

Announcement

Gas Plants
Street Railways
Inter-urban Electric Lines
Electric Light and Power
Water Powers, Waterworks

These are the things which stand for growth, increase of values, stability, enterprise and public spirit.

The towns which have these things are the towns which go ahead and flourish.

The towns which do not have them nor try to have them are the towns which stand still and are never heard of.

We are prepared to develop any of these public utilities in any town in Canada—
either for the town or as a private corporation.

Mayors or Presidents of Boards of Trade or Town Commissioners are invited to write to us concerning any such developments and we will send a competent engineer to examine the local situation with the view of our submitting proposals.

Colonial Engineering Co., Limited

282 St. Catherine Street West, Montreal
