The House, Garden and Farm.

TO BRIGHTEN SILVER.—Old newspapers will put a finishing touch to newly cleaned silver knives and forks and tin ware better than any thing else.

CURE FOR POISON IVY.—Steep Lobelia in hot water. Wind the affected part with cotton cloths saturated with the liquid. If the solution be made strong enough this is a certain remedy.—A. A. Wright, Renfrew, Ont.

MEADOWS.—As soon as may be after the hay is gathered give the meadows a good topdressing of fine manure. This will produce a thick bottom growth to shade the ground and prevent the soil from drying up and injuring the roots of the grasses.

YOUNG FRUIT TREES.—Many young fruit trees, especially pears, are burned to death during the hot season. Even when the ground is kept wet and their roots are moist enough, young and newly-set trees upon which the bark is thin and tender are cooked by the sun as by a fire, and the branches and trunks die while the roots remain alive. This may often be prevented by winding the trunks with cloths, which shut out the sun.—Mirror and Farmer.

POTATO-WATER.—The New York World says:—Potato water, or water in which potatoes have been boiled, is now recommended in various quarters as not only an effective but an immediate remedy for lice on cows and other cattle, also for ticks. The affected parts are bathed with the potato water; one application is generally sufficient. This remedy (if remedy it prove) has the merit of being exceedingly simply employed and without injury to the cattle.

JULY AND AUGUST are the best months for cutting timber, that it may be the most durable. The growth of the year is now well nigh over, and if the trees are allowed to lie until the green foliage dries upon them, the greater portion of the sap is thereby withdrawn from the wood and the seasoning is rapid and perfect. Cut in mid summer, insects are much less liable to attack the wood, which is an important point with some kinds of timber like the hickory, etc.

BIRDS.—As a general rule all birds which go alone are the friends of the farmer (the Hawk excepted). So far as farm work is concerned boys and birds come under the same rule, to wit, one boy is a boy, two boys is half a boy, and three boys is no boy at all. When you see a crow or a blackbird following the ploughman in his furrow he is doing good to humanity. But when you see them joining the flock there is evil determined on. The best farm birds, after the toads, are those which climb the trees, going around the limbs, such as woodpeckers, yellow-rumpers, sapsuckers, nut-crackers, butcher birds, in a word all birds that go alone.

SODA IN COOKING.—Dr. Horne writes in the Country Gentleman:—Above all things, no preparation of soda should enter into human food. The practice, although common, is the source of much suffering, and any person recommending saleratus in any form in the preparation of our food commits a great wrong. For, as I have heretofore said, no person can long have a stomach free from disease which is the receptacle of soda mixed with the food. This is a positive conclusion beyond contradiction. There is no need of soda in any form. Eggs, milk, and cream are all sufficient for light, delicate, healthy food, and as a luxury. Even such food should only be partaken of quite moderately, as it is too rich for constant use, for any stomach which desires to remain healthy. I would not be understood to decry good living, for I am fond of good living, and indulge occasionally in that which brings a penalty; often quite serious. I never, however, partake of anything to eat or drink, of which soda forms a prominent part.

TO RENDER COTTON FABRICS FIRE-PROOF.—At a sanitary convention in Michigan, Dr. Kedzie, of the State Board of Health, said that cotton clothing could be prevented from taking fire by the use of borax in the starching—a tablespoonful to each pint of starch, after the water has been added. The borax can have no injurious effect upon the cloth or upon the wearer, and is so cheap that all can afford to use it. It was shown by experiments that muslins and tarlatans, the most inflammable goods, when treated with borax starch, could not be made to burn with a blaze. If all cotton dresses and underclothing, and especially the clothing of children, were treated in this way, a great number of lives and much suffering would be saved every year. Dr. Kedzie said he expected that one of these days some shrewd fellow would use this recipe, mix starch with borax, and sell it as asbestos "starch," or with some other catching name, at 500 or 600 per cent profit, and get rich out of it. The people could just as well do their own mixing and save the profit.

DANGER FROM GLANDERS.—A surgeon in the German army calls the attention of all who have to do with horses to the danger of using the pocket handkerchief to wipe away any foam from the mouth or nose of a horse which may have been thrown upon their clothes. Some months ago, the writer states, an officer came to him suffering from an obstinate cough. The usual remedies were prescribed, but in vain: a visit to the baths of Reichenhall also did the patient no good. Returning to duty the officer became worse; fever, attended with great pain in and swelling of the head, set in, and ultimately, after much suffering, he died with every symptom of glanders. Inquiries were set on foot, and it was found that some time before he was taken ill he had ordered a horse which he believed was suffering from glanders to be shot. Neither the groom nor any of the other soldiers who had been near the horse have been attacked by glanders, and consequently it is suspected that the officer who died may have conveyed the disease into his system by perhaps using his handkerchief to wipe some of the foam from the mouth or nose of the horse from his uniform.

FOR OVER 40 YEARS PERRY DAVIS' PAIN-KILLER

GOOD PHYSICIAN

In curing Cholera, and all Summer Complaints, Cramps and Pains in the Stomach, Sudden Colds, also for Scalds, Burns, Bruises, Sprains, Chilblains, Boils, Rheumatic Affections, Neuralgia, Toothache, Pains in the Joints or Limbs, Stings of Insects &c., &c., &c.

BEWARE OF COUNTERFEITS!

The Pain-Killer is recommended by Physicians, Ministers, Missionaries, Managers of Factories, Workshops, Plantations, Nurses in Hospitals,—in short, by every body everywhere who has ever given it a trial.

The Pain-Killer is prepared from the best and purest material, with the most approved appliances that can be had for money, and with a care that insures the most perfect uniformity. No expense is spared to make it what it is, superior to all would-be competitors, a thoroughly reliable killer of pain. Instantaneous in action, harmless and safe in the most unskilful hands.

SUBSTITUTES.

The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of Pain-Killer, they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the Pain-Killer; and being compounded of the vilest and cheapest Drugs, are bought by the dealer at about half what he pays for the genuine Pain-Killer, which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

BEWARE OF SUBSTITUTES!

FOR CHOLERA, CHOLERA MORBUS,

As well as all Summer Complaints of a similar nature, the Pain-Killer acts with wonderful rapidity and never fails when taken at the commencement of an attack, and often cures after every other remedy has failed. If you reside in a country place far from a physician, the Pain-Killer can be relied upon; it never fails.

FOR SUDDEN COLDS, SORE THROAT, &c.

The proverb "A stitch in time saves nine," is never so well illustrated as in the treatment of these complaints. A teaspoonful of Pain-Killer taken at the beginning of an attack will prove a certain cure and save much suffering.

TOOTHACHE, BURNS, SCALDS, CUTS, BRUISES, &c.

The Pain-Killer will be found a willing physician, ready and able to relieve your suffering without delay, and at a very insignificant cost.

GOOD FOR MAN AND BEAST.

For Colic, Cramps and Dysentery in horses, the Pain-Killer has no equal, and it has never been known to fail to effect a cure in a single instance. It is used in some of the largest livery stables and horse infirmaries in the world. To resuscitate young lambs or other stock chilled and dying from cold, a little Pain-Killer mixed with milk will restore them to health very quickly.

The Pain-Killer is for sale by Druggists, Apothecaries, Grocers and Medicine Dealers throughout the world.

The Pain-Killer is put up in 2 oz. and 5 oz. bottles, retailing at 25 and 50 cents respectively,—large bottles are therefore cheapest.

PUTTNER'S EMULSION OF COD LIVER OIL

WITH IRON AND HYPOPHOSPHITES OF LIME, SODA AND PANCREATIC JUICE.

Its effect has been most wonderful in the treatment and cure of NERVOUS PROSTRATION, MENTAL ANXIETY, LOWNESS OF SPIRITS, OVERWORKED BRAIN, WORRY, ANXIETY, BUSINESS PRESSURE, and all morbid conditions of the system dependent upon the deficiency of VITAL FORCE. This force is supplied by the best LIVER TONIC, which forms the most important part of this compound, in conjunction with

PHOSPHORUS.

IN CONSUMPTION, BRONCHITIS, ASTHMA, COUGHS, CATARRH, and all affections of the CHEST AND THROAT, it has no equal.

IRON.

Which PURIFIES and REGENERATES the Blood, and which is so highly and justly valued in the treatment of ANEMIA, (due to insufficiency of IRON in the BLOOD,) SCROFULA, WASTING, CHILDREN'S DISEASES, RHEUMATISM, IMPROVED BLOOD &c., &c., is also contained in PUTTNER'S EMULSION.

Foamated Juice.

By this the pure cod liver oil undergoes in Puttner's process, a PARTIAL digestion before it is submitted to the stomach, and thereby made more acceptable and more nutritious to the patient.

CAUTION.—See that you get PUTTNER'S EMULSION, as other MIXTURES may be put off. It retails at 50c per bottle, and can be obtained by all Druggists and Dealers.
