

- Alternative choices must be made to address the ecological issues of identifying sources of protein. In the North, we must be cognizant of the impact of our choices. We must question consumption rates.

Summary of Policy Recommendations

Leaders:

- There is an urgent need for producers to receive a fair share of profits - consumers have access to an (SRI) (Sustainable Investment Research of Finance)
- Environmental issues of (SRI) (Sustainable Investment Research of Finance) is the foundation and motivation for sustainable development and addressing the current forestry practices are having serious impacts on the environment.
- Sustainable development goals must be raised. Consumers, coalitions and pressure groups to raise awareness and lobby for change.
- Governments must ensure sustainability for the environment and for consumers.
- Fish products need to be labeled so consumers are aware of what they are purchasing (wild/farmed, domestic/imported - from where).

Follow up to the workshop

There is a strong need for and interest in further networking, sharing of resources, learning success stories, and sharing current information.

Appropriate websites were identified. Coalitions will work to ensure that smaller and justice groups are included in the information loop.

Workshop participants would like to have a Fisheries Forum prior to the next Peoples Summit in Malaysia.

Actions taken and strategies implemented between this workshop and the 1998 Peoples Summit will be tallied to provide a realistic "snapshot" of issues in November 1999 and changes/success by 1998.

There is a need for (SRI) (Sustainable Investment Research of Finance) strategies. Resistance and coalition building must be a priority.

Any (SRI) (Sustainable Investment Research of Finance) must be based on the world's largest class of consumers and the characteristics of the world's

Most (SRI) (Sustainable Investment Research of Finance) must be based on the world's largest class of consumers and the characteristics of the world's

Resistance and coalition building at a corporate level is critical. Part of the challenge is tracking down the most effective community resistance is knowing who owns the
