## Let Common Sense be your Inspiration.

大の前のの自己の前の中の中のの前のの前のの前の中ではの中でのの前のの前のの前のの前のの

It is very amusing to see how people form a habit and stick to it, no matter how much their common sense tells them it is wrong. We are not using this space to cry down the drink habit, but we refer to what is more far reaching, the going into debt habit. It is not a question with some people of, how can I pay, as, how can I obtain. Goods procured in this manner are procured at the merchant's own price and exhorbitant, compared with the spot cash prices of today. Consequently it costs the purchaser more to live than the persons who pay as they go. How loosely some people run their affairs. No check, no system. Simply a matter of "going it blind" and get, get, get. The "pay as you go" man will sometimes do without an article, but is an independent man, is beholden to no merchant, can go where common sense inspires him, to get the best value for his money. Common sense people are comparing our goods and prices with others, and we are satisfied with the result. Break your habit today.
