choice young bulls for sale. For prices apply to
O. L. WESTOVER, Luton, Ont.

QUESTIONS AND ANSWERS.
Veterinary.

LUMP JAW.

Steer had a lump on his jaw about two
months ago. I had it opened a month
ago, but it has grown again to about its
former size.

J. H. W.
Ans.—This is lump jaw, and is not al-
ways curable. The iodide of potassium
treatment has given the best results.
This consists in giving iodide of potass-
ium three times daily, commencing with
dram doses, and daily increasing the dose
by say 15 grains, until appetite and de-
sire for water fail, tears run from the
eyes, and saliva from the mouth. As
soon as any of these symptoms appear,
cease giving the drug. Repeat treatment
in two months, if necessary. If pus
forms, lance, and insert 10 grains cor-
rosive sublimate, rolled in tissue paper,
into the opening, and in a few days you
will be able to pick out some detached
tissue. Then dress daily with a five-per-
cent. solution of carbolic acid.

V.
THRUSS.

My horse has thrush in fore feet. The
frogs are practically rotting away. He
stands on board floor, clear of all dirt.
Give cause and cure.

W. A.
Ans.—The cause of thrush is the more
or less continued presence of irritant ma-
terial in the cleft of the frog. As your
horse stands in a stall free from dirt,
etc., the irritants must gain entrance
when he is out of the stall, and are not
removed. Some horses are so predis-
posed that slight exciting causes produce
the disease. Clean the cleft of the frog
out thoroughly, and keep it clean; re-
move all partially-detached horn, and
dress with calomel once every second day,
until all discharge ceases. Work the
calomel well down to the bottom of the
cleft. Neglected, or very severe cases,
are liable to complications that require
the personal attention of a veterinarian.

V.
PARTIAL LUXATION OF PATELLA.

Colt, seven months old, got hurt about
three months ago. The cap on stifle
will not stay in, but comes out when he
walks and goes back with a snap. It is
different from luxation of the patella. I
have blistered and painted with iodine
without avail. Would it be well to place
him in slings?

C. E. H.
Ans.—The patella becomes partially dis-
located and slips back with a click. In
all probability you will notice a puffy en-
largement just below the joint on the
front of the leg. It is not probable he
will ever be right, but he should make a
serviceable horse. It would not be wise
to place him in slings. Repeated blister-
ing is the best treatment. Keep him as
quiet as possible in a box stall. Do not
allow him out of the stall at all. Take
1½ drams each of biniodide of mercury
and cantharides, and mix with 2 ounces
vaseline. Clip the hair off the part; tie
him so that he cannot bite it; rub well
with the blister once daily for two ap-
plications; on the third day wash off and
apply sweet oil; let his head down now,
and oil every day. As soon as the scale
comes off, blister again, and once month-
ly after this, until you can turn him out
on grass.

V.
HORSES COUGHING.

Young horses had distemper last winter,
and this winter are coughing again.

1. Should the stable be disinfected, and
how?
2. Is there any preventive measures?
3. What is the treatment for the
disease?

D. McL.
Ans.—It is not probable your horses
have a second attack of strangles or dis-
temper.

1. It is good practice to disinfect
stables after an outbreak of strangles.
Sweep and dust thoroughly, then wash
with a hot, five-per-cent. solution of car-
bolic acid (the crude acid will do). Fol-
low this with a thorough coat of hot
lime wash with five-per-cent solution car-
bolic acid. It is good practice to give a
second coat of whitewash.

2. The only preventive measures is
prevent exposure of the virus.

3. Isolate; keep comfortable in well-
ventilated stables; poultice the throats;
open all abscesses as soon as ready; give
internally 2 to 6 drams hyposulphite of
soda three times daily. If complications
arise, such as heavy breathing, failure to
eat, etc., send at once for your veteri-
narian.

V.

The Danger that
Lurks in Colds

AND HOW SERIOUS RESULTS CAN
BE AVOIDED BY USE OF

DR. CHASE'S SYRUP
OF
LINSEED AND
TURPENTINE

There is one way in which the ravages
of consumption can be very materially
lessened and that is by the prompt and
thorough cure of coughs and colds.

While weak lungs undoubtedly predis-
pose to lung trouble and consumption, the
beginning must always be with a neg-
lected cold.

By directing your attention to Dr.
Chase's Syrup of Linseed and Turpen-
tine, we make known to you the most
certain and effective means of curing
coughs and colds and preventing such
diseases as bronchitis, consumption and
pneumonia.

This is not a new medicine, not an ex-
periment, but a preparation which has
successfully stood the test of time and
has to-day by far the largest sale of any
similar treatment.

If we can only help you to realize the
danger of neglecting coughs and colds,
we know that you will not run the risk
of depending on any "cough mixture"
the druggist may choose to hand you
out, but will insist on getting a medi-
cine with a reputation, such as Dr.
Chase's Syrup of Linseed and Turpentine.

It is impossible for a doctor to pre-
scribe for man a more effective treatment
for croup, bronchitis, whooping cough,
asthma, coughs and colds than Dr.
Chase's Syrup of Linseed and Turpentine.
25 cents a bottle, at all dealers.
