[†]Enter in this column the difference between 5 per cent and the rate of contribution actually made. If the rate of contribution was, for example, 3½ per cent, enter 1½ per cent in this column; if, for example no contribution was made enter 5 per cent.

To get the accumulated deficiency in column (6), add to the amount shown column (5), four per cent thereof per annum for the period which has elapsed up to date. If 16 years have elapsed, 64 per cent would be added to the deficiency in the amount contributed and the total entered in column (6).
