CHAPTER XXIV.

"Four days, or is it four years, since he went?" This is the question Paula puts to herself, as she walks the colt up the hill to the cottage, on the evening of the fourth day since Sir Herrick's departure. It may well be four years instead of so many days, judging by the snail's pace at which they have

And the latter mode of killing time seems to be the most effective.

Paula is an admirable horsewoman. Has she not ridden every horse about the farm since she was able to stick on their backs and cling to their manes?
And between the colt and her there is a complete understanding and mutual When May goes a-riding, a splendid

groom follows on a sleek and burnished steed, but Paula needs no groom, and is as fearless as a circus performer. So it comes to pass that she and the col wander through the green lanes and across the meadows-taking a hedge and a gate or two on their way-very much during these four days. Sometimes she goes at a gallop. skimming across the landscape, a very graceful and pretty figure, causing a farm laborer working in the fields, or a wayfaren trudging along the roads, to turn and look after her admiringly and wonderingly; and sometimes-oftener, indeedshe lets the colt walk in his own meditative fashion, while her little graceful figure droops in the saddle, and her sweet face grows dreamily pensive. But

whether galloping or walking, she is ever thinking of her lover up in Lon-don, and wonderig what that business can be which detains hi ther way of spending timeand, oh! what an unpleasant one it is is waiting for the postman! Who has not done it, and suffered the inevitable disappointment, the cold feeling of hope deferred? He might write a line, a line only, thinks Paula, as the postman fails each day to hand her a letter among Bob's business ones and Alice's epistles from her London mil-

"If it were only a line," she thinksjust a simple, "Dear Paula, I am quite well and longing to be with you." That would do. But he does not write. She tries to console herself with the reflection that such men as Sir Herrick hate and loathe pen and ink and paper, and letter-writing especially; that he is too busy, that he hasn't time; but she is disappointed all the same. Then Alice, whose superior smile has grown into one of sympathy and pity, exasperates Paula almost to madness. Alice never fails to ask her each morning:

If she but knew that remorse and a

What he came for was not quite city and not a sham reciprocity, a reciprocity in which we receive as well plain; he generally came in just before lunch, sauntering in with his absurd knickerbocker costume, and his eye-glass in his eye, and loitered about the place, hindering Bob, and talking to Alice for half an hour, until he found courage enough to ask for Paula, which he did with an affected drawl of careless politeness, the affectation of which Alice detected in a moment.

"Miss Paula seems always out," he says, on the third day, and Alice shrugs her shoulders and leans back in her Paula is very fond of the open air;

On this, the evening of the fourth day after Sir Herrick's departure "on business," Paula rides along the road through the Court Park—rides slowly, the colt walking at his own pace and pleasure, the reins on his neck, his beloved mistress drooping meditatively in the saddle, her eyes fixed on vacancy, her thoughts with her truant knight, a tinge of sadness lending a "spirituelle" cast to her beautiful face, which but adds to its beauty—when from a sidepath Stancy de Palmer emerges, and, raising his hat, stands, eyeglass in his hand, regarding her. hand, regarding her. "Have I?" says Paula. "I suppose have. I'm fond of it, you see." "I know, because you are never in when I call at the cottage," he says, with a lackadaisical sigh. Paula looks at him innocently.
