

DR WHEELER'S COMPOUND ELIXIR
OF PHOSPHATES AND CALISAYA.

THIS elegant and agreeable preparation is a Chemical Food and Nutritive Tonic, being composed only of ingredients that enter into the formation of the system, and in such carefully adjusted proportions as are readily absorbed and assimilated. It supplies the waste constantly going on from the decomposition of tissues, & the result of physical and mental exertion, preventing Nervous Prostration and General Debility. Its action is purely physiological, building up the constitution in the same manner as our daily food. It has been used in private practice with eminent success in the treatment of Chronic Weak Diseases, depending upon depraved nutrition and impoverished blood. It acts immediately on the stomach, invigorating Digestion, Assimilation, and the formation of Healthy Blood, energizing the nervous and muscular systems and all the vital organs. Sold at \$1.00; 6 bottles, \$5.00. 4-62z

CYANO-PANCREATINE.

THIS MEDICINE, prepared by the Sisters of the General Hospital of Montreal, (Grey Nuns,) contains no ingredient which can in any way injure the system.

As a compound, it is entitled to rank amongst the most beneficial of all medical remedies, principally in the following cases:

1st Disease, or derangement of the digestive faculties, where it produces astonishing effects throughout all the stages of the disease, provided there be no organic lesion, in which case the Medicament can only impart a temporary relief. Its curative properties have been already tested in a great number of the above mentioned cases, thus leaving no doubt of its efficacy.

2ndly. In *H. siccus* or *Pulmonary Cough*, it acts most soothingly, invigorates expectoration, relieves the cough, and brings the malady to a prompt solution.

3rdly. In *Colds* tending to Consumption, it causes a visible change for the better, renders expectoration easy, and assists the stomach to dispose of those other remedies suited to the peculiar nature of the case, thus tending to only to alleviate suffering, but also to prolong life.

Wittolistic Agents.—Evans, Mercer & Co., Montreal.

For sale in retail by all respectable Druggists and Medicine Venders. 4-22-1m

THE DOMINION TELEGRAPH INSTITUTE,

89 ST. JAMES STREET, MONTREAL, P.Q.

GEORGE E. DESBARATS,
Proprietor.

Established for the purpose of qualifying Operators for the new Telegraph Lines now building throughout the Dominion and the United States.

This Institution having been established three years, may now be considered a permanent College. Its rapid growth and prosperity are due to the demands of the Telegraph community, and the great success which has attended the Proprietor is due simply to the able manner in which the system has been conveyed to the Pupils by the Professors attached to the Institute.

The rapid development and usefulness of the Electric Telegraph, and the ever-increasing demand for First-class Operators render the opening of Colleges for instruction a positive necessity.

Telegraphic Superintendents view this move sent as one made in the right direction. Commercial Colleges have, to some extent, assumed the responsibility of teaching in this, as well as in other branches of business location. The knowledge of Telegraphy gained in this manner has always been looked upon as being second rate. So much so that the Colleges in Chicago, Milwaukee, Buffalo, New York, &c., have discontinued the practice of Teaching and recommending the Telegraph Institute as the proper place to acquire this highly interesting, scientific and profitable art.

The prospects for Young Men and Ladies to study the system of Telegraphy could not be better than at present, and we call upon all who wish to enhance their present and future employments to qualify themselves as Operators for the Lines of Telegraphy. Graduates on leaving the Institute are presented with a diploma of proficiency, which will enable them to act immediately as vacancies occur throughout the Dominion of Canada and the United States. At the salaries of \$800 a month may be seen, &c., after two years' experience on the lines, from \$10 to \$20 a month can be commanded, while in the United States from \$40 to \$120 per month are paid.

The possession of knowledge of Telegraphy is especially open to Ladies; in fact, they are the favorites of operators both in England and America, commanding higher wages, as compared with other employments, than men, while they have the natural facility of acquiring the system sooner. A fair knowledge of reading and writing are the only qualifications necessary for any person, or rotary operator, to become a competent operator. This has been proved by many who, with very slight education and a knowledge of the mechanics of Telegraphy on entering, have become good operators in a few months. Students have also an opportunity of learning Rapid Writing. Some of our students who could not hardly write their names now take down a message at the rate of from 20 to 30 words a minute.

THE DUTIES OF AN OPERATOR.

There is no trade or profession which requires so small an amount of labour, and at the same time where the employee has the same amount of freedom and independence, being at all times master of the instrument over which he presides, generally in an office by themselves, without either foreman, or master, merely to take and despatch messages. The usual hours of attendance required is from 10 to 12 hours per day, less the usual hours for meals. Operators are not required to work on Sundays. The Institute is fitted up in a most complete and practical manner, with all the usual fixtures, &c., of a regular Telegraph office on a large scale. Messages of every description, Train news, arrivals and departures, Market Reports and Cable messages are sent and received, as daily practised on the lines. Individual instruction is given to each pupil, according to capacity of learning the science. Neither pains nor expense are spared to qualify the students for important offices, in the shortest possible time. Students may commence their studies at any time, and continue at the College until they are proficient operators, without any further charge. There are no vacations. Hours of attendance, from 10 A.M. to noon, and from 1.30 to 6 P.M. The time occupied in learning averages fifteen weeks; but this, of course, depends principally on the capacity of the pupil for instruction. Some pupils who are now on the lines completed their course of study in from five to eight weeks.

The terms for the full course of instruction is Thirty Dollars. There are no extra expenses, as all necessary materials, instruments, &c., are furnished to each student.

A line has been constructed on which students of this Institute will have actual practice, when sufficiently advanced. In case of a broken communication, the repairs will be conducted by a Professor of Telegraphy, under the eyes of the students; so that a really practical knowledge may be attained in every branch of the Science of Telegraphic Communication.
