

## TOTAL LENGTH OF SIDES ROUF AND FLOOR IN EACH CASE

Showing three types used which will cost the same. In each case the sums of the front and back wall are equal, and the length of the rafters in each case is also equal.

TOTAL SIDES

**RELATIVE COST OF SHAPES OF ROOFS.** 

It does not make any difference what the shape of the roof is, the house will cost practically the same, providing the slope of the roof is the same, and the height of the front and back wall and the length of the rafters are equal. In the illustration all three types will differ in cost.
