a curvature of 18 years,
and he straightened it. Another was
a cripple of 38 years, and he walked
out well. The 18-year patient was
a woman bent almost double. If you
could call a convention of all the
surgeons of all the centuries, their
combined skill could not cure that body so drawn out of shape. Per-haps they might stop it from getting haps they might stop it from getting any worse, perhaps they might contrive braces by which she might be made more comfortable, but it is, humbly speaking, incurable. Yet this divine surgeon put both his hands on her, and from that doubled up posture she began to rise, and the empurpled face began to take on a healthier hue, and the muscles began to relax from their rigidity, and the spinal column began to adjust itself. spinal column began to adjust itself, and the cords of the neck began to and the cords of the neck began to be more supple, and the eyes, that could see only the ground before, now looked into the face of Christ with gratitude and up toward heaven in transport. Straight! After 18 weary and exhausting years, straight! The poise, the gracefulness, the beauty of healthy womanhood reinstated.

In speaking of Christ as a surgeon I must consider him as an oculist or

I must consider him as an oculist or eye doctor, and an aurist or ear doctor. Was there ever such another oculist? That he was particularly sorry for the blind folks I take from the fact that the most of his works were with the diseased optic nerves. I have not time to count up the number of blind people wentined who ber of blind people mentioned who got his cure. Two blind men in one house; also one who was born blind; so that it was not removal of a visso that it was not removal of a visual obstruction, but the creation of the cornea and ciliary muscle and crystalline lens and retina and optic nerve and tear gland; also the blind man of Bethsaida, cured by the saliva which the Surgeon took from the tip of his own tongue and put upon the eyelids; also two blind men who sat by the wayside

men who sat by the wayside.

In our civilized lands we have rld from the very begin-lling for surgeons, and ill is spoken of in Gene-they employed their art ing and evening newspapers on the jolting cars by the multitudes who live out of the city and come in to business. But in the lands where this divine surgeon operated the cases of blindness were multiplied beyond everything by the particles of sand floating in the air, and the night dews falling on the eyelids of those who slept on the top of their houses, and in some of these lands it is esti-mated that 20 out of 100 people are totally blind. Amid all that crowd of visionless people, what work for an oculist! And I do not believe that more than one out of a hundred of that surgeon's cures were reported. He went up and down among those people who were feeling slowly their way by staff, or led by the hand of man or rope of dog, and introducing them to the faces of their own household, to the sunrise and own household, to the sunrise and the sunset and the evening star. He just ran his hand over the expression-less face, and the shutters of both windows were swung open, and the

> see! Thank God, I see!"
> That is the oculist we all need. Till he touches our eyes we are blind. Yea, we were born blind. By nature we see things wrong, if we see them at all. Our best eternal interests are put before us, and we cannot see them. The glories of a loving and pardoning Christ are projected, and we do not behold them. Or we have a defective sight which makes the things of this world larger than the things of the future, time bigger than eternity. Or, we are color blind and cannot see the difference between the blackness of darkness forever and the roseate morning of an everlasting day. But Christ the Surgeon comes in, and though we shrink back afraid to have him touch us, yet he puts his fingers on the closed eyelids of the soul and midnight becomes midnoon, and we understand something of the joy of the young man of the Bible who, though he had never been able to see his hand before his face, now by the touch of Christ had two head-Whether he be a sinner or no I know not. One thing I know, that whereas I was blind, now I see."

derful as an aurist. Very few people have two good ears. Nine out of ten people are particular to get on this or that side of you when they sit or walk or ride with you, is harp and drum and telegraph and telephone and whispering gallery all in one. So delicate and wondrous is the auditory apparatus. The mightiest scientists have put their skill to est scientists have put their skill to
its retuning, and sometimes they
stop the progress of its decadence or
remove temporary obstructions, but
not more than one really deaf ear
out of 100,000 is ever cured. It took a God to make the ear, and it takes a God to mend it. That makes me curious to see how Christ the Surgeon succeeds as an aurist.

We are told of only two cases he operated on as an ear surgeon. His friend Peter, naturally high temper-The highest point at which flowering plants have been found was in Thibet, at 19,200 feet. Nine species were recorded at 19,000 feet or higher.

head, but the sword slipped and hewed off the outside ear, and our surgeon touched the laceration and

a synagogue? They would have paid him large fees, and there were hundreds of wealthy people in Jerusalem and among the merchant castles along Lake Tiberias who would have given this surgeon houses and lands and all they had for such cures as he could effect. This greatest surgeon of all the centuries gave all his services then and offers all services now free of charge. "Without money and without price" you may spiritually have your blind eyes opened, and your deaf ears unbarred, and your dumb tongues loosened, and your wounds healed, and your soul saved. If Christian people get hurt of body, mind or soul, let them re-member that surgery is apt to hurt, but it cures, and you can afford pre-sent pain for future glory. Besides that, there are powerful anaesthe-tics in the divine promises that soothe and alleviate. No ether or chloroform or cocaine ever made one so superior to distress as a few drops of that magnificent anodyne: "All things work together for good restored went home crying, "I see! I see! Thank God, I see!" to those who love God." "Weeping may endure for a night, but joy com-

eth in the morning. What a grand thing for our poor human race when this surgeon shall have completed the treatment of the world's wounds! The day will come when there will be no more hospitals for there will be no more sick and no more eye and ear infirmaries, for there will be no more blind or deaf, and no more deserts, for the round earth deserts, for the round earth shall be brought under arboricul-ture, and no more blizzards or sun-strokes, for the atmosphere will be expurgated of scorch and chill, and no more war, for the swords shall come out of the foundry bent into pruning hooks, while in the heavenly country we shall see the victims of accident or malformation or hereditary ills on earth become the athletes in Elysian fields. Who is that around whom the crowds are gathering with admiring looks and thanksgiving and cries of "Oh, what the touch of Christ had two head-lights kindled under his brow, cried out in language that confounded the jeering crowd who were deriding the Christ that had effected the cure and wanted to make him out a bad man.
"Whether he be a sinner or no I know not. One thing I know, that whereas I was blind, now I see."
But this surgeon was just as won-

they sit or walk or ride with you, because they have one disabled ear. Many have both ears damaged, and what with the constant racket of our great cities and the catarrhal troubles that sweep through the land, it is remarkable that there are any good ears at all. Most wonderful instrument is the human ear. It is harp and drum and telegraph and cessfully you must have the glass and the shears entirely under water, in one. So delicate and wondrous is its construction that the most difficult of all things to reconstruct is then clip in a curved or straight line as you prefer. So long as no portion of the glass or shears is out of the water the cutting will proceed without a break. This is because the water takes up the vibrations of the glass and the shears. Try the experiment and convince yourself.

The Shah's Cats. Cats are generally venerated in Persia. The feline friends of the Shah number 50, each having its own attendant and a special room for meals. When the Shah goes on a journey the cats go, too, being car-ried by men on horseback.

"Excuse me, sir, but nave you a cork screw about you? "Sir! Do I look like a man who orens

The effort to locate Aguinaldo has been intrusted to the native police, and they have been at work for several weeks looking up traces and hints of his where abouts. General MacArthur is quoted as saying that it would be only a question of time when the sly Filipino chieftain would be caught, if alive. There are reasons for thinking that Aguinaldo lost his life in a skirmish with Major March's men in Cagayan in May. men in Cagayan in May,

Result of the Diversion of Steamships on

New York, July 21.—Exporters and manufacturers interested, in foreign freight rates are generally awaiting the official announcement of marked advances in ocean freights by all the steamship companies in this and European ports, due to the diversion of ocean tonnage to the operations. to the operations of European and Amcrican governments in the present Chinese disturbance. The steamship companies are preparing to advance freights, and the exporters are looking forward to advancing the prices of their products so as to take care of the increased charges. It is generally expected that the advances made in the prices of freight when the South African trouble developed will be more than duplicated. At the North German Lloyd it is said that so far that company has not made any advances, but that they expect an announcement any time. At the Ancho line offices the local agents express the same sentiments. At Barber & Co.'s offices it is said that they have made some advances in their tariffs, but that it is not as yet general. According to a high authority, the trouble in Ch na has not affected executions from the Inited States. affected exports from the United States to that country, except in the case of cotton goods, flannels, and the like. Orders for several large shipments of these goods have been countermanded within the past machinery, pipe, ruils, nails, etc., are being received in large numbers from China, notwith-tanding that the freight rates have been considerably advanced.
