

DR. DOW'S STURGEON OIL LINIMENT.

This celebrated chemical compound is the result of an extensive experience, with regard to the curative powers of all the known medicinal agents, and of a theoretical and practical knowledge of the various chemical affinities brought into play in their combination. By careful investigation and laborious research, the ingredients—having been selected with special reference to their different virtues and peculiar powers, and with an accurate knowledge of the various chemical reactions by which each could be made to modify and strengthen the other—were so compounded as to form a perfectly homogeneous compound, possessing through its wonderful efficacy and manifold healing influences, an adaptation to a wide circle of diseases. The experience of years has fully demonstrated the skill of its composition, and the superiority for all the purposes for which it was recommended. There is no one who has used this Liniment, and tested its curative powers, but what gives it preference over all other Liniments, which accounts for its popularity. It is valuable not only as a counter-irritant to draw pain and inflammation from the internal organs to the surface, thereby relieving deep-seated injuries and organic lesions, but will be specially useful in restoring the skin to a healthy condition in all those annoying affections, attended with inflammation and eruptions, but where the surface is not broken, such as FROST BITES, CHILBLAINS, BURNS, SCALDS, ERYSIPELAS, RINGWORMS, BOILS, FELONS, &c., &c.

For horses it is equally efficacious as for the human family, and has no equal. Farmers and Stable Keepers, and all who have the care of horses and cattle, should not fail to keep the STURGEON OIL LINIMENT constantly at hand, as it is the best application for external injuries on animals, and for almost all diseases to which they are liable, that has yet been discovered. We say this with perfect confidence, that all who may use it will corroborate the truth of our assertion. A discerning public is rapidly appreciating its unrivalled excellence, and as it becomes widely known its complete triumph will be rendered secure.

Invented as it was by a Physician in extensive practice in New Brunswick, and whose reputation for a knowledge of horsemanship is co-extensive with the Province, it soon found its way into general use in livery and private stables, for all the uses for which a Liniment is applicable.

For BRUISES, STRAINS, SADDLE and COLLAR GALLS, CUTS, WOUNDS of all kinds, SCRATCHES, SCURVY, CRACKED HEELS and GREASE, it was found to be an excellent application, cooling down the inflammation, preventing proud flesh, and bringing about a speedy healing surface.

DOW'S STURGEON OIL LINIMENT is also a valuable strengthener for Weak Knees, giving tone to the cords and muscles of the knee.

Applied early to cases of Blood Spavin, it never fails to reduce the soreness and swelling, and if thoroughly applied often brings about a positive cure.

In Founder, Ringbone, and Hard Hoof, its virtues are well known and acknowledged, by the most experienced horse owners. In fact it is not too much to say that for the ordinary diseases of horses and cattle, such as are most commonly met with, Dow's STURGEON OIL LINIMENT and CLARK'S DERBY CONDITION POWDERS make one almost independent of the Veterinary Surgeon. The liniment is applicable to all the external injuries, while the Derby Condition Powders keep the blood pure and the strength unimpaired.

Poll-Evil and Fistula in the Withers have been frequently cured by injecting the Sturgeon Oil Liniment in the fistulous pipes. It must be recollected in those cases that an opening must be made at the point where the matter gravitates, and kept open by a seton so as to allow a free exit for the matter. If this is done, and the Sturgeon Oil Liniment is used by injecting it into the fistulous opening, a cure will be effected without fail.

WIND GALLS can be dissipated very frequently in one night by taking a pad of several thicknesses of old muslin and saturating it with the Sturgeon Oil Liniment, and applying it to the WIND GALL, securing it in its place by a firm bandage.

CRACKED HEELS, SCRATCHES and GREASE, are all names for the same disease in the different stages of its progress. These are very troublesome affections, but are readily cured by the use of the Sturgeon Oil Liniment, if strict cleanliness is observed. Before each application the affected parts must be washed with Castile soap and warm water, and thoroughly dried. In the several forms of the disease it would be well to add a drachm of alum or blue vitriol to a bottle of the Liniment.

In SAND CRACK the STURGEON OIL LINIMENT has been found an effectual cure. It will soften the hoof, prevent fungous granulation from the *sensible laminae*, and by anointing the coronet with the Liniment two or three times a day, it will stimulate a healthy secretion of the horn, and gradually obliterate the opening in the hoof. A hot iron should be applied to the angle of the crack for a second, to prevent its further extension, and the hoof be bound with wax end.

Dow's Sturgeon Oil Liniment has never been puffed into favor—it has always pushed its way by its own merits, its inventor did not label it as good for such and such diseases, regardless of truth, but carefully trying it, where he found it useful he kept a note of it, trying it again in similar cases until he was sure of its efficacy. In this way he was led to use it in his practice for Neuralgia, Rheumatism, Contracted Joints, Lumbago, Sciatica, Cramp in Muscles, Sprains and Bruises, and for all these he
