The department of agriculture has offered to pay the railroad fare and the nonresident tuition fee of any farmers' sons who wish to attend any attend any stock into this province will read with interest the impor-

amers' south seems to seem the selection of the selection

Every since the organization of the schools has been advocated. Instruc tion has been given farmers almost at their very door in every phase of agri-The travelling school which has just completed a tour of the provnce, gave three days instruction the various centres in the judging of grain and livestock. These schools were largely attended by farmers within a radius of twenty and thirty miles where the instruction was given. In 1907, a grain judging school toured the province and ample evidence can be seen in the province today of enefits derived therefrom. The department has experts holding meetngs throughout the country district: giving instruction in poultry raising and dairying. The creameries are an object lesson to the farmers and the poultry fattening stations show what can be done in the hen house. Fruit experimental stations are established n all parts of the province and th estimates placed on the table at the recent session of the legislature made provision for a dry farming experimental station, in the south. With two Dominion experimental farms in
